MICROPEL 5 DIDP is a formulation of 10,10'-oxybisphenoxarsine specifically designed for compatibility with flexible vinyl systems. It may also be used as a preservative in plastic products, adhesives, coatings and specialty products, textiles and textile fibers, and resin, latex and polymer emulsions.

A level of 0.6% MICROPEL 5 DIDP based on total weight of the final treated product will give excellent control against bacteria and mold organisms. For certain items which may be subjected to extended outdoor weathering, a level of 1% should be evaluated.

Do not use MICROPEL 5 DIDP where the treated plastic materials can come in contact with humans or pets or be used as food or feed packing material or as food contact surfaces.
