

SUPER K-GRO Ready-To-Use Systemic Weed & Grass Killer

**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS & DOMESTIC ANIMALS  
CAUTION**

Keep children and pets off treated areas until spray is thoroughly dry. Avoid contact with eyes. Immediately flush eyes with water for 15 minutes if contact with spray. If irritation persists, seek medical attention. Do not contaminate food, clothing or feed.

**ENVIRONMENTAL HAZARDS**

Do not apply directly to water or wetlands. Do not contaminate water by cleaning of equipment or disposal of wastes.

**DIRECTIONS FOR USE:** It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS.

**HOW TO USE:** Ready-To-Use Systemic Weed & Grass Killer is a non-selective herbicide that kills undesirable vegetation on contact. With the convenient trigger sprayer aimed at weed and away from face, spray unwanted weeds and grasses until plant surface is wet. Spray just enough to wet plant. Do not saturate. One application should kill most weeds listed. Hard to control perennial weeds such as Canada Thistle, Barnyardgrass, Poison Ivy, Poinsettia, Spiny, or Broad-leaved may require more than one application. If not completely dead within 4 weeks, do not cut treated vegetation for at least 7 days after treatment. Treated areas in lawns may be reseeded 7 days after application.

SEE ATTACHED PAMPHLET FOR COMPLETE DIRECTIONS FOR USE.

**ATTENTION:** Ready-To-Use Systemic Weed & Grass Killer is a non-selective soil-emergent herbicide that kills on contact. When the spray comes in contact with the green foliage, it will travel through the stem to the roots, including roots in all soil parts. This spray is non-selective and can kill all vegetation contacted. Apply when air is calm to avoid spray from drifting to desirable vegetation. Do not apply if rain is expected within 24 hours of application as effectiveness will be reduced. If desirable foliage is sprayed, immediately wash off with water.

When using sprayer for the first time, fill upward so that trapped air can escape freely.

**STORAGE & DISPOSAL**

Protect from freezing. When empty container is dry, wrap container and put in trash collection. Avoid contamination of food or feed.

**NOTICE:** Buyer assumes all responsibility for safety and use not in accordance with directions.

**DIRECTIONS FOR USE:**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**READ ENTIRE LABEL AND PAMPHLET. USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS.**

**CONTROLS:** Annual Bluegrass, Bahiagrass, Bermudagrass, Bentgrass, Black Medic, Bluegrass, Blue Toadflax, Brassbuttons, Bromegrass, Broadleaf Plantain, Brownseed Paspalum, Bull Thistle, Bur Clover, Canada Thistle, Centipedegrass, Clover, Common Fiddleneck, Common Ragweed, Chickweed, Creeping Beggarweed, Creeping Charlie, Creeping Lantana, Common Mullein, Common Plantain, Common Groundsel, Cudweed, Curly Dock, Dandelion, Dog Fennel, Diffuse Lovegrass, Evening Primrose, Field Bindweed (Wild Morningglory), False Dandelion, Fescue, Filaree, Florida Pusley, Garden Spurge, Gorsegrass, Green Foxtail, Hypericum, Hairy Crabgrass, Henbit, Honeysuckle, Hemp Dogbane, Johnsongrass, Kentucky Bluegrass, Knotweed, Kudzu, Large Crabgrass, Lambsquarters, London Rocket, Mayweed, Nimbwill, Nutgrass (Nutsedge), Orchardgrass, Oxalis, Palsan Ivy, Palsan Oak, Prickly Lettuce, Prostrate Knotweed, Prostrate Pigweed, Purslane, Puncture Vine, Quackgrass, Ragweed, Red Dead Nettle, Redroot Pigweed, Sandspur, Shepherdspurse, Sowthistle, Smartweed, Smooth Crabgrass, Spurge, St. Augustinegrass, Tall Fescue, Tall Thistle (Field Thistle), Torpedograss, Trumpet Creeper, Sour Dock, Velvetweed, Virginia Creeper, Wild Geranium, Wild Blackberry, Wild Carrot, Yellow Oxalis, Zoysiagrass.

Kills tough weeds and grasses in walks, driveways, gravel or bark ground mulch, flower beds, lawns, or around trees and shrubs. Ready to Use Systemic Weed & Grass Killer is easy to use for spot treatment of single weeds or application to specific areas. The formulation moves systemically through all parts of the plant,

killing leaves and stems down to the roots. Usually within one week wilting will occur on most weeds, with complete kill developing in 2 to 4 weeks.

**HOW TO APPLY:**

Ready to Use Weed & Grass Killer is non-selective and can kill all vegetation contacted. Use hand trigger applicator so that the spray covers the area occupied by unwanted weeds or grasses. Sprayer nozzle should be aimed at weed and away from face. Stand 1 to 2 feet away from plant to be treated and allow a coarse spray to be emitted on the center of undesired plant. Spray enough to wet plant, but do not saturate. One application should kill most weeds listed. One or two mowings should be skipped before spot treating lawns. Treated areas in lawns can be reseeded 7 days after application.

**FOR HARD TO CONTROL WEEDS & VINES,** such as Canada Thistle, Bermudagrass, Poison Ivy, Poison Oak, Kudzu, or Field Bindweed may require more than one application if not completely controlled within 4 weeks.

**ATTENTION:** Ready to Use Systemic Weed & Grass Killer is a contact herbicide that can completely kill all green foliage tissue. When spraying be careful not to accidentally spray desirable plants as they will also be killed. Apply only when air is calm to avoid spray hitting desirable plants. If desirable foliage is sprayed immediately wash off with water. Do not use when rain is expected within 24 hours as effectiveness will be reduced.

When using sprayer for first time, tilt upward so that trapped spray escapes from system.

**DIRECTIONS FOR PREPARING REFILL**

**TO REFILL:** Use empty container to mix the new solution. Add 1 part Systemic Weed & Grass Killer to 4 parts clean tap water to make the 0.96% solution. For example, Add 16 oz. of water to 4 oz. of the product. Follow directions for use above and on label.
