

45898-1

**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER** Corrosive. Causes eye damage. May be fatal if swallowed or if  
get in eyes, on skin, or on clothing. Irritating to nose and throat. Avoid breathing  
dust. May cause burns to broken skin. Wear goggles or face shield and  
protective clothing when handling. Wash hands after handling.

**FIRST AID (PRACTICAL TREATMENT)** If swallowed feed gruel, cooked  
cereal or bread soaked in milk, followed by olive oil or cooking oil. In case of  
personal contact, remove excess material and flush skin or eyes with cool  
water for at least 15 minutes. For eyes get medical attention as soon as  
possible. Remove and wash contaminated clothing before reuse.

**CHEMICAL HAZARDS** Strong oxidizing agent. Do not use in plastic or  
utensils. Contamination with moisture, dirt, organic matter or other chemicals,  
or any foreign matter may start a chemical reaction with generation or heat  
liberation of hazardous gases, and possible generation of fire.

**ENVIRONMENTAL HAZARDS** This pesticide is toxic to fish. Keep out of  
lakes, streams, ponds, or public waters. Permits may be required for dis-  
charges containing this pesticide into public waters. For guidance contact the  
regional office of the Environmental Protection Agency.

**SPECIAL PRECAUTIONS**

1. This product has a powerful chlorine odor. Hold away from face when  
opening to avoid breathing fumes.
2. Prolonged contact between this product in its undissolved state and vinyl  
liners or painted surfaces will result in bleaching of the vinyl or paint.  
Introduce this product through the skimmer or in a prescribed feeder to  
avoid discoloration of liner or paint.
3. When adding this product to skimmer or feeder make sure there are no  
other chemicals present as a violent reaction may occur. It is always  
dangerous to mix chemicals.
4. Use this product as directed as per instructions on label. Do not take advice  
from others or experiment by yourself.
5. If this product is used to shock or superchlorinate a pool, after treatment it is  
important to brush walls and floor to expose algae that may be in cracks or  
wrinkles that might protect algae from high chlorine residual. Such pro-  
tected algae will begin to reproduce again when high chlorine residual falls.  
This product, because of its potent formulation, can be dangerous if not  
used properly. Do not mix with any other chemicals. This could result in a  
violent chemical reaction. Do not add water to this product in a closed  
container. Do not add this product to a small amount of water in a pail. When  
adding this product to skimmer make sure pumps are on and water is circu-  
lating so that material is drawn into recirculation system. Do not allow build-  
up of dry material in skimmer as gases generated may cause an explosion.

**SLOW DISSOLVING**

# TABLET

**8 OUNCE 3" DIAMETER**

**ACTIVE INGREDIENT**

Trichloro-s-triazinetrione 99.0%  
Inert ingredient 0.1%  
(provides 89% available chlorine)

**20 TABLETS NET WEIGHT: 10 lbs.**

**KEEP OUT OF REACH OF CHILDREN  
DANGER: SEE FIRST AID STATEMENT  
AND OTHER PRECAUTIONS ON SIDE PANEL**

**DIRECTIONS FOR USE**

1. Adjust water pH to 7.2-7.6 as determined by a test kit.
2. If the pool has not been previously stabilized, add conditioner and stabilizer (cyanuric acid). Follow the directions for use on the label for that product.
3. Place tablets in floating type chlorinator or in the pool skimmer.
4. Add two tablets per 5,000 gallons of pool water to establish a chlorine residual of 1.5 to 2.0 ppm as determined by a test kit. Add more tablets as needed.

Please note: The pH of the slow dissolving tablet is on the acid side and will tend to reduce the pH and alkalinity of the pool water. Proper pH should be maintained at pH 7.2 to 7.6 as determined by a test kit, by periodic additions of sodium carbonate or sodium bicarbonate.

**STORAGE & DISPOSAL:** Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container in open area if possible and flood with large amounts of water. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area.

# STICKS

### DIRECTIONS FOR USE

- 1 Adjust water pH to 7.2-7.6 as determined by a test kit
- 2 If the pool has not been previously stabilized, add conditioner and stabilizer (cyanuric acid). Follow the directions for use on the label for that product
- 3 These sticks are designed to fit into a special feeder. They can also be used in other types of feeders, floating type chlorinators or in a pool skimmer
- 4 To maintain a chlorine residual of 1.5 to 2.0 ppm, add 2 sticks per 5000 gallons of pool water as needed. Follow the feeder directions carefully

Please note: The pH of the slow dissolving stick is on the acid side and will tend to reduce the pH and alkalinity of the pool water. Proper pH should be maintained at pH 7.2 to 7.6 as determined by a test kit, by periodic additions of sodium carbonate or sodium bicarbonate.
