

45898-7

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER** Corrosive; causes eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Irritating to nose and throat. Avoid breathing dust. May cause burns to broken skin. Wear goggles or face shield and protective clothing when handling. Wash hands after handling.

**FIRST AID (PRACTICAL TREATMENT)** If swallowed feed gruel, cooked cereal, or bread soaked in milk, followed by olive oil or cooking oil. In case of personal contact, remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention as soon as possible. Remove and wash contaminated clothing before reuse.

**CHEMICAL HAZARDS** Strong oxidizing agent. Do not use moist or damp utensils. Contamination with moisture, dirt, organic matter, or other chemicals or any foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire.

**ENVIRONMENTAL HAZARDS** This pesticide is toxic to fish. Keep out of lakes, streams, ponds, or public waters. Permits may be required for discharges containing this pesticide into public waters. For guidance, contact the regional office of the Environmental Protection Agency.

**SPECIAL PRECAUTIONS**

1. This product has a powerful chlorine odor. Hold away from face when opening to avoid breathing fumes.
2. Prolonged contact between this product in its undissolved state and vinyl liners or painted surfaces will result in bleaching of the vinyl or paint. Introduce this product through the skimmer or in a prescribed feeder to avoid discoloration of liner or paint.
3. When adding this product to skimmer or feeder make sure there are no other chemicals present as a violent reaction may occur. It is always dangerous to mix chemicals.
4. Use this product as directed as per instructions on label. Do not take advice from others, or experiment by yourself.
5. If this product is used to shock or superchlorinate a pool, after treatment it is important to brush walls and floor to expose algae that may be in cracks or wrinkles that might protect algae from high chlorine residual. Such protected algae will begin to reproduce again when high chlorine residual falls.
6. This product, because of its potent formulation, can be dangerous if not used properly. Do not mix with any other chemicals. This could result in a violent chemical reaction. Do not add water to this product in a closed container. Do not add this product to a small amount of water in a pail. When adding this product to skimmer, make sure pump is on and water is circulating so that material is drawn into recirculation system. Do not allow build up of dry material in skimmer as gases generated may cause an explosion.

E.P.A. Est. No. 45898-FL-1

**SLOW DISSOLVING**

**SMALL**

**TABLETS**

**½ OUNCE      1" DIAMETER**

**ACTIVE INGREDIENT**

Trichloro-s-triazinetriene .....	99.0%
Inert Ingredient .....	1.0%
(provides 89% available chlorine)	

**KEEP OUT OF REACH OF CHILDREN**

**DANGER: SEE FIRST AID STATEMENT AND OTHER PRECAUTIONS ON SIDE PANEL**

**DIRECTIONS**

1. Adjust pool water pH to 7.2-7.6.
2. If pool has not been properly conditioned (cyanuric acid), follow the directions for use of a pool conditioner.
3. Fill chlorinator with tablets. The amount of tablets depends upon the volume of water in the pool. This will require 25 tablets per 10,000 gallons of water, depending on water temperature.
4. Adjust valves on chlorinator to allow water to be served passing through the chlorinator. Increase flow to 2 ppm by increasing valve settings.

Please note: The pH of pool water will tend to be on the acid side and will tend to be low. Proper pH adjustment is as determined by a test kit using sodium bicarbonate or sodium borate.

**STORAGE & DISPOSAL**

When not in use, store in a cool, dry place away from open flame. In case of disaster, if possible, and flood with water. Rinse empty container before discarding material before discarding in an approved landfill area.

**KEEP OUT OF REACH OF CHILDREN**  
**WARNING: SEE FIRST AID STATEMENT**  
**AND OTHER PRECAUTIONS ON SIDE PANEL**

**DIRECTIONS FOR USE**

1. Adjust pool water pH to 7.2-7.6 as determined by a test kit.
2. If pool has not been previously stabilized with stabilizer and Conditioner (cyanuric acid) add the correct dosage. Follow the directions for use on the label for that product.
3. Fill chlorinator with tablets. The rate of solution of the tablets depends upon the volume of water flowing through the chlorinator. Keep chlorine residual in pool above 1 ppm at all times. This will require 25 to 35 tablets per 5000 gallons of pool water, depending on water circulation.
4. Adjust valves on chlorinator so that water flow can be observed passing through. Keep chlorine residuals between 1 and 2 ppm by increasing or decreasing flow with proper valve settings.

Please note: The pH of the slow dissolving tablet is on the acid side and will tend to reduce the pH and alkalinity of the pool water. Proper pH should be maintained at pH 7.2 to 7.6 as determined by a test kit, by periodic additions of sodium carbonate or sodium bicarbonate.

**STORAGE & DISPOSAL:** Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container in open area if possible, and flood with large amounts of water. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area.
