Consultant/Agent for K-G Packaging, Inc.
c/o RegWest Company, LLC
30856 Rocky Road
Greeley, CO 80631-9375

**Subject: Rebuttal, Product Registration dated May 3, 2007
Flying Insect Killer I, EPA Reg. No. 46813-69
Your Submission Dated August 29, 2007**

Dear Ms. Davis:

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable with the following provision(s):

Additional/alternate marketing language section comment(s), middle of back/side panel, page 2 of 3:

1. Delete the marketing claim "No unpleasant odor," since this is conflicting with what is described on the CSFs for this product.
2. The "{Logo}" placed on this page must be a logo to indicate absence of chlorofluorocarbons (CFCs) in this product. The logo must consist of the universal nonverbal symbol for negation – a red circle with diagonal red slash through the circle – with: (a) wording as discussed in PR Notice 92-2 immediately next to the logo; and (2) text set in type size of at least 6 points (the minimum type size permitted by regulation).

Bottom of Back/Side Panel section comment(s), top of page 3 of 3:

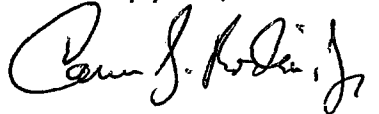

3. The listing for "[{website}]" at the bottom of this page cannot reference any collateral labels other than what is being approved by EPA for this product. Clarify what is meant by "[{website}]" or delete from the product label.
4. Replace the last statement in this section with: "Made in Canada."

K-G Packaging, Inc. should note that a notice of availability of EPA's RED for products containing pyrethrins was published in the *Federal Register* on July 26, 2006 (Volume 71, Number 143, Pages 42387-42389). In addition, EPA's RED for products containing piperonyl butoxide was published in the *Federal Register* on July 26, 2006 (Volume 71, Number 143, Pages 42385-42386). Further, EPA's RED for products containing MGK® 264 was published in the *Federal Register* on July 26, 2006 (Volume 71, Number 143, Pages 42381-42383). As a result, additional data and/or labeling changes may be required for products containing pyrethrins, piperonyl butoxide and MGK® 264.

Data deficiencies were identified for storage stability and corrosion characteristics in the product chemistry review for this product. Therefore, K-G Packaging, Inc. is obligated to submit a One Year Storage Stability (830.6317) study and a Corrosion Characteristics (830.6320) study on this product in support of this registration within one year from the date of this registration.

Please submit two (2) copies of the final printed labeling, incorporating the above changes, before releasing the product for shipment. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product bearing amended labeling constitutes accepting of these conditions. A stamped copy of the approved label is enclosed for your records. If you have any questions, please contact Mr. Carmen Rodia at (703) 306-0327 or via e-mail at Rodia.Carmen@epa.gov.

Sincerely yours,

FOR

Richard J. Gebken,
Product Manager (10)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Use Restrictions:

- DO NOT remain in treated area. Exit areas immediately and remain outside the treated area until aerosols, vapors and/or mists have dispersed.
- Not for use in residential areas.
- DO NOT use in nurseries or rooms where infants, ill or aged persons are confined.
- Remove or cover all food and drinking water before application.
- Remove or cover dishes, utensils, food processing equipment and food preparation surfaces before use or wash them before reuse.
- All food processing surfaces and equipment should be covered or washed with an effective cleaning compound followed by a potable water rinse after use of this product.
- DO NOT use in areas where fish or reptiles may be exposed to the spray.
- DO NOT place metering device directly over or within 8 feet of exposed food, dishes, utensils, food processing equipment and food handling or preparation.
- DO NOT install within 3 feet of air vents.
- Carefully follow directions for the dispenser unit when installing the dispenser and replacing cans or conducting maintenance.

Flying Insect Killer I is designed for use in a wide range of automatic metered dispensers. The dispenser automatically activates the special metered valve every 15 minutes. Within 24 hours following treatment a decrease in the number of flies, gnats, mosquitoes and small flying moths should be noticed and with continued use, annoyance from these pests should

also be reduced. Effectiveness of this product is noticeable within one hour after the dispenser is activated. Recommended use is for 24 hours; if less than 24 hours is required, set the dispenser to start one hour before control is desired and to run one hour after control is no longer needed. Factors such as airflow rate, size of space treated, humidity and room temperature affect insect activity and control; therefore, consider one unit per 6,000 cubic feet of unobstructed space, making adjustments depending upon specific conditions at the usage site. As with any method of insect control, best results are achieved when insect prevention practices are followed. Carefully follow the directions for the specific dispenser unit of choice when installing the dispenser, replacing cans and conducting required maintenance.

Storage and Disposal

Do not contaminate water, food or feed by storage or disposal.

Storage: Keep this product dry in a tightly closed (preferably locked) storage area when not in use. Store in a cool, dry, well-ventilated area inaccessible to children and pets and away from heat, sparks and open flames. **Pesticide Disposal:** Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance. **Container Disposal:** Do not puncture or incinerate! **If empty:** Place in trash or if available offer for recycling. **If partly filled:** Call your local solid waste agency for disposal instructions.

{Additional/alternate marketing language:}
Meets CARB VOC regulations for flying insecticides *[[25% Content]]* *[[25% VOC formulation]]*. No greasy [oily] residue. ~~No unpleasant odor.~~ Contains the botanical insecticide Pyrethrins [an extract of the Chrysanthemum flower].

{Logo}
Federal regulations prohibit CFC propellants in aerosols.
Contains no CFCs or other ozone depleting substances.

PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals

CAUTION: Harmful if swallowed, inhaled or absorbed through skin. Avoid breathing vapors or spray mist. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco. Remove and wash contaminated clothing before reuse. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

First Aid

| | |
|---|---|
| Have the product container or label with you when calling a poison control center or doctor or going for treatment. For additional information on this pesticide product (including health concerns, medical emergencies or pesticide incidents), you may call 1-800-xxx-xxxx or the National Pesticide Information Center at 1-800-858-7378. | |
