

ACTIVE INGREDIENT:

KEEP OUT OF REACH OF CHILDREN

ACCEPTED

MAY 2,4 2005

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 46923-7 CAS number 1344-73-6 EPA Reg. Number 46923-9 EPA Est. Number 46923-NJ-01

WARNING/AVISO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detaile. (If you do not understand this label, find someone to explain it to you in detail).

PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

Warning: Causes substantial but temporary eye injury. Harmful if absorbed through the skin or substantial but temporary eye injury. Harmful if absorbed through the skin or substantial but temporary eye injury. Harmful if absorbed through the skin or substantial but temporary eye injury. Harmful if absorbed through the skin or substantial but temporary eye injury. Harmful if absorbed through the skin or substantial but temporary eye injury. Harmful if absorbed through the skin or substantial but temporary eye injury. Harmful if absorbed through the skin or substantial but temporary eye injury. Harmful if absorbed through the skin or substantial but temporary eye injury. Harmful if absorbed through the skin or substantial but temporary eye injury. Harmful if absorbed through the skin or substantial but temporary eye injury.

PERSONAL PROTECTIVE EQUIPMENT

Applicators and other handlers must wear:

Long sleeve shirt and long pants

Shoes plus socks

Protective eye wear

Chemical resistant gloves made of any waterproof material.

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do no reuse them.

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR 170.240 (d) (46), the handler PPE requirements may be reduced or modified as specified in the WPS.

USER SAFETY RECOMMENDATIONS

Remove PPE immediately after handling this product. Wash outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

FIRST AID				
If in eyes	Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.			
If Inhaled	Move person to fresh air. If person is not breathing call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call poison control center or doctor for further treatment advice.			
lf on skin or on clothing	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call poison control center or doctor for treatment advice.			
if swallowed	Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.			

HOT LINE SERVICE

Have the product container or label with you when calling a poison control center or doctor, or for going for treatment. You may contact 800-275-3924 for emergency medical information.

CIVE IT ON WEN IAL MAKAHUS

3/10

This pesticide is toxic to fish and aquatic organisms. For terrestrial uses do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to fish and aquatic organisms in adjacent aquatic sites. Do not contaminate water by cleaning of equipment or disposal of wastes.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted reentry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (RE) of 24 hours.

PPE requirements for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soll or water are:

Coveralis

Chemical resistant gloves made of any waterproof material.

Shoes and socks

Protective eye wear

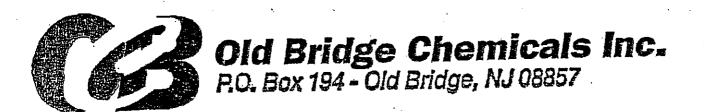

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in a cool and dry place. Open dumping is prohibited. Do not reuse empty container. If container is damaged, place container in a plastic bag. Shovel any spills into plastic bag and seal with tape.

Container Disposal: Completely empty liner by shaking and tapping sides and bottom to loosen clinging particles. Empty residues in application equipment. Then dispose of liner in a sanitary landfill or by incineration if allowed by State and local authorities. If burned, stay out of smoke.

Pesticide Disposal: Waste resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CHEMIGATION

Refer to supplementary label for Use Directions for Chemigation. Do not apply this product through any imigatic systems unless supplemental labeling on chemigation is followed. Supplemental labeling entitled:

SUPPLEMENTAL LABELING BASIC COPPER SULFATE EPA Reg. No. 46923-2 EPA Est. No. 46923-NJ-01 CHEMIGATION

NOTE: Copper-based products may be corrosive to aluminum equipment. Follow supplemental label information

GENERAL INSTRUCTIONS

Notice: Follow all directions carefully. Timing and methods of application, weather, crop conditions, mixtures wit other chemicals not specifically recommended and other influencing factors in the use of this product are beyon the control of the Seller. Buyer assumes all risks of use, storage or handling of this material when not in stric accordance with the directions given on this label.

Recommended Mixing Directions: Fill the spray tank about half full of water and with agitator running add the required amount of Basic Copper Sulfate. Add water to fill the tank to 3/4 full and when a spreader sticker recommended, add the proper amount according to the manufacturer's recommendation. Fill the spray tank an keep agitator running until the spraying is completed.

NOTE TO USER: In some cases it may be desirable to omit oil from the spray mixture or use an alternative product other than domant flowable oil. Consult the recommendation of the oil or other product for proper rail and timing.

The specific instructions on the back panel are based on general applications. The recommendations of loc Agricultural Experiment Stations should be closely followed as to timing, frequency and number of sprays.

BASIC COPPER SULFATE is intended for use in a range of spray volumes. Recommendations on this label reflect common practics. If it is desirable to use spray volumes other than dilute in situations not specifically addresse on this label, do so only after developing direct knowledge, prior utilization or test, of effect on target crop.

Minimum Recommended Spray Volume (Gallons) Per Acre When Applying BASIC COPPER SULFATE.

	AERIAL	GROUND		
		Dilute	Concentrate	
Row Crops	5	_ 20	-	
Vines	5	100	50	
Tree Crops	10	400	50	
Citrus	10	400	100	

Complete spray coverage is essential to assure full performance from BASIC COPPER SULFATE. When treatin on a concentrate basis or by serial application, unless you have had specific previous experience, it is advisable to test for compatibility and crop tolerance prior to full scale commercial utilization.

When selecting a use rate for BASIC COPPER SULFATE, never apply less per acre than the amoun recommended per 100 gallons unless specifically instructed by the label.

While volume is important in obtaining full spray coverage, often factors such as foliage density, environment conditions and sprayer calibration have a greater impact. Always be sure sprayers are calibrated t manufacturers' specifications and environmental conditions are within those recommended by state and loc regulatory authorities.

Per acre use rates of BASIC COPPER SULFATE for citrus, tree crops and vines are calculated on a dilute spratasis. Actual pounds of BASIC COPPER SULFATE per acre should be determined by multiplying the rate/10 gallons times the minimum recommended dilute spray volume. Example: For Citrus Brown Rot - 1.0 pound/10 gallons x 4 to 8 (dilute spray volume 400 to 800 gallons) = 4.0 to 8.0 pounds of BASIC COPPER SULFATE per acre. The per acre use rate of BASIC COPPER SULFATE is applicable for both dilute and concentrate spraying. Us sufficient water for thorough coverage. Spreader/stickers may be used as dictated by local practices an conditions.

DOT: NON-REGULATED

NET WT. 50 LBS. (22.7 Kilos)

See Back Panel for Directions for Use. Do Not Use This Material in Aluminum Equipment

CHURA CITURA	419			
CROP D	sease	BATE PER 100 GAL WATER	5/6	
Almonds	Brown Rot Biossom Blight Shot Hole	4-5lbs.	May be applied as domnant or bud spray. Bud sprays should be applied at pink bud through popcorn stage. Do not apply after 50% bloom or when trees are in leaf. Use high rate when disease pressure is heavy or expected to be so.	
Apples	Antinacnose	3-4 ibs.	For red varieties apply to foliage before or after harvest. For yellow varieties apply to foliage after harvest once every 2 to 3 years as necessary:	
,	Brooks Spot	1 lb.	Plus 2 lbs. hydrated lime/100 gallons. Apply in late cover sprays.	
	Bitter Rot Black Rot, Blotch Powdery Mildew	1/2-11/2 lbs.	Plus 3-5 lbs. hydrated Ilme/100 gallons. Begin at petal fall and repeat through fourth cover spray.	
	·Bulls-eye Rot	4 lbs.	Plus sultable oil/100 gallons of water. Apply after harvest.	
	Fire Bilght	1/3 to 1/2 lb.	Begin at 10% bloom. Repeat at 5 day intervals until late bloom is over.	
	Scab	1 - 11/4 lbs.	Plus 2-21/2 lbs. hydrated lime/100 gallons. Apply at late domnant stage.	
	Socity Blotch	1 - 11/4 lbs.	Plus 21/2 lbs. hydrated lime/100 gallons. Apply in late cover sprays. Under conditions where copper injury is likely to occur, add additional lime.	
¹ pricots	Brown Rot Blossom Blight Shot Hole	4-5 lbs.	Apply as a dormant or bud spray. Bud sprays should be applied from bud swell to popcom stage. Do not spray when trees are in leaf. When bud blight is a problem, apply the maximum rate after most leaves have tallen in the tall, usually November and December, but prior to fall rains.	
Vocados	Antiracriose Blotch (Cercospora) Scab	3 lbs.	Spray first when blossom buds open. Make 5 amplications at four week intervals. LIMIT: 30 to 40 lbs. per acre. Do not apply more than 140 days after bloom.	
Tranherries	Anthracnose	2 bs.	Begin when leaf buds begin to open. Repeat when flower buds show white. Continue at 10 to 14 day intervals.	
Blackberries, Boysenberries, Dewberries, Loganberries, Baspt etc.	Leaf & Cane Spot Yellow Rust	2 lbs.	In spring, begin when leaf buds begin to open. Repeat when flower buds show white. Also post harvest spray after pruning but before fall rains, using 6 lbs. per 100 gals of water.	
Chemis.	Brown Rat Blossom Blight	4-5 lbs.	Apply at popcom and late bloom stages. In late bloom spray, add 5 lbs. hydrated lime/100 gallons spray.	
	Leaf Spot	4-5 lbs.	Plus 4-5 lbs. hydrated lime/100 gallons. Apply at petal fall.	
	Shot Hole	4-5 lbs.	Apply as a domaint spray.	
Citrus*	Brown Ret	1 lb. (Florida only, use 2 lbs.)	Apply at first indications of rain or first appearance of Brown Rot. Repeat as needed to protect during wet weather.	
*Note+ mE	Melanose, Scab Greasy Spot Pintk Pitting	11/2 - 3 lbs.	NOTE: For aerial or concentrate sprays, apply 10 to 26 lbs. per acre offluted to the proper concentration with water as recommended for the specific type sprayer used. Do not use less than 10 gallons of spray per acre. For Melanose, apply 1 to 3 weeks after petal fall. Repeat 4 weeks later if necessary. Wettable suffur may be included in sprays. For Scab, make two applications, one just before trees begin to flush and repeat at two thirds petal fall. Wettable suffur may be included in sprays. For Greasy Spot and Pink Philing, make a summer spray. mown to have occurred.	
Junar,	Antinacnose	11/4 lbs.	Spray at leaf opening and repeat at 10 or 14 day intervals.	
Boosebenles	Leaf Spot	6 lhs.	Apply at full bloom, two weeks later, and after harvest.	
Aberts*	Bacterial Blight, Eastern Filbert Blight	6 lbs.	Apply in late summer prior to heavy rains. If heavy fall rains occur, repeat spray after three-quarters of the leaves have dropped.	
"*Not for use in	California)			
अद्भाव्य	Antivacnosa Black Rot Downy Mildaw	2 ibs.	Make first application when new growth is 1/2 inch long and repeat every 10 -14 days. Concentrate spray: use 4 to 5 pounds per acre in su water for good coverage and apply as stated above.	
Mangos	Anthracnose	3 lbs.	Begin sprays when panicles are about 2 inches long. Spray weekly until fruit sets, then spray monthly for a total of 12 applications. One gallon of spreader per 100 gallons of spray may increase efficiency.	
PavilC	Lezi Spot (Peacock Spot)	4 lbs.	Apply in late October NOTE: In areas with 10 Inches or less of rainfall per year, use only 2 lbs. per 100 gallons of water.	
Peaches,	Brown Rot	4-5 lbs.	Apply before bod swell and in full plok bud stages. Do not apply after pink bud stage or after trees are in leaf as injury may occur.	
Vactarines	Leaf Curl Peach Blight (Shot Hole)	4-5 lbs.	As a dormant spray, apply prior to fall rains. Bud sprays should be applied before bud swell and in full plnk bud stages. Do not apply after pink bud stage, after foliage buds swell or after trees are in leaf as injury may occur. Consuit your State Agricultural Experiment Station. California only: Apply 16 to 20 lbs. In 20 gallons of water/acre by alreraft during the dormant season.	
-	Bacterial Diseases	3 ibs.	Apply during the dormant season.	

Lise at least 400 gallons of spray per acre. Apply at 10% bloom and repeat at 5 to 7 day intervals during bloom. Do not use on D'Anjou, Comice

Apply at early green bud and full popcom stages. Do not apply after trees are in leaf as injury may occur.

Califernia Units: For aircraft sprays to control Shot Hole, Brown Rot, Blossom Blight, apply 16 to 20 lbs. in 20 gallons of water/acre during

Treat twice, once in early pre-bloom and again when 10 to 20 percent pistliate blooms are showing. Repeat applications for Blight control 3 or 4

VEGETABLES	hieraer	RATE PER ACRE		
CROP	Angular Leaf Spot	2 - 4 lbs.	Begin tradiment when plants are about 5 inches tall and repeat at 5 to 7 day intervals.	
(Green & Dry)	Anthracnose, Bacterial Blight Downy Mildew		Degat treatment when plants are about 5 mones an and oppose at 5 to 7 tag successed.	
Beet	Downy Mildew Leaf Blight Leaf Sonts	2 - 3 lbs.	Begin when disease first appears and repeat every 7 to 10 days.	
Broccoli, Brussels Sprout Cabbage,	Downy Mildew	2 - 3 ibs.	For plant bed sprays, apply after plants have emerged but before diseases appear. Repeat in 7 to 10 days as needed.	
Cauliflower			Note: For In-field use, use 3 ths /100 gations of water at 7 to 10 day intervals as needed	
Carrots	Alternaria & Cercospora Leaf Blights Downy Mildew	3 - 4 lbs.	Begin treatment when disease first appears and repeat at 7 to 10 day intervals.	
Celery	Early Blight Late Blight Bacteria Blight	3 - 4 lbs.	Treat every 7 days after emergence.	
Cucurbits (Cantaloupes, Cucumbers, Melons, Pumpkins, S(" ")	Angular Leaf Spot Anthracross Atternaria Leaf Spot Bacterial Wilt Downy Mildew Powdery Mildew Gurnny Stem Blight Leaf Spot Scab	2 lbs.	Bagin treatment when plants begin to vina and repeat every 7 to 10 days. Since the disease is likely to be more senous in high plant population (40,000 plus plants per acre), spray every 3 to 4 days to protect truit at all stages of development. Note: A ground application of Basic Copp Sulfate after planting, but before emergence may help decrease infections of Angular Leaf Spot, Anthracrose and Alteraria Leaf Spot. Then totic above schedule after emergence. Note: Some Agricultural Experiment Stations may recommend equal amounts of hydrated lime when used cucurbits. Lime when applied to cucurbits may cause dwarting of plants and reduce fruit set due to increased transpiration and defloration und some conditions. Consult your local Experiment Station for specific recommendations.	
Eggplant	Anthracnose Downy Mildew Phomopsis Blight Leaf Spots Early Blight (Atternatia)		Apply 13/4 to 3 pounds/100 gallons water to either plant beds or field before diseases appear. Repeat at 7 to 10 day intervals.	
Lettuca	Anthracnose Downy Mildew Leaf Spot (Cercospora)		Spray 13/4 to 3 pounds/100 gallons before diseases appear. Repeat at 7 to 10 day intervals.	
Onic	Downy Mildew Purple Blotch	3 - 4 lbs.	Begin when plants are 5 to 6 inches. Repeat at 7 to 10 day intervals.	
Pea	Downy Mildew Leaf Soot		Use 13/4 to 3 pounds/100 gallons. Begin spraying before diseases appear. Repeat at 7 to 10 day intervals.	
Peppers	Anthraconose Bacterial Spot, Early Blight, Downy Mildew Cercospora Leaf Soot	3 - 4 lbs.	Start sprays in seedbed and continue in field at 7 day intervals. NOTE: Disease control is critical during intriting.	
T les	Early Blight Late Blight	3 - 5 lbs.	Begin when plants emerge. Repeat at 7 to 10 day intervals.	
Peanuts	Cercospora Leaf Soot	2-3 lbs.	Repeat at 10 to 14 day intervals. NOTE: The addition of 2 pounds of wettable or flowable sulfur in a tank rotx will enhance Leaf Spot control dusting is preferred, use 7 pounds BASIC COPPER SULFATE with 92 pounds dusting sulfur per 3 to 5 acres, depending on plant size.	
Spirach	Anthraconose Downy Mildew White Rust	2 - 4 lbs.	Begin when disease first appears. Repeat at 7 to 10 day intervals.	
Cupathaeta	Cercospora Leaf Soot	d the	Besin urban disease first across Count over Tax 10 days	
Sugarbeets	Cercospora Leaf Soot	4 lbs.	Begin when disease first occurs. Repeat every 7 to 10 days.	
Tomatoes	Antivaconose Bacterial Spot Bacterial Canker Early Blight Late Blight Leaf Mold Nailhead Rust Septoria Leaf Spot Stemphylium Leaf Soot	2 - 4 lbs.	Begin in seedbed or field before disease appears. Repeat at 7 to 10 day intervals.	

CONDITIONS OF SALE LIMITED WARRANTY AND LIMITATIONS OF LIABILITY AND REMEDIES

To those for use of this product reflect the opinion of expens based on field use and tests. The directions are believed to be and should be followed carefully. However, it is impressible to eliminate all risks inherently associated with the use product. Crop injury, ineffectiveness or other unintended consequencies may result because of such factors as wealther conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Old Bridge or the select. At such risks shall be assumed by the purchaser and user.

Old Bridge warrants that this product conforms to the chemical describion on the label and is reasonably fit for the purpose referred to in the directions for use suspect to the inharent risks referred to show. Old Bridge makes no other warranty or representation of any kind, express or implied, concerning the product, including NO IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE, and no such warrantees shall be implied by the law.

The exclusive remedy against Old Bridge for any cause of equion relating to the handling or use of this Drod is a claim for damage and in no event shall camages or any other recovery of any kind against Old Bridge excess the price of the product which causes the alleged loss, damage, injury, or their claim. Old Bridge stand be liable and any and all claims egainst Old Bridge are waived, for special, indirect, incidental, consequential damages or expenses, of any nature, including, but not firmled to, loss or profits or incorne, a crop or property loss or damage, whether or not based on Old Bridge's negligence, breach of warranty, st sability in ton or any other cause of action.

Old Bridge and the seller offer this product and the buyer and user accept it, subject to the larego conditions of sale and limitations of warranty, liability and remadles which may only be varied by agreemen writing signed by a duly authorized representative of Old Bridge.

WARNING: This product contains chemicals known to the State of California to cause cancer and birth deleter other reproductive harm.
