Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water by cleaning of equipment or disposing of equipment washwaters or rinsate.

Treated seeds and bulbs are hazardous to fish, birds and mammals. Do not plant treated seeds by broadcasting to soil surface. Ensure that all seeds and bulbs are thoroughly covered with soil, especially in turn areas. If seeds and bulbs are not thoroughly incorporated by the planter during planting, additional incorporation may be required to thoroughly cover exposed seeds and bulbs.

This product aids in the control of *Alternaria* and *Phoma* on canola. This product aids in the control of seed borne conidia produced from the honeydew inoculum from field infection of *Claviceps africana* (ergot) on sorghum seed.

**For Slurry-Type Treater:** This product should be applied with water as a suspension in the slurry-type treater specifically designed and approved for this purpose.

**For Filmcoating Operations:** This product has demonstrated good to excellent compatibility with most commercial filmcoating products. Coating procedures identified by polymer/coating companies and filmcoating equipment manufacturers should be followed when preparing coating preparations containing this product.
