**PRECAUTIONARY STATEMENTS
 HAZARDS TO HUMANS
 AND DOMESTIC ANIMALS**

DANGER: Corrosive. May cause severe skin irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until odors have dissipated.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams or ponds. Treated effluent may not be discharged into lakes, streams, ponds or public waters without a valid discharge permit. For guidance, contact the regional office of the Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS:
STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with gross filth such as feces, urine, etc., or with ammonia, acids, detergents or other chemicals may release hazardous gases irritating to eyes, lungs and mucous membranes.

**"FOR SWIMMING POOL CHLORINATION
 AND SANITIZING."**

ACTIVE INGREDIENT
 SODIUM HYPOCHLORITE 9.2%
 INERT INGREDIENTS 90.8%

**KEEP OUT OF REACH OF CHILDREN
 DANGER**

FIRST AID: If on skin, wash with plenty of soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of milk or gelatin solution or, if these are not available, drink large quantities of water. Do NOT give vinegar or other acids. Do NOT induce vomiting. Get prompt medical attention.

See additional precautions on side panel.

**DIRECTIONS FOR USE
 GENERAL CLASSIFICATION**

**IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT
 IN A MANNER INCONSISTENT WITH ITS LABELING**

DIRECTIONS FOR SWIMMING POOL CHLORINATION

For new pools or for spring start-up, superchlorinate with one-half pint (16 fluid ounces) of this sodium hypochlorite solution for each 2500 gallons of water. This dosage is equivalent to 5 ppm available chlorine by weight.

- For Pool Maintenance:**
- A. Adjust pool water pH to 7.6 to 7.8 range and maintain.
 - B. Add manually only, a feeder device with this sodium hypochlorite solution at a rate to maintain an available chlorine residual of 0.6 to 1.0 ppm. One-half pint (16 fluid ounces) of this sodium hypochlorite solution for each 6000 gallons of water will provide 1.0 ppm available chlorine by weight. Frequency of additions to maintain 0.6 to 1.0 ppm available chlorine will depend upon temperature and number of swimmers. Use a test kit to make certain the pH and chlorine residual are in the proper range.

**DIRECTIONS FOR DISINFECTION OF POTABLE WATER
 FOR HOME WELL WATER SYSTEMS**

Disinfect this sodium hypochlorite solution in the ratio of one part sodium hypochlorite solution to 9 parts filtered water. Mix sodium hypochlorite solution and water thoroughly and begin feeding of solution with a hypochlorinator (metering pump). Maintain a free available chlorine residual of at least 0.2 ppm and no more than 0.6 ppm throughout the distribution system, as determined by a DPD chlorine test kit. Bacteria will be killed in the system at a higher residual than that prescribed by the test kit. The test kit is available from Water Regulation Service, Water Treatment and Control Association, 1000 North 17th Street, Arlington, VA 22209.

DIRECTIONS FOR SANITIZING FOOD PROCESSING OR DAIRY EQUIPMENT: Sanitize equipment in the same manner just before using in sealed surfaces thoroughly with this sodium hypochlorite solution containing 200 ppm available chlorine. Maintain contact with disinfectant for a minimum of two minutes. Do not rinse with water after treatment with sodium hypochlorite solution. Do not soak overnight. Addition of 1.0 pint (32 fluid ounces) of this sodium hypochlorite solution per 4 gallons of water will provide approximately 200 ppm available chlorine by weight.

NOTE: This solution should be tested with a DPD test kit and increase dosage if necessary to maintain a residual of 0.2 ppm available chlorine.

STORAGE AND DISPOSAL:

Store in a cool, dry area away from sunlight. In case of spill, flood area with large quantities of water. Rise spill with a garden hose with water and either return to manufacturer or discard. Do not flush into sewer. Do not use in approved and/or prohibited areas. Do not use in areas where water and disposal in a sanitary sewer. Do not use in areas where it may cause damage to cleaning equipment.
