Water Treatment**

Vista Golden UltraSolution Humidifier Bacteriostatic Water Treatment is a product to effectively control lime scale build up, and inhibit the growth of odor-causing bacteria and algae in ultrasonic humidifiers. Used as directed, it is guaranteed to perform as stated on the label in the water tanks of all ultrasonic humidifiers.

DIRECTION FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Be sure your humidifier is thoroughly clean before each heating season (use of UltraSolution Humidifier Cleaner is recommended for this purpose).

For every gallon of water contained in the humidifier tank, add no more than two capfuls (16ml.) of Golden UltraSolution. Fill cap to top. When refilling, add only two capfuls of Golden UltraSolution for every additional gallon of water.

Note:

If you reside in a very hard water area, the following alternative is recommended. Pour warm tap water into separate container or pail. Add two caps full of Golden UltraSolution Humidifier Bacteriostatic Water Treatment to each gallon of water, wait at least four hours; then pour cooled water into ultrasonic humidifier making sure bottom two inches of water remain in container. This method of precipitating minerals should markedly reduce mineral residue and thus aid efficient humidification.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: keep out of reach of children. Causes eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling. Avoid contamination of food.

STATEMENT OF PRACTICAL TREATMENT

If in eyes or contact with skin, flush with plenty of water. Get medical attention if irritation persists.

DISPOSAL

Do not reuse empty container. Wrap container and put in trash collection.
