 and sanitizer. The disinfectant Quat is a quaternary
 ammonium compound which is effective against a wide variety
 of microorganisms including bacteria, fungi, and viruses.

JAQ Powdered Quat is a technical chemical designed for formulation of
 disinfectants. For example, disinfectants in hospitals and nursing homes,
 and disinfectants for use in schools and colleges, other public institutions
 and households. JAQ is also designed for formulation of swimming pool
 disinfectants.

We recommend the following use solutions for the formulated product

HOSPITAL DISINFECTION	800 ppm quat
GENERAL OR POLYMER DISINFECTION	400 ppm quat
SANITIZATION	200 ppm quat

This type of Powdered Quat is effective against Staphylococcus aureus and
 E. coli as a sanitizer in 800 ppm hard water as tested by the A.O.A.C.
 Germicidal and Detergent-Sanitizer Method at 200 ppm quat. In addition
 to use on food processing equipment and utensils, JAQ Powdered Quat may
 be used on food-contact surfaces in public eating places.

JAQ Powdered Quat is designed for formulation of sanitizer-cleaners for
 use in restaurants and bars, dietary areas, farms, USDA meat and poultry
 processing plants, and food processing plants. Formulators who claim that
 their product may be used in plants operating under USDA Inspection Program
 require specific approval from the Food Ingredient Division, S.E.S.O.S., U.S.
 Department of Agriculture.

JAG Powdered Oat is for use in the preparation of infant contact milk. In 10 minutes with the recommended concentration (100% active on 100 parts) in water (not for the water content of the milk or other). All by the number of children to be fed. No special instructions are required.

For use in the preparation of infant contact milk, use the recommended concentration (100% active on 100 parts) in water (not for the water content of the milk or other). All by the number of children to be fed. No special instructions are required.

JAG Powdered Oat is for use in the preparation of infant contact milk. In 10 minutes with the recommended concentration (100% active on 100 parts) in water (not for the water content of the milk or other). All by the number of children to be fed. No special instructions are required.

Formulation for the preparation of infant contact milk for EPA registration and PMS certification. For use in the preparation of infant contact milk, use the recommended concentration (100% active on 100 parts) in water (not for the water content of the milk or other). All by the number of children to be fed. No special instructions are required.

PMS: 100% active on 100 parts. Do not use in case of contact. Avoid alcohol. Avoid contact with eyes. Avoid contact with food. Avoid contact with water. Avoid contact with food. Avoid contact with water. Avoid contact with food. Avoid contact with water. Avoid contact with food.

STATEMENT OF PRACTICAL TREATMENT

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsion may be needed.

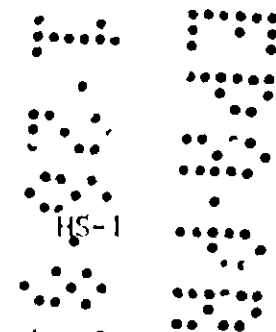

Consult the label for other instructions and precautionary statements before use of JAG Powdered Oat.
