EPA Reg. No. 46931-1 EPA Est. 0000-CA-0

PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed. Wash thoroughly after handling.
 Apply only in areas inaccessible to children and pets.
 Any powder visible after application must be brushed into
 cracks and crevices or removed.
 Do not use in edible products areas of food processing
 plants, restaurants, or other areas where food is commer-
 cially prepared or processed. Do not use in serving areas
 while food is exposed.
 Do not leave container where children or animals may
 gain access.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a
 manner inconsistent with its labeling.

STORAGE AND DISPOSAL

- 1 PROHIBITIONS**
 Do not contaminate water, food or feed by storage
 or disposal.
 Open burning and dumping prohibited.
 Do not reuse empty container. Wrap container and
 place in trash collection.
- 2 PESTICIDE DISPOSAL**
 Pesticide spray mixture or residue that cannot be used
 or chemically reprocessed should be disposed of ac-
 cording to procedures approved by Federal, State or
 Local disposal authorities.
- 3 CONTAINER DISPOSAL**
 Triple rinse (or equivalent). Then offer for recycling or
 reconditioning, or dispose of in a sanitary landfill, or by
 incineration if allowed by state and local authorities.

This is how ROACH RAIDER works:
 The insects are attracted to the powder as a food source—thus
 the powder will cause an evaporation of the insect's body
 moisture. The insect will die by DEHYDRATION. Also, the in-
 sects will walk, crawl, jump, fly into the powder.

ROACH RAIDER is a free-flowing powder, odorless, non-
 staining and non-volatile. The powder will adhere to the insect,
 causing intimate contact and kill.
 ROACH RAIDER acts slowly but continuously and when prop-
 erly applied, will control the roach population within 7 to 10
 days.

ROACH RAIDER is designed for use in homes, office-
 buildings, hotels, apartment houses, restaurants, industrial
 plants, hospitals and warehouses. When treating an area, a
 bulb duster or bellows-type hand duster is recommended.
 ROACH RAIDER should be dusted liberally into wall voids, soft-
 fit and sub-cabinet voids, under major appliances, under show-
 ers, tubs and into openings around drain and water pipes and
 electrical conduits.

When applied during construction, use an electric or hand-
 operated duster to insure penetration into all hidden areas. To
 treat an existing structure, simply bore a 1/4 inch hole into the
 void and insert duster nozzle. If drilled in an inconspicuous
 place, there will be no need to close the aperture after dusting.

One pound of ROACH RAIDER per 2,000 square feet will suf-
 fice for long-term protection. For larger structures use propor-
 tionately larger quantities of powder.

ROACH RAIDER provides long lasting control. Should the
 roach population reestablish itself at a future date, simply re-
 apply ROACH RAIDER as described in the above directions.
 Under any circumstances, an annual application is
 recommended.

NOTICE

ROACH RAIDER is capable of destroying plant life and there-
 fore should not be spilled or dumped into areas underlain with
 roots of valuable vegetation.

Neither manufacturer nor seller shall be liable for any injury or
 damage suffered by reason of the use of this product for a
 purpose not indicated by the label, or contrary to the directions,
 nor for breach of any warranty not expressly specified. Buyer
 accepts material subject to these terms, and assumes all risks
 of use, storage or handling of this material not in strict accord-
 ance with the directions. Neither manufacturer nor seller makes
 any representations or warranties expressed or implied, not
 specifically set forth herein.
