WASHINGTON, D.C. 20460

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

DANGER: Corrosive, causes eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Irritating to nose and throat. Avoid breathing dust. May cause burns to broken skin. Wear goggles or face shield and protective clothing when handling. Wash hands after handling.

FIRST AID (PRACTICAL TREATMENT): If swallowed feed gruel, cooked cereal, or bread soaked in milk, followed by olive oil or cooking oil. In case of personal contact, remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention as soon as possible. Remove and wash contaminated clothing before reuse.

CHEMICAL HAZARDS: Strong oxidizing agent. Do not use moist or damp utensils. Contamination with moisture, dirt, organic matter, or other chemicals, or any foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, ponds, or public waters. Permits may be required for discharges containing this pesticide into public waters. For guidance contact the regional office of the Environmental Protection Agency.

SPECIAL PRECAUTIONS

1. This product has a powerful chlorine odor. Hold away from face when opening to avoid breathing fumes.
2. Prolonged contact between this product in its undissolved state and vinyl liners or painted surfaces will result in bleaching of the vinyl or paint. Introduce this product through the skimmer or in a prescribed feeder to avoid discoloration of liner or paint.
3. When adding this product to skimmer or feeder make sure there are no other chemicals present as a violent reaction may occur. It is always dangerous to mix chemicals.
4. Use this product as directed as per instructions on label. Do not take advice from others or experiment by yourself.
5. If this product is used to shock or superchlorinate a pool, after treatment it is important to brush walls and floor to expose algae that may be in cracks or wrinkles that might protect algae from high chlorine residual. Such protected algae will begin to reproduce again when high chlorine residual falls.
6. This product, because of its potent formulation, can be dangerous if not used properly. Do not mix with any other chemicals. This could result in a violent chemical reaction. Do not add water to this product in a closed container. Do not add this product to a small amount of water in a pail. When adding this product to skimmer make sure pump is on and water is circulating so that material is drawn into recirculation system. Do not allow build-up of dry material in skimmer as gases generated may cause an explosion.

E.P.A. Reg. No. 45898-4
E.P.A. Est. No. 45898-FL-1

GRANULAR-90

STABILIZED CHLORINATING GRANULES

ACTIVE INGREDIENT

Trichloro-s-triazinetriene	99.0%
Inert Ingredient	1.0%
(provides 89% available chlorine)	

NET WEIGHT: 10 lbs.

**KEEP OUT OF REACH OF CHILDREN
DANGER: SEE FIRST AID STATEMENT
AND OTHER PRECAUTIONS ON SIDE PANEL**

DIRECTIONS

When starting up a new pool, superchlorinate and to establish a chlorine residual. Add 1-1 1/2 oz. of this product to provide 6.7-10 ppm available chlorine. Bathers should not be allowed until residual has dropped to 3 ppm chlorine. Add conditioner and stabilizer (cyanuric acid) as labeled, to stabilize the pool.

Granular-90 should be added daily per 1000 gallons of pool water to maintain a residual of 1.5 ppm to 2.0 ppm as determined by test kit. Residual should be maintained between 7.2 and 7.8 ppm over deep end of pool or added to a pail. A shock treatment should be made during cool weather. For Granular-90 per 1000 gallons of available chlorine.

Swimmers should not be permitted until the chlorine residual falls to 3 ppm. Flexibility must be maintained in dust and dirt caused by storms require additional dosages as needed between 1.5 ppm and 2.0 ppm.

STORAGE & DISPOSAL: Keep container closed when not in use. Store in a cool, dry place away from open flame. In case of decompression, if possible, and flood with large amount of water. Rinse empty container material before discarding. Pile in approved landfill area.

get eyes, nose or clothing. Irritating to nose and throat. Avoid breathing dust. May cause burns to broken skin. Wear goggles or face shield and protective clothing when handling. Wash hands after handling.

FIRST AID - PRACTICAL TREATMENT: If swallowed, feed gruel, rice, cereal, or bread soaked in milk, followed by olive oil or cooking oil. In case of personal contact, remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes, get medical attention as soon as possible. Remove and wash contaminated clothing before reuse.

CHEMICAL HAZARDS: Strong oxidizing agent. Do not use moist or damp utensils. Contamination with moisture, dirt, organic matter, or other chemicals or any foreign matter may start a chemical reaction with generation or liberation of hazardous gases, and possible generation of fire.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, ponds, or public waters. Permits may be required for discharges containing this pesticide into public waters. For guidance, contact the regional office of the Environmental Protection Agency.

SPECIAL PRECAUTIONS

1. This product has a powerful chlorine odor. Hold away from face when opening to avoid breathing fumes.
2. Prolonged contact between this product in its undissolved state and vinyl liners or painted surfaces will result in bleaching of the vinyl or paint. Introduce this product through the skimmer or in a prescribed feeder to avoid discoloration of liner or paint.
3. When adding this product to skimmer or feeder, make sure there are no other chemicals present as a violent reaction may occur. It is always dangerous to mix chemicals.
4. Use this product as directed as per instructions on label. Do not take advice from others or experiment by yourself.

This product is used to shock or superchlorinate a pool after treatment with bromine. It flushes walls and floor to expose algae that may be in cracks or wrinkles that might protect algae from high chlorine residual. Such untreated algae will begin to reproduce again when high chlorine residual falls. This product, because of its potent formulation, can be dangerous if not properly diluted with any other chemicals. This could result in a violent chemical reaction. Do not use water in this product in a glass container. Do not add this product to a small amount of water in a pail. When adding this product to skimmer, make sure pump is on and water is circulating so that material is drawn into recirculation system. Do not allow bulk quantity material in skimmer as gases generated may cause an explosion.
