**DEFLEA**  
PET SHAMPOO

De Flea kills fleas, ticks, lice and mites. It can be used on all puppies and kittens... even nursing animals!

*For Use on Dogs and Cats:*

**DIRECTIONS FOR USE:**

**READ ENTIRE LABEL BEFORE EACH USE. USE ONLY ON DOGS AND CATS.**

It is a violation of Federal Law to use this product in a manner inconsistent with its labelling.

1. Apply DeFlea onto coat of pet. Work shampoo into pet's coat until a lather is formed. Be sure that entire pet is treated, including hard to reach areas such as between paws.
2. Rinse animal thoroughly then dry. When ticks are present, wait 5 minutes before rinsing and drying.
3. Repeat as necessary.

**NOTE:** It is vital for young puppies and kittens to maintain a normal body temperature. Take precautions to provide a warm environment during and after bathing.

*For Use as a Spray:*

1. Spray entire animal, including legs and paws. Stroke the animal's coat against the lay while spraying to make sure the solution reaches the skin. Spray until entire coat is damp.
2. To help solution penetrate to the skin, spray and work into the coat.
3. Dry with towel if desired. (no rinsing is required)
4. In addition to pet, spray on surfaces and fabric that may be infested, making sure adequate product is used to saturate areas where fleas may be hiding. Contacting fleas with product is required to achieve results.

*For Use on Reptiles:*

DeFlea kills mites and other reptile parasites using a different mode of action than pyrethrin based pesticides.

1. Spray directly on reptile, but not to excess (runoff), and all areas where mites may hide. Avoid spraying eyes and facial areas. Alternatively, spray DeFlea onto a cloth and wipe onto reptile.
2. Reapply as often as necessary, but not more often than at 3-day intervals.
3. Do not treat snakes for at least 6 hours after shedding their skin.

DeFlea can be used to clean surfaces of terrariums and other habitats. Spray surfaces with DeFlea and wipe with a clean cloth. Rinse and dry surfaces before reintroducing reptile to habitat. **NOT FOR USE ON AMPHIBIANS SUCH AS FROGS AND/OR TOADS.**
