Subject: CSF Amendment – Creation of an Alternative Confidential Statement of
Formula/Label Amendment
Product Name: Super 70
EPA Registration Number: 46043-23
Application Date: 08/04/2020
Action Case Number/Decision Number: 00218123/567911

Dear Ms. Hartman:

The amended label and CSF(s) referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, are acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. Pursuant to 40 CFR 156.10(a)(6) you must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Please note that the record for this product currently contains the following CSF(s):

- Basic CSF dated 01/19/2021
- Alternate CSF 1 dated 01/19/2021

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under FIFRA and is subject to review by the Agency. See FIFRA section 2(p)(2) If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) lists examples of statements EPA may consider false or misleading. In addition,

regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process, FIFRA section 12(a)(1)(B). Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Assurance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Jack Hall by phone at 703-347-8647, or via email at hall.john.j@epa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "D. Fuller", with a long horizontal stroke extending to the right.

Demson Fuller, Product Manager 32
Regulatory Management Branch I
Antimicrobials Division (7510P)
Office of Pesticide Programs

NET WEIGHT _____

FIRST AID	
IF IN EYES:	Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
IF INHALED:	Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth. Call a poison control center or doctor for further treatment advice.
IF ON SKIN OR CLOTHING:	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
IF SWALLOWED:	Have person sip a glass of water if possible. Do not induce vomiting unless told to do so by the Poison Control or doctor. Do not give anything by mouth to an unconscious person. Call poison control center or doctor immediately for treatment advice.
<u>HOTLINE NUMBER</u>	
Have the product container or label with you when calling a poison control center [1-800-222-1222] or doctor, or going for treatment. [You may also contact [1-800-255-3924] for emergency treatment.]	
<u>NOTE TO PHYSICIAN:</u>	
Probable mucosal damage may contraindicate the use of gastric lavage.	

PRECAUTIONARY STATEMENTS**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

DANGER. Corrosive. Causes irreversible eye damage. Causes skin burns. Do not get in eyes, on skin or on clothing. Wear goggles, face shield, or safety glasses. Wear protective clothing, rubber gloves and shoes with socks. Harmful if swallowed or absorbed through skin. Wash thoroughly with soap and water after handling, and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse.

PHYSICAL OR CHEMICAL HAZARDS

DANGER. Strong oxidizing agent. Use only clean, dry utensils. Add only into water. Contamination with moisture, dirt, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible fire and/or explosion. Avoid any contact with flaming or burning material. Do not use this product in any chlorinating device which has been used with any product other than trichloro-s-triazinetrione tablets or sticks as the active ingredient. Such use may cause fire or explosion.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This product is ~~designed to dissolve slowly, providing~~ provides a steady source of available chlorine in swimming pools to control the growth of algae, kill bacteria and destroy organic contaminants.

1. Adjust pH to 7.2-7.6.
2. If pool has not been properly stabilized, use a [stabilizer] [cyanuric acid product]. Follow directions for use on stabilizer label.
3. Use Method of Application instructions below to find the method best for your pool.

METHOD OF APPLICATION:

~~Only for use in a floating dispenser or automatic chlorinator or feeder designed for this product or place in~~ skimmer. Use in a new chlorinating device or any device which has previously contained only this product or whose active ingredient is trichloro-s-triazinetrione. If placed in the skimmer, run the pump a minimum of eight [6] [six] hours daily. **DO NOT:** Reuse floaters or feeders from other dry chlorinating products. **DO NOT:** Throw tablets directly into pool. **DO NOT:** Permit tablets to contact plastic pool linings or metal objects. **DO NOT:** Use with any other tablets or sticks in the same skimmer, floater, or feeder. **DO NOT:** Use in any chlorinating device which has been used with other chlorinating compounds. **DO NOT: Use in an automatic chlorinator or feeder.**

[WATER BALANCE:

To provide optimum product performance, swimmer comfort and crystal clear water, always maintain pH from 7.2 to 7.8, total alkalinity from 90 to 125 parts per million (ppm) and calcium hardness above 200 ppm. Test frequently using a reliable test kit that measures all these ranges. Make any necessary adjustments promptly with the appropriate [Suncoast] products.]

ROUTINE CHLORINATION:

~~Add one tablet per 10,000 gallons~~ Add [3] [three] tablets for every 8,000 gallons of pool water every week or as often as needed to maintain chlorine residual at 2 1 to 4 3 ppm. Follow "Method of Application". This dosage may vary depending upon bather load, water temperature and other conditions. Pool should not be entered until the chlorine residual is 1 to 3 ppm as measured with a reliable test kit. **Re-entry into treated swimming pools is prohibited above levels of 3 ppm of chlorine.**

As a preventative treatment, add [1] [one] tablet per 8,000 gallons daily or as needed to maintain a minimum chlorine residual of 1 – 3 ppm. You should shock treat your pool once per week to prevent pool problems. In addition to weekly shock treatment, you should shock treat to remedy problems which may occur when bathing loads are high, water appears hazy or dull, unpleasant odors or eye irritation occur, after heavy wind and rainstorms, or if algae does develop with resulting green color and slimy feeling. This product reduces the need for additional pH balancing chemicals; however, pH should be re-established if it falls below optimal levels.

[SHOCK TREATMENT:

Adjust pH to 7.2 to 7.4 [with Suncoast pH Plus or Suncoast pH Minus] per label directions. Shock treat weekly with a [Suncoast] shocking product to kill bacteria, control algae, burn out organic material and to keep water sparkling clear. Follow label directions.]

[ALGAE CONTROL:

If pool surface develops algae or feels slippery, follow shock treatment directions. Immediately after shock treatment, thoroughly clean pool by scrubbing surface of algae growth, vacuum and cycle through filter. If necessary, repeat the procedure. Pool should not be entered until the chlorine residual is 1 to 3 ppm.]

[OPENING YOUR POOL:

Balance pool water, shock treat, and stabilize your pool using [Suncoast Conditioner]. Then follow “Routine Chlorination” directions.]

STORAGE AND DISPOSAL

{For nonrefillable containers – household/residential use}

[Do not contaminate water, food or feed by storage or disposal. Keep product dry in a tightly closed original container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flames.

Nonrefillable container. Do not reuse or refill this container. Triple rinse empty container thoroughly with water prior to disposal. Offer for recycling, if available. If partly filled, call your local solid waste agency or 1-800-CLEANUP (800-253-2687) for disposal instructions. Never place unused product down any indoor or outdoor drain.]

{Nonrefillable container – non-household/residential use}

[Do not contaminate water, food or feed by storage or disposal. Keep product dry in a tightly closed original container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flames.

Nonrefillable container. Do not reuse or refill this container. Triple rinse empty container thoroughly with water prior to disposal. Offer for recycling, if available. If partly filled, call your local solid waste agency or 1-800-CLEANUP (800-253-2687) for disposal instructions. Never place unused product down any indoor or outdoor drain.

Always store pesticides in the original container. If a leaky container must be contained within another, mark the outer container to identify the contents.

Pesticide wastes may be hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for Guidance.]

ENVIRONMENTAL HAZARD

{For containers 50 lbs. and under:} This pesticide is toxic to fish and aquatic organisms.

{For containers over 50 lbs.:} This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, ponds, streams, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

**[TO DETERMINE YOUR POOL CAPACITY IN U.S. GALLONS,
USE THE APPROPRIATE FORMULA BELOW (Use measurements in feet only.)**

RECTANGULAR:

Length x Width x Average Depth x 7.5 = Total Gallons

ROUND:

Diameter x Diameter x Average Depth x 5.9 = Total Gallons

OVAL:

Maximum Length x Maximum Width x Average Depth x 5.9 = Total Gallons

FREEFORM:

Surface Area (square feet) x Average Depth x 7.5 – Total Gallons]
