**USE DIRECTIONS FOR SEVANA BIRD REPELLENT**

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**GENERAL INFORMATION**

Sevana Bird Repellent is composed of high quality, food grade ground garlic (allium sativum), and ground red peppers (capsicum). It is used to repel horned larks, house finches, house sparrows, linnets and starlings from attacking the seedlings of lettuce, melons, tomatoes, cabbages, radishes, corn, beets, and other vegetables. It may be applied only at the time of planting and when the first leaves appear.

**APPLICATION DIRECTIONS**

1. At the time of planting. On furrow irrigated crops, apply Sevana granular with a granular applicator banded directly on the seed line at a rate of 17 to 20 lbs. Ac. For sprinkler and drip irrigated fields apply 25 to 30 lbs. Ac.

2. When first leaves appear: For additional protection, apply Sevana granular aerially at a rate of 25 to 30 lbs. Ac. On any field, when first application is by air, apply at a rate of 30 lbs. Ac.

**WARRANTY**

The use of this material being beyond our control and involving elements of risk to human beings, animals and vegetation, we do not make any warranty express or implied, as to the effects of such use, when this product is not used in accordance with the directions as stated on this label.
