

DATUM: OCTOBER 1981 Causes severe eye and skin irritation. Do not get in eyes or on skin. Must be contained by bottling before reuse. Wear respirator or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

STATEMENT OF EMERGENCY TREATMENT

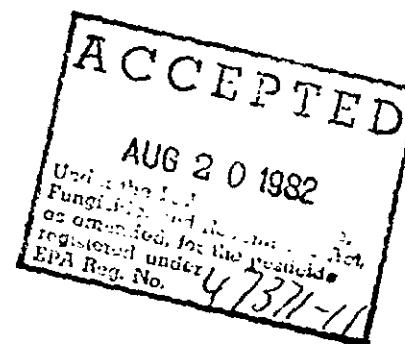

In case of contact, immediately flush eyes with plenty of water for 15 minutes. Call a physician immediately. In case of contact, wash skin thoroughly with soap and water. If handling, Call a physician immediately. If swallowed, drink promptly a large quantity of milk, egg white, gelatin solution, or if available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN: Probable minimal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsion may be needed.

Consult the label for other instructions and precautionary statements before use of FMB 451 Quats.

FMB 451-5 QUAT

concentrated germicide

FOR FORMULATION OF DISINFECTANTS, SANITIZERS, FUNGICIDES, WATER TREATMENT, MICROBIOIDES, SWIMMING POOL ALGAECIDES, MILDEWCOIDS, OIL FIELD WATER FLOOD AND SALT WATER DISPOSAL PRODUCTS

ACTIVE INGREDIENTS

n-ALKYL(4-SO ₃ -C ₁₂ 40) C ₁₆ 18-19-hydroxytertiazanium chloride	50.0%
Ethanol	7.8%
INERT INGREDIENTS,	42.2%
Total	100.0%

DANGER: KEEP OUT OF REACH OF CHILDREN

STATEMENT OF PRACTICAL TREATMENT

In case of contact: Immediately flush eyes with plenty of water for 15 minutes. Call a physician immediately. In case of contact: wash skin thoroughly with soap and water after handling. Call a physician immediately. If swallowed, drink prompt, large quantity of milk, egg whites, oatmeal solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsion may be needed.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Corrosive: Causes severe eye and skin damage. Do not get in eyes or on skin. Wash contaminated clothing before reuse. Wear goggles or face shield and rubber gloves when handling. Harmful if swallowed. Avoid contamination of food.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not apply in drainage and/or estuarine or fields. Do not discharge into lakes, streams, ponds or public waters unless in accordance with an NPDES permit. For guidance, contact your Regional Office of the Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS

Do not use or store near heat or fire. Name: FMB 451-5 is a cationic germicide. Do not mix with soap or anionic materials.

STORAGE AND DISPOSAL

This product must be kept under locked storage sufficient to make it inaccessible to children or persons unfamiliar with its proper use. Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container.

PESTICIDE DISPOSAL

Pesticide, spray residue, or waste that cannot be used or chemically reprocessed should be disposed of at a landfill approved for pesticides or buried in a safe place away from water supplies.

CONTAINER DISPOSAL

Triple rinse (or equivalent) and dispose in an incinerator or landfill approved for pesticide containers, or bury in a safe place. Consult federal state or local authorities for approved alternative procedures such as limited open burning.

INSTRUCTIONS FOR FORMULATION

It is a violation of federal law to use the product in a manner inconsistent with its labeling.

Formulators using this product are responsible for EPA registration for their formulation products. Refer to technical bulletin on FMB 451 Quats for instructions for formulation and other information.

FMS 451 QUATS

FMS 451 Quats are designed for formulation of disinfectants, sanitizers, fungicides, water treatment agents, oil field detergents, and other general industrial, oil field, water treatment and water utility products. FMS 451 Quats consist of an effective system of active ingredients that are unique in their ability to purify water, provide you with an efficient method for formulation of disinfectants/sanitizers.

Our Quality Control Department has conducted extensive testing and evaluation, developing a **ACO Bactericidal** product to meet your needs. Please contact our Field Application.

AUG 20 1982

Chemical Composition	FMB	FMB	FMB	FMB

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

The FMB 451 Quats are effective against the representative gram-positive pathogen *Staphylococcus aureus*, the representative gram-negative pathogen *Salmonella choleraesuis*, and the representative hospital pathogen *Pseudomonas aeruginosa*.

FMS 451 Quats are designed for formulation of germicides. For example, disinfectant cleaners in hospitals and nursing homes, as disinfectant cleaners for use in schools and colleges, hotels and motels, office buildings, households, medical and dental offices, veterinary clinics, dairy and poultry farms.

FMS 451 Quats are for disinfecting pre-cleaned hard, non-porous surfaces in 10 minutes with a recommended use solution of 800 ppm active dual for hospital use areas and with a recommended use solution of 400 ppm active dual for general use areas.

Organism	FMB Quat	No. of Positives	No. of Carriers Tested
<i>Pseudomonas aeruginosa</i>	800 ppm	0	180
<i>Staphylococcus aureus</i>	400 ppm	0	180
<i>Salmonella choleraesuis</i>	400 ppm	0	180

Registration Division (15-167)

Figure 1. The effect of the number of nodes on the performance of the proposed algorithm.

193-451 shall be effective as of the first day of January, 1934, and the following shall be the maximum ad valorem tax levied by the County of Orange, in addition to taxes levied by the State of California. The amount to be levied for each year, except that when 193-451 can not be used on the following surfaces, in public calling places:

EPR-481 Quats and EPR-481 Quats II do not contain chlorine. In one minute with the recommended use conditions, EPR-481 Quats can reduce up to 700 ppm water hardness (calculated as CaCO₃) at pH 7.0 and 25°C. EPR-481 Quats are in compliance with 21 CFR §178.1010 (100%) and (c)(4).

FMB 451 Quarks are fermions that form hadrons, like protons, neutrons, pions, kaons, and rho mesons. They are also found in atomic nuclei, and as constituents of nucleons, and in nuclei.

For use in plants operating under the USDA Poultry, Meat, Rabbit, Shell Egg Grading, and Egg Products, FFB 4-1 Quats are for use as a sanitizer on all surfaces not always requiring a rinse, before using these compounds, food products, and packaging material must be removed from the room or carefully protected. A potable water rinse is not required following use of these compounds on previously cleaned hard surfaces provided that the surfaces are adequately cleaned before contact with food so that little or no residue remains which can adulterate or have deleterious effect on edible products. A potable water rinse is required following use of these compounds under conditions other than those stated above.

For use sanitizing dishes, silverware, glasses, and other food utensils at 200 ppm active. FMB 451 Quats may be used on food contact surfaces in public eating places. Do not rinse with potable water.

Food eggs that have been sanitized with FMB 451 Quat shall be subjected to a thorough washable water rinsing only if they are broken for use in the manufacture of egg products.

For use to sanitize the udders, flanks, and teats of dairy cows. Do not rinse with potable water. Use a fresh towel for each cow. Avoid contamination of sanitizing solution by dirt and soil. Do not dip towel back into sanitizing solution. When solution becomes visibly dirty, discard and provide fresh solution.

FMB 451 Quats have been tested for ten different nitrosamines, including n-nitroso-diethanolamine (HDEC). It was determined that the FMB 451 Quats contained less than 20 parts per billion (ppb) HDEC and for the other nine nitrosamines FMB 451 Quats contained less than 200 ppb.

Formulators using this product are responsible for EPA registration as their authorizer for their formulation pursuant to the End-Use Labeling and Registration of Pesticides (EUREP) (40 CFR 162.10 et seq.). A complete registration listing is available on request.

Authorization for use of formulated products in USDA-inspected meat, poultry, and food processing plants must be obtained by the formulator from USDA.
