

- a. Either clarify the statement "Inks provide storage area for trapping foreign materials in water" or delete it.
- b. The complete product name should be used wherever reference is made to the name.
- c. Include a statement on the labeling to indicate that hot water should not be run through this unit.
- d. The EPA Establishment Number must be included on the label where it is indicated.
- e. Include the company's address on the label.

Submitted silver release data for this model indicate that silver release did not exceed 50 ppb in accordance with Interim Requirements and are acceptable.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely,

John P. Lee
Product Manager (31)
Disinfectants Branch
Registration Division (15-767c)

FINE SPRING BACTERIOSTATIC WATER FILTER
Over Sink Unit, Model OS-1

ACTIVE INGREDIENT:1.05
Metallic Silver98.95
INERT INGREDIENT:

KEEP OUT OF REACH OF CHILDREN
CAUTION

EPA REG. NO. 46375-3
EPA EST. NO. 46379-AZ-1

DISPOSAL: Wrap spent filter in newspaper and discard with trash.

CONTENTS: One Bacteriostatic Water Filter.

For additional information and directions, see enclosed circular and information and installation instructions.

This filter is only to be used in conjunction with municipally treated tap water in the home.

Fine Spring Bacteriostatic Water Filter
Over Sink Unit, Model OS-1

DIRECTIONS FOR USE
General Classification

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Once a unit has been installed as per instructions, it should be maintenance free and no filter cartridges to replace.

This unit has a capacity of up to 3,000 gallons. It is capable of treating 3.0 gallons of cold tap water daily for a period of 36 months. Towards the end of the 36 months (3 years), you will notice a diminishing water flow. This will indicate the filter is nearing the end of its useful life.

This unit should be used with cold water only. The flow rate has been preset at the factory not to exceed 1/2 gallon per minute.

Installation

Remove aerator from faucet. Screw on diverter attachment. If the aerator supplied does not fit, different sizes are available at hardware stores. The diverter valve button is used to select filtered water or regular tap water. Run water through the filter for 20 minutes after installation to activate.

How it Works!

1. Ends provide storage area for trapping foreign material in water. When reduced water flow, reverse the cartridge and back flush the unwanted down the drain.
2. Two porous fibers inside the cartridge removes suspended solids as small as 20 micrometers.
3. SIXTY THREE (63) inches of EPA approved compressed activated carbon filter media provide bacteriostatic activity within the cartridge. Activated carbon removes chlorine taste and odors from your water including the medicinal taste of chloroform.
4. The 3" diameter PVC plastic case when welded together, makes a strong compact 3" x 10" long filter cartridge unit completely sealed.

FINE SPRING BACTERIOSTATIC WATER FILTER

A Bacteriostatic Water Filter is one which inhibits the growth of bacteria within the filter.

Drinking water can, by law, contain a number of harmless bacteria indigenous to municipally treated water.

Fine Spring Bacteriostatic Water Filter uses micron filters and HYgene material in all filters. The HYgene material is an Environmental Protection Agency Registered Bacteriostatic Water Filter Medium. Technically, HYgene is a silver-impregnated granular activated carbon.

Fine Spring Bacteriostatic Water Filter improves the water quality of most municipally treated water. It will remove the chlorine taste, odor, and color and thus provide you and your family with clear, good-tasting water for drinking or cooking.

Fine Spring Bacteriostatic Water Filter takes only minutes to install. There are no filters to change.

We will be happy to have a Free home demonstration of Fine Spring Bacteriostatic Water Filter in your home.

Write or call for a Free Demonstration.
