**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS**

DANGER: Corrosive. May cause severe skin irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until odors have dissipated.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams or ponds. Treated effluent may not be discharged into lakes, streams, ponds or public waters without a valid discharge permit. For guidance, contact the regional office of the Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS:

STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with g.c.s.s. filth such as feces, urine, etc. or with ammonia, acids, detergents or other chemicals may release hazardous gases irritating to eyes, lungs and mucous membranes.

SPARKLE KLEAR

**"FOR SWIMMING POOL CHLORINATION
AND SANITIZING."**

ACTIVE INGREDIENT
SODIUM HYPOCHLORITE 12.5%
INERT INGREDIENTS 87.5%

**KEEP OUT OF REACH OF CHILDREN
DANGER**

FIRST AID: If on skin, wash with plenty of soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of milk or gelatin solution or, if these are not available, drink large quantities of water. Do NOT give vinegar or other acids. Do NOT induce vomiting. Get prompt medical attention.

See additional precautions on side panel

**DIRECTIONS FOR USE
GENERAL CLASSIFICATION**

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

DIRECTIONS FOR SWIMMING POOL CHLORINATION

For a new pool or for spring start-up, superchlorinate with one (1) pound of sodium hypochlorite solution for each 3000 gallons of water. This is equivalent to 5 ppm available chlorine by weight.

- A. Pool Maintenance
 - 1. Adjust pool water pH to 7.6 - 7.7 range and maintain.
 - 2. Add manually or by a feeder device this sodium hypochlorite solution to maintain an available chlorine residual of 1.0 to 1.5 ppm. One ounce of this sodium hypochlorite solution for each 4000 gallons of water provides 1.0 ppm available chlorine by weight. Frequency of addition will depend on temperature and pool size. Test daily to make certain the pH and chlorine residual are in range.

DIRECTIONS FOR DISINFECTION OF POTABLE WATER SYSTEMS

1. Use this sodium hypochlorite solution at the rate of one part to 100 parts of softened water. Mix sodium hypochlorite solution thoroughly and begin feeding of solution with a hypochlorinator. Maintain a free available chlorine residual of at least 0.2 ppm and monitor throughout the distribution system as determined by a DPD chlorine residual sampling must be conducted at a frequency no less than that required by the National Interim Primary Drinking Water Regulations. Check with a DPD chlorine test kit.

Contact your local Health Department for further details.

DIRECTIONS FOR SANITIZING FOOD PROCESSING OR DAIRY EQUIPMENT

Clean equipment in the normal manner. Just before using, rinse thoroughly with this sodium hypochlorite solution containing 200 ppm available chlorine. Contact with this disinfectant for a minimum of two minutes. Do not use after treatment with sodium hypochlorite solution. Do not soak. Use one fluid ounce (2.835 g) of this sodium hypochlorite solution per gallon of water to provide approximately 200 ppm available chlorine by weight. NOTE: This product degrades with age. Use a chlorine test kit as necessary to obtain the required level of available chlorine.

STORAGE AND DISPOSAL: Store in a cool, dry place, away from direct sunlight. In case of spill, flood area with large quantity of water and either return to manufacturer or dispose of by placing in trash collection or burying in an approved landfill. Product cannot be used, should be diluted with water and disposed of in a way that will not contaminate food or feed by storage, disposal or cleaning of equipment.

GENERAL CLASSIFICATION**

**IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT
IN A MANNER INCONSISTENT WITH ITS LABELING**

DIRECTIONS FOR SWIMMING POOL CHLORINATION

For a new pool or for spring start-up, superchlorinate with one (1) pound (16 fl. oz.) of sodium hypochlorite solution for each 1000 gallons of water. This dosage is equivalent to 5 ppm available chlorine by weight.

- 1. Pool Maintenance
 - A. Adjust pool water pH to 7.2 to 7.6 range and maintain.
 - B. Add manually or by a feeder device with this sodium hypochlorite solution at a rate to maintain an available chlorine level of 1.0 to 1.5 ppm in the pool water. If the pH is above 7.6, add 1/2 ounce of this sodium hypochlorite solution for each 4000 gallons of water. If the pH is below 7.2, add 1/2 ounce of this sodium hypochlorite solution for each 4000 gallons of water. If the pH is between 7.2 and 7.6, add 1/4 ounce of this sodium hypochlorite solution for each 4000 gallons of water.

**DIRECTIONS FOR DISINFECTION OF POTABLE WATER
FOR HOME WELL WATER SYSTEMS**

For a well water system, add one (1) ounce of this sodium hypochlorite solution to 10 gallons of water. Mix thoroughly and allow to stand for 30 minutes. Then flush the system with water until a free available chlorine residual of at least 2 ppm and no more than 5 ppm is achieved throughout the distribution system as determined by a DPD color test kit. After flushing, sampling must be done at a frequency no less than that prescribed by the National Interim Primary Drinking Water Regulations. Check water frequently with a DPD color test kit. Contact your local Health Department for further details.

**DIRECTIONS FOR SANITIZING FOOD PROCESSING
OR DAIRY EQUIPMENT**

Clean equipment in the normal manner. Just before using, rinse all surfaces thoroughly with this sodium hypochlorite solution containing 200 ppm available chlorine. Maintain contact with this disinfectant for a minimum of two minutes. Then rinse with water after treatment with sodium hypochlorite solution. Do not soak overnight. Add from one to two ounces of this sodium hypochlorite solution per 5 gallons of water. This will provide approximately 200 ppm available chlorine by weight.

NOTE: This product degrades with age. Use a chlorine test kit and increase dosage as necessary to obtain the required level of available chlorine.

STORAGE AND DISPOSAL: Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in trash container or burying in an approved landfill. Product or residue that cannot be used, should be diluted with water and disposed of in a sanitary sewer. Do not contaminate food or feed by storage or disposal or cleaning of equipment.
