PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS & DOMESTIC ANIMALS CAUTION

Harmful if swallowed or absorbed through skin. Avoid breathing vapors. Avoid contact with eyes, skin or clothing. In case of contact, immediately flush eyes and skin with plenty of water. Get medical attention if irritation persists.

Do not use in nurseries or rooms where infants, ill or aged persons are confined.

Do not apply directly to food. In commercial food handling facilities, cover or remove any food and food processing equipment during application. Do not apply while food processing is under way. After space spraying in food processing plants, wash with potable water all equipment, benches, shelving, etc. where exposed food will be handled. All food processing surfaces and utensils should be covered during treatment or thoroughly washed before use.

Remove pets and birds, and cover fish aquariums before spraying.

PHYSICAL OR CHEMICAL HAZARDS

For information on physical and chemical hazards, see the product label. Do not use in food processing plants where food is exposed to temperatures above 100°F (37.8°C).

STORAGE AND DISPOSAL

Store in original container away from heat and moisture. Do not use in food processing plants where food is exposed to temperatures above 100°F (37.8°C).

MADE IN CANADA

DIRECTIONS FOR USE

For use in food processing plants, restaurants, hospitals, homes, stores, hotels, motels, schools, and other public buildings. In dairies, barns, farm milk houses, canneries, breweries and food handling establishments.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Sequential Insecticide is designed for use in automatically timed discharge devices. Use the metered rate provided. At a 100% discharge rate, 27.5 mg/l of insecticide is discharged every 15 minutes. At 50% discharge rate, 13.75 mg/l of insecticide is discharged every 15 minutes. In food processing plants, use Sequential Insecticide in areas where food is exposed to temperatures above 100°F (37.8°C). Do not use in areas where food is exposed to temperatures below 100°F (37.8°C). Do not use in areas where food is exposed to temperatures above 100°F (37.8°C).
