the suggest to ask the second state of the second state of the second state of the second state of the second s

d. Your instructions under Food/Feed Handling Establishments are misleading and confusing with respect to a "Spot" treatment and a Crack and Crevice Treatment in food areas and nonfood areas. Thus, revise the entire section as follows: 241 12

POOD/FEED AND NONFOOD/FEED AREAS

FOOD/FEED AREAS (APPLICATION LIMITED TO CRACK AND CREVICE AND SPOT TREATMENT ONLY).

Food/feed areas include areas for receiving, storage, packing (canning, bottling, wrapping, boxing), preparing, edible waste storage, and enclosed processing systems (mills, dairies, edible oils, syrups). Serving areas (when food is exposed and facility is in operation are considered a food area), and include facilities where prepared foods are served, such as dining rooms but excluding areas where foods may be prepared or held.

CRACK AND CREVICE TREATMENT: As a crack and crevice treatment, use equipment capable of delivering a pinstream of insecticide and apply in small amounts directly into such spaces as expansion joints, in points between different elements of construction, between equipment and floors, wall boards, baseboards, or openings leading into voids and hollow spaces in walls, hollow equipment legs and bases where cockroaches (waterbugs), ants, spiders and silverfish hide.

SPOT TREATMENT: As a spot treatment, apply as a coarse low-pressure fan type spray to selective floor surfaces, areas around water pipes, beneath cabinets, refrigerators, sinks, stoves, storage areas, baseboards, under elements of construction and similar areas where cockroaches (waterbugs), ants, spiders and silverfish hide.

Limit spot treatments to floor surfaces where pests have been seen or where they are suspected of hiding. Limit spot treatments to an area no larger than 20% of the floor surface. Any individual spot treatment shall not exceed two square fact.

(

t

ì

:

ì

Avoid treating surfaces likely to be contacted by food. Do not apply when facility is in operation or foods or feed are exposed.

APPLICATIONS OF THIS PRODUCT IN FOOD/FEED AREAS OF FOOD OR FEED HANDLING ESTABLISHMENTS OTHER THAN A CRACK AND CREVICE TREATMENT AND SPOT TREATMENT ARE NOT PERHITTED.

NONFOOD/FEED AREAS: Nonfood/feed areas include garbage rooms, lavatories, floor drains (to severs), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets, and storage (after canning and bottling).

In nonfood/feed areas, apply as a spot treatment using a coarse, low-pressure spray to baseboard areas, around water pipes, surfaces behind and beneath sinks, lockers, tables, pallets, and similar areas where insects hide or through which they may enter.

e. Change "May be fatal if . . . " to "Harmful if swallowed, inhaled or absorbed through skin."

f. Expand the Note to Physician as follows:

Note to Physician: Solvent may present aspiration hazard. Gastric lavage may be indicated if product was taken internally. Diazinon is an organophosphate insecticide. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal. 2-PAM is also antidotal and may be administered, but only in conjunction with atropine.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

-4-

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFFA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

George T. LaRocca Product Manager (15) Insecticide-Rodenticide Branch Registration Division (H7504C)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labelling.

GENERAL

Use this product as a spot or crack and crevice treatment to control cockroaches, waterbugs, silverfish, ticks, fleas, and other insects listed below. Apply this product as a coarse spray to localized areas where pests are found or may occur. Spray surfaces until wet. Repeat as needed.

SPOT TREATMENT

TC KILL ANTS, ROACHES, CRICKETS, SILVERFISH, SOWBUGS, SPIDERS AND EARWIGS

Spray into cracks, crevices, around baseboards and other places where these insects hide Apply behind and beneath cabinets, refrigerators, sinks, stoves, and in and around waste containers. Contact directly as many insects as possible. For ants, spray trails and places where ants enter premises. Repeat as necessary for control.

TO KILL BROWN DOG TICKS AND FLEAS

Remove and destroy old bedding. Spray sleeping quarters of pets, around baseboards, windows and door frames, wall cracks, and localized areas of floors. Repeat as necessary. Fresh bedding should be placed in animal quarters after spray has dried. Do not spray animals. To control the source of your infestation treat your pets with a product registered for application to animals.

TO KILL CARPET BEETLES

Spray along baseboards, edges of carpeting under carpets and rugs, under furniture, in closets, on shelving, and in other places of harbourage. Repeat as necessary.

APPLICATION WITHIN FOOD/FEED HANDLING ESTABLISHMENTS

FOR CRACK AND CREVICE

Application within food handling establishments (places other than private residences) in which food is held, processed, prepared or server including but not limited to restaurants, grocery stores, baker to be the plants, canneries and grain mills: Tc kill ants, roaches, silverfish, crickets, sowbugs, spiders, earwigs, brown dog ticks, fleas, carpet beeties and dermestids: Use a spot treatment in and around both food and non-food areas where the above pests have been seen or are suspected of hiding or entering. Apply only enough spray to thoroughly cover the surfaces treate using special care to avoid unnecessary runoff. Do not introduce the spray into the air or allow the spray to contact food of food contacting surfaces. Spot treatments must not exceed 2 square feet when applied in/ around food areas. Areas treated may include dark corners, or rooms and closets, along and behind baseboards, beneath and behind stoves and refrigeration units, floor drains and around plumbing and other utility installations.

....

FOR CRACK AND CREVICE INJECTION SYSTEM:

Equipment capable of delivering a pin stream should be used in points between different elements of construction, between equipment and floors, openings leading to voids and hollow spaces in walls, equipment legs and bases where the above listed insects hide.

* 41-13-33 C

Do not apply this product in conduits, motor housings, junction and switch boxes, or other electrical equipment because of possible shock hazard.

APPLICATION OF THIS PRODUCT IN FOOD HANDLING ESTABLISHMENTS OTHER THAN AS A SPOT AND/OR CRACK AND CREVICE TREATMENT IS NOT PERMITTED.

OUTDOOR USE:

TO KILL ANTS, CRICKETS, FLEAS, CHIGGERS, AND BROWN DOG TICKS:

Spray infested areas thoroughly including outside surfaces of screens, doors, window f res, foundations, patios, or other places where insects may enter. For ants, spray hills and runways. Repeat as necessary. Do not spray vegetation.

TO KILL FLIES, MOSQUITOES, WASPS, AND FLYING MOTHS:

For outdoor use only as an aid in reducing annoyance from these insects. Spray outside surfaces of screens, doors, windows or wherever these pests may enter a room. Also treat surfaces around light fixtures on porches, in garages, and other places where insects alight or congregate.
