Ms. Ronnie Amburgey
International Spike, Inc.
817 E. Third Street
Lexington, KY 40505

Dear Ms. Amburgey:

Subject: Reregistration of Products Containing Disulfoton
Fertilizer/Insecticide Spikes for Roses
EPA Registration No. 46260-2
Fertilizer/Insecticide Spikes for Young Trees
EPA Registration No. 46260-10
Fertilizer/Insecticide Spikes for Evergreen Shrubs
EPA Registration No. 46260-11
Fertilizer/Insecticide Spikes for Beautiful Trees
EPA Registration No. 46260-12
Fertilizer/Insecticide Spikes for Evergreen Trees
EPA Registration No. 46260-13
Fertilizer/Insecticide Spikes for Flowering Shrubs
EPA Registration No. 46260-14
Your Applications Dated June 19, July 23, and
August 7, 1986 and May 15, 1987

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable provided that you make the labeling changes indicated below prior to release for shipment of product bearing the amended labeling.

1. Change the Note To Physician to read as follows:

Note to Physician: Disulfoton is an organophosphate insecticide. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal. 2-PAM is also antidotal and may be administered, but only in conjunction with atropine.

2. Update the Environmental Hazards by changing "by cleaning of equipment or disposal of wastes" to "when disposing of equipment wash waters."

3. Make the following changes on the labels ingredients statements:

a) The word "Disulfoton" should precede the chemical name.

b) Delete "(By Weight)"

Richards

c) Change "Active Ingredients" to the singular.

d) The word "Total" should precede "100%."

The following comments deal with the chemistry of the products.

1. Provide the upper and lower certified limits based on the pure active ingredient rather than the technical or concentrate. Note that the lower limit of the active must not fall below the label claim.

2. The upper and lower certified limits are listed in the wrong columns.

3. Re-calculate the percent by weight values. There are several errors based on the amounts of each component divided by the total batch weight.

Submit five (5) copies of your final printed labeling before you release the product for shipment.

A stamped copy of the labeling is enclosed for your records.

Sincerely,

George T. LaRocca
Product Manager (15)
Insecticide/Rodenticide Branch
Registration Division (H7505C)

**Jobe's**
Spikes

APR 8 1991
under the Federal Insecticide, Fungicide, and Rodenticide Act, for the pesticide registered under EPA Reg. No. 46260-10

46260-10

**Jobe's**

**Insecticide/Fertilizer
for Newly Planted**

Guaranteed Fertilizer Analysis

Total Nitrogen (N)*
17% Ammoniacal Nitrogen
Available Phosphoric Acid (P₂O₅)†
Soluble Potash (K₂O)‡
Derived from Ammonium Sulfate, Calcium Phosphate, Potassium Chloride. Contains more than 45% included slow release available phosphorus and 45% included slow release available potassium.

Jobe's® Insecticide/Fertilizer Spikes protect your newly planted trees with a special nutrient formula designed to help them look their best. Jobe's is absorbed by the roots and circulated throughout the tree to control Aphids, Leaf Miners, Leaf Hoppers, Whiteflies, Pine Tip Moths, Lace Bugs, and Phosphorus for root growth and Potassium for disease-resistance sprays which are applied to the foliage. Jobe's Spikes work at the roots. Spikes for newly planted trees are recommended for use at time of planting. Use Jobe's 12-6-4 Insecticide Fertilizer Spikes for Beautiful Trees.

• Protects against insects and feeds your trees
