Clearwater, FL 33760

Subject: Complete 4-In-One Multi-Purpose Sanitizer
EPA Reg. No. 46043-30
Application Date: January 16, 2014
Receipt Date: January 23, 2014

Dear Ms. Kollen:

This acknowledges receipt of your notification, submitted under the provision of PR Notice 98-10, FIFRA section 3(c)9.

Proposed Notification:

Alternate Brand Name

- Pool Basics 3" Multi-Purpose Tabs
- Pool Basics 1" Multi-Purpose Tabs

General Comments:

Based on a review of the material submitted, the following comment applies:

The notification application is acceptable and a copy has been inserted in your file for future reference.

Should you have any questions or comments concerning this letter, please contact me at Henson.Wanda@epa.gov or call (703) 308-6345.

Sincerely,

Wanda Y. Henson (Team 32)
Environmental Protection Specialist
Regulatory Management Branch II
Antimicrobials Division (7510P)

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: Corrosive: Causes irreversible eye damage and skin burns. Harmful if swallowed or absorbed through skin. May be fatal if inhaled. Do not breathe dust or fumes. Irritating to nose and throat. Do not get in eyes, on skin or on clothing. Wear goggles or face shield. Wear coveralls worn over long-sleeved shirt and pants, socks, chemical resistant gloves and chemical resistant footwear. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using restroom. Remove and wash contaminated clothing before reuse.

POOL SANITIZATION WITH 3 INCH TABLETS

For use in feeders or floaters - kills bacteria and controls algae, clarifies, prevents metal staining and corrosion, and reduces scale formation.

IMPORTANT NOTES:

1. Shock your pool every week and also after heavy rain or heavy use to help keep your pool water properly maintained.
2. Sunlight, rainfall, temperature, number of swimmers and frequency of pool use affect the rate of chlorine residual loss. Adjust cleaning and chemical maintenance accordingly.
3. Use this product in an automatic feeder or floater designed for this product.
4. Do not add other chemicals into the feeder or floater where this product is in use as a fire or explosion may occur.
5. To avoid damage to pool surface or materials do not allow product to come in direct contact with these materials. Do not throw tablets directly into pool.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in any manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

BEFORE YOU BEGIN:

1. Ensure all pool equipment is working properly. Adjust stabilizer levels to 40-100 ppm with stabilizer.
2. Test the water's pH, alkalinity, and calcium hardness and adjust to the correct level. Adjust pH to 7.4 - 7.6. Be sure to follow label directions when using other products as outlined in directions for this product.
3. Check the free available chlorine level and adjust to 2-4 ppm by adding a granular chlorinating product.

START-UP/INITIAL TREATMENT:

1. If water is cloudy or green, superchlorinate pool with appropriate shock product until pool is clear.
2. Add 16 ounces of this product (two tablets) per 10,000 gallons of pool water to feeder or floater and then test for the free available chlorine level (allow water to circulate at least 4 hours before testing). Adjust the feeder or floater following manufacturer's instructions to establish a free available chlorine level between 2-4 ppm.
3. When free available chlorine level is adjusted to 2-4 ppm, add an algaecide appropriate to your needs.

ROUTINE MAINTENANCE:

Add 16 ounces of this product per 10,000 gallons of pool water per week, or as often as needed, to the feeder or floater to maintain a constant free available chlorine level of 2-4 ppm. Sunlight, rainfall, temperature, number of swimmers and frequency of pool use affect the rate of chlorine residual loss so check the feeder or floater often and refill as needed.

Reentry into treated swimming pools is prohibited when free available chlorine levels are above 3 ppm due to risk of bodily injury.

STORAGE AND DISPOSAL:

Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. Moisture may decompose this product and cause a violent reaction leading to fire and explosion. In case of decomposition, isolate container if possible and flood area with large amounts of water to dissolve any material before discarding this container. Do not contaminate food or feed by storage or disposal.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Clean container promptly after emptying. Rinse thoroughly before recycling or placing in trash.

FIRST AID

IF IN EYES:	Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
IF ON SKIN OR CLOTHING:	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
IF SWALLOWED:	Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or a doctor. Do not give anything by mouth to an unconscious person.
IF INHALED:	Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.
	HOTLINE NUMBER: Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-255-3924 for emergency medical information.
	NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

PHYSICAL OR CHEMICAL HAZARDS: CONTAINS A STRONG OXIDIZING AGENT. Do not mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. When using automatic feeding devices, always follow manufacturer's directions as to the proper addition of sanitizer product to chlorinators. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

NOTE: Buyer assumes all responsibility for safety and use not in accordance with directions.

BEFORE YOU BEGIN:

1. Ensure all pool equipment is working properly. Adjust stabilizer levels to 40-100 ppm with stabilizer. 2. Test the water's pH, alkalinity, and calcium hardness and adjust to the correct level. Adjust pH to 7.4-7.6. Be sure to follow label directions when using other products as outlined in directions for this product. 3. Check the free available chlorine level and adjust to 2-4 ppm by adding a granular chlorinating product.

POOL SANITIZATION WITH 1" TABLETS

For use in feeders and floaters - kills bacteria and controls algae, clarifies, prevents metal staining and corrosion, and reduces scale formation.

IMPORTANT NOTES:

1. Shock your pool every week and also after heavy rain or heavy use to help keep your pool water properly maintained. 2. Sunlight, temperature, number of swimmers, and frequency of pool use affect the rate of chlorine residual loss. Adjust chlorine levels accordingly. 3. Use this product in an automatic feeder or floater designed for this product. 4. Do not add other chemicals to the feeder or floater where this product is in use as a fire or explosion may occur. 5. To avoid damage to pool surfaces or materials do not allow product to come in direct contact with pool surfaces. Do not throw tablets directly into the pool.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in any manner inconsistent with its labeling, head onto a label and use strictly in accordance with precautionary statements and directions.

START-UP/INITIAL TREATMENT:

1. If water is cloudy or green, superchlorinate pool with appropriate shock product until pool is clear. 2. Add 16 ounces of this product (approximately 20 tablets) per 10,000 gallons of pool water to feeder or floater and then test for the free available chlorine level (follow meter to circulate at least 4 hours before testing). Adjust the feeder or floater following manufacturer's instructions to establish a free available chlorine level between 2-4 ppm. 3. When free available chlorine level is adjusted to 2-4 ppm, add appropriate appropriate to your needs.

ROUTINE MAINTENANCE:

Add 16 ounces of this product per 10,000 gallons of pool water per week, or as often as needed, to the feeder or floater to maintain a constant free available chlorine level of 2-4 ppm. Sunlight, rainfall, temperature, number of swimmers, and frequency of pool use affect the rate of chlorine residual loss so check the feeder or floater often and refill as needed.

Reentry into treated swimming pools is prohibited when free available chlorine levels are above 3 ppm due to risk of bodily injury.

POOL SANITIZATION WITH DISPOSABLE FLOATER

This disposable floatable dispenser sanitizes the water and then floats on its side when empty. The sanitizer kills bacteria and controls algae, clarifies, prevents metal staining and corrosion, and reduces scale formation.

IMPORTANT NOTES:

1. When using other products, as outlined in directions of this product, always follow label direction for those products.
2. Shock your pool every week and also after heavy rain or heavy use to help keep your pool water properly maintained.
3. Sunlight, temperature, number of swimmers, and frequency of pool use affect the rate of chlorine residual loss. Adjust chlorine levels accordingly. 4. Do not add other chemicals to the feeder or floater where this product is in use as a fire or explosion may occur. 5. To avoid damage to pool surfaces or materials do not allow product to come in direct contact with pool surfaces. Do not throw tablets directly into the pool.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in any manner inconsistent with its labeling, resulting in a violent explosion. 6. Do not attempt to refill this product.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in any manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

START-UP/INITIAL TREATMENT:

1. If water is cloudy or green, superchlorinate pool with appropriate shock product until pool is clear. 2. Floater is marked in five thousand gallon increments representing 5,000 to 40,000 gallons. To use, cut off all floater nuts on both sides of cartridge up to and including the one corresponding to your pool's size. If pool is between sizes marked, open the next up higher nuts. Use a sharp knife and cut in direction away from your body and limbs. Make certain holes are wide open to allow water to flow through freely. 3. Place floater with open holes in center of the pool. After 24 hours check residual chlorine level with a test kit. If residual chlorine level is below 2.0 ppm cut off one additional nut until chlorine stabilizes at 2-4 ppm. If the residual chlorine is too high, seal one set of holes with waterproof tape. 4. When ready for replacement, this product will float on its side.

REENTRY INTO TREATED SWIMMING POOLS: This product is toxic to fish and aquatic organisms. Reentry into treated swimming pools is prohibited when free available chlorine levels are above 3 ppm due to risk of bodily injury.
