ENVIRONMENTAL HAZARDS

This product kills grasses & weeds systemically. The spray mist is absorbed by the leaves and moves throughout the stems and roots to kill the entire plant. Regrowth from the roots is prevented. This product is a non-selective, post-emergent herbicide that kills undesirable vegetation including: Bahiagrass, Bermudagrass, Bindweed (Wild Morningglory), Bluegrass, Canada Thistle, Clover, Crabgrass, Dallisgrass, Dandelion, Dock, Fescue, Johnsongrass, Kudzu, Lambsquarter, Nutgrass, Orchardgrass, Poison Ivy, Poison Oak, Quackgrass, Ragweed, Sandbar

and others. This product is not recommended for spot treatment in lawns as grass around weeds will also be killed.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. **FOR OUTDOOR USE AROUND THE HOME ONLY.**

HOW TO USE: Adjust the nozzle to a coarse spray. Hold the sprayer close to the weed (1 or 2 ft.) and apply to cover the plant, but not to the point of run-off. One application should kill most weeds listed. Some hard to control grasses and weeds may require a second treatment. Browning will often occur within one week, with a complete kill developing in 2 to 4 weeks. Treated areas can be reseeded or replanted 7 days after application. For best results, use on a warm, sunny day when rain is not expected within 24 hours. Avoid cutting treated vegetation for 7 days.

IMPORTANT: AVOID SPRAY CONTACT ON DESIRABLE PLANTS AS THEY WILL ALSO BE KILLED. If contact occurs, wash off spray mist immediately with water.

DIRECTIONS FOR PREPARING REFILL: To refill this container, add 9 Tablespoons (4 1/2 fl.oz.) of [SYSTEMIC GRASS & WEED KILLER CONCENTRATE] [K GRO® SHOOT OUT Grass & Weed Killer Concentrate] [(1 5% glyphosate concentrate)] and finish filling container with clean water (19 fl.oz.) (2 Tablespoons = 1 fl.oz.)
