SEP 25 2009

Subject: Label Notification(s) for Pesticide Registration Notice 2007-4 and 98-10

Dear Mr. Kellogg:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 and 98-10 dated July 20, 2009 for:

EPA Registration 48234-2

Regal RonStar Plus

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and 98-10 and finds that the label change(s) requested falls within the scope of PRN-2007-4 and 98-10. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact me directly at 703-305-6249 or Nicole Williams of my staff at 703-308-5551.

Sincerely,

A handwritten signature in black ink, appearing to read "Linda Arrington".

RE: Regal Chemical Company - Regal RonStar Plus (EPA Reg. No. 48234-2)
Revision to Container Disposal Instructions per PRN 2007-4

Dear Ms. Miller,

On behalf of Regal Chemical Company please find the enclosed label notification revising the container disposal instructions for Regal RonStar Plus per PRN 2007-4. In addition to changes to the container disposal instructions, we have also corrected a typographical error appearing in the first sentence at the top of the front panel. The sentence "FOR SALE FOR USE AND USE BY PROFESSIONAL APPLICATORS ONLY" has been revised to read, "FOR SALE TO AND USE BY PROFESSIONAL APPLICATORS ONLY".

In support of this notification submission, we submit the following documents:

1. Completed Application for Registration (EPA Form 8570-1)
2. One (1) copy of the Regal RonStar Plus labeling with changes tracked
3. One (1) copy of the Regal RonStar Plus labeling with changes incorporated
4. Certification with Respect to Label Integrity
5. One (1) copy of the Regal RonStar Plus labeling on CD
6. Letter of Authorization

Please feel free to contact me by phone (253) 853-7369 or by email at Mike@PyxisRC.com if you have any questions or need any additional information.

Sincerely,

Michael Kellogg
Michael Kellogg

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

CAUTION

Harmful if absorbed through skin. Harmful if inhaled. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Avoid breathing dust.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are made of any waterproof material. If you want more options, follow the instructions for category A on an EPA chemical-resistance category selection chart.

Loaders, applicators, and other handlers must wear:

- Long-sleeved shirt and long pants,
- Shoes plus socks, and
- Chemical-resistant gloves

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing/PPE immediately if pesticides get inside. Then wash body thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not contaminate water by cleaning of equipment or disposal of wastes. Regal Ronstar Plus[®] should not be used in areas where irrigation or rainfall results in direct or indirect (via ditches and canals) contamination of surface waters through dissolved runoff or erosion of soil particles to which oxadiazon is absorbed.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read entire label before using this product. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance to its labeling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to this label about personal protective equipment (PPE) and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard. Do not enter or allow entry into treated areas during the restricted entry interval (REI) 12 hours.

PPE required for early entry to treated areas, that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil or water is:

- Coveralls,
- Shoes plus socks, and
- Chemical-resistant gloves made of any waterproof material

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Do not enter or allow others to enter the treated area until dusts have settled. If soil incorporation is required after the application, do not enter or allow others to enter the treated area (except those persons involved in the incorporation) until the incorporation is complete. If the incorporation is accomplished by watering-in, do not enter or allow others to enter the treated area until the surface is dry after the watering-in.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage: Do not store in or around the home.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Completely empty bag into application equipment. Then offer for recycling if available or dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State-state and local authorities, by burning. If burned, stay out of smoke.

GENERAL INFORMATION

Regal Ronstar Plus is a selective, preemergent herbicide for the control of many annual grasses and broadleaf weeds in turf and on a wide variety of woody ornamental shrubs, vines and trees. Regal Ronstar Plus controls weeds by killing the young weed seedlings as they come in contact with the herbicide during germination. Apply Regal Ronstar Plus with a properly calibrated granular applicator that will apply the granules uniformly (uniform application is essential for satisfactory weed control). Calibrate the applicator prior to use, according to the manufacturer's directions, and check frequently during the application to be certain that the equipment is working properly. Do not allow domestic animals to graze treated areas. Avoid contamination of water intended for irrigation and domestic use.

Restrictions:

- **Not for use on home lawns**
- **Do not apply this product through any type of irrigation system.**
- **Do not apply aurally.**
- **Do not apply more than 300 pounds of product per acre per year (equivalent to 6 pounds ai/A/year) except in areas of heavy weed infestation.**
- **In areas of heavy weed infestation, do not apply more than 375 pounds of product per year (equivalent to 7.5 pounds ai/A/year).**
- **Do not apply more than 200 pounds of product per acre (equivalent to 4 pounds ai/A) in a single application.**

TURF

For use in established perennial Bluegrass, Bentgrass, Bermudagrass, Buffalograss, Perennial Ryegrass, St. Augustinegrass, Seashore Paspalum, Tall Fescue and Zoysia turf; such as, fairways, parks, golf courses and lawns. Rake turf area free of leaves, mowing if necessary, so

granules reach soil surface. Measure area to be treated and uniformly apply required amount, using a fertilizer spreader. Cross-treating with one-half required amount in each direction will give best results. Do not apply to wet turf. For best results, water-in the product as soon as practical after application.

PREEMERGENT WEED CONTROL

Weeds Controlled	Amount of Regal Ronstar Plus		Directions
	Per acre	Per 1000 sq. ft	
Crabgrass (<i>Digitaria spp.</i>) Goosegrass (<i>Eleusine indica</i>) Field Sandbur (<i>Cenchrus incertus</i>) Annual Sedge (<i>Cyperus compressus</i>)	100-200 lbs.	4 1/4 – 4 1/2 lbs.	Apply late winter or early spring prior to seed germination. Application made after March or April may not be fully effective.
Annual Bluegrass (<i>Poa Annua spp.</i>) (See note below)	100-200 lbs.	2 1/4 – 4 1/2 lbs.	Apply in late summer to early fall prior to seed germination.
Virginia Buttonweed (<i>Diodia virginiana</i>) Pigweed (<i>Amaranthus spp.</i>) Florida Pusley (<i>Richardia scabra</i>) Oxalis (<i>Oxalis spp.</i>) Stinging Nettle (<i>Urtica dioica</i>) Carpetgrass (<i>Axonopus offinis</i>)	200 lbs.	4 1/2 lbs.	Apply in early spring prior to seed germination.

NOTE: In many areas, annual bluegrass exists as at least two biotypes or subspecies of *Poa annua*. The true annual biotype is *Poa annua* spp. *annua* which germinates every year from seed, while the biotype that behaves like a perennial is *Poa annua* spp. *reptans*. This perennial biotype can survive through the summer and established plants will not be controlled by this product. Consult the extension service or University weed specialists in your area for more information.

FALL APPLICATION FOR SPRING WEED CONTROL IN COOL SEASON TURF

Weeds Controlled	Amount of Regal Ronstar Plus		Directions
	Per acre	Per 1000 sq. ft	
Crabgrass, Goosegrass, and other annual weeds	150-200 lbs.	3 3/8 – 4 1/2 lbs.	For use in Bluegrass, Bentgrass, Perennial Ryegrass and Tall Fescue turf. Make application in the fall after turf has become dormant. For late, fall applications, seeding into treated areas should be delayed until 4 months after green up.

ANNUAL BLUEGRASS CONTROL IN BERMUDAGRASS FAIRWAYS OVERSEEDED WITH PERENNIAL RYEGRASS ONLY

Weeds Controlled	Amount of Regal Ronstar Plus		Directions
	Per acre	Per 1000 sq. ft	
Annual Bluegrass (<i>Poa Annua</i> spp.) and other annual weeds	100 lbs.	2 1/4 lbs	Apply in late summer to early fall prior to <i>Poa annua</i> spp. seed germination. Any <i>Poa annua</i> spp. established when this product is applied will not be controlled. Regal Ronstar Plus will only control the <i>Poa annua</i> spp. that is established from seed every year. Regal Ronstar Plus should be applied no closer than 60 days prior to overseeding. NOTE: Do not use where <i>Poa trivialis</i> is present in overseed mix.

NOTE: In many areas, annual bluegrass exists as at least two biotypes or subspecies of *Poa annua*. The true annual biotype is *Poa annua* spp. *annua* which germinates every year from seed, while the biotype that behaves like a perennial is *Poa annua* spp. *repans*. This perennial biotype can survive through the summer and established plants will not be controlled by this product. Consult the extension service or University weed specialists in your area for more information.

ANNUAL WEED CONTROL DURING BERMUDAGRASS, ZOYSIAGRASS, SEASHORE PASPALUM AND TROPIC LALO (*PASPALUM HIERONYMII*) ESTABLISHMENT FROM SPRIGS

Weeds Controlled	Amount of Regal Ronstar Plus		Directions
	Per acre	Per 1000 sq. ft	
Crabgrass, Goosegrass, and other annual weeds	100-150 lbs.	2 1/4 - 3 3/8 lbs.	For Bermudagrass, make application immediately prior to or immediately after sprigging. For Seashore Paspalum, make application 10 to 14 days after sprigging. Applications made close to the time of sprigging may cause objectionable Seashore Paspalum injury. Disturbance of the soil surface after Regal Ronstar Plus application may disrupt the herbicide barrier and reduce effectiveness. Irrigate immediately after application for best results.

For St. Augustinegrass and Bentgrass turf, do not exceed the rate of 150 pounds per acre (3 pounds active ingredient) of Regal Ronstar Plus.

Do not apply to Bentgrass turf mowed at less than 3/8 inch.

Regal Ronstar Plus may cause discoloration of Bentgrass, Bermudagrass and St. Augustinegrass. This discoloration is temporary and normally outgrown within 2 to 3 weeks.

Avoid contact with flowers and shrubs except as recommended elsewhere on this label. Do not apply Regal Ronstar Plus to newly seeded areas. Seeding into treated areas should be delayed until 4 months after treatment except as noted above. Do not apply to Dichondra or Centipedegrass. Regal Ronstar Plus should not be used on putting greens or tees because of the varying cultural practices used.

When making applications to Tropic Lalo, applications must be made 0-12 days after sprigging. Do not use in areas where endangered Hawaiian Goose or nene (*Branta sandvicensis*), Hawaiian Duck (*Anas wyvilliana*), Hawaiian Stilt (*Himantopus mexicanus knudseni*), and Hawaiian Moorhen (*Gallinula chloropus sandvicensis*) may feed.

WOODY ORNAMENTAL SHRUBS, VINES, TREES AND CONIFER NURSERY APPLICATION

It is impossible to test every species and variety of ornamental or nursery plants. Plant tolerance to Regal Ronstar Plus has been found to be acceptable in the specified genera and species. Neither the manufacturer nor the seller has determined whether or not Regal Ronstar Plus can safely be used on plants not specified on this label. The professional user should determine if Regal Ronstar Plus can be used safely prior to use.

Apply Regal Ronstar Plus anytime during the year, prior to weed seed germination, for weed control. Regal Ronstar Plus can be applied to both newly transplanted and established ornamentals. Application can be made to actively growing or dormant ornamentals. Rainfall or overhead irrigation after application of Regal Ronstar Plus will improve weed control activity. Regal Ronstar Plus should not be mixed into the soil. Cultivating or disturbing the soil may reduce the weed control activity of Regal Ronstar Plus. Do not apply to wet foliage or under conditions in which granules will collect on leaves. Do not apply in greenhouses as plant injury may result from co-distillation of Regal Ronstar Plus active ingredient onto leaf surfaces in condensation.

Amount To Use

Ground Application — Apply Regal Ronstar Plus broadcast to ornamentals at 100 to 200 pounds of product per acre (or 2 1/4 to 4 1/2 pounds per 1,000 sq. ft.) depending on the weeds to be controlled, as listed on the following page. Remove existing weed growth before application.

ANNUAL BROADLEAF WEEDS

Bittercress	Bristly Oxtongue	Carpetweed
Cheeseweed	Common Groundsel	Common Purslane
*Evening Primrose	Fiddleneck	Fireweed
*Galinsoga	Garden Spurge	Golden Ragwort
Lambsquarters	** Liverwort	Niruri
Pennsylvania Smartweed	Petty Spurge	**Prostrate Spurge
Redroot Pigweed	Shepherdspurge	Sensitive Plant
Sow Thistle	Speedwell	Spiny Amaranth
Spotted Catsear	*Swinecress	Yellow Woodsorrel (Oxalis)

*Use 150 to 200 pounds (3.0 to 4.0 pounds of active ingredient) per acre for less susceptible weeds.

**Use 200 pounds (4.0 pounds of active ingredient) per acre for less susceptible weeds.

ANNUAL GRASSES

Annual Bluegrass	Annual Sedge	*Barnyardgrass
Bristly Foxtail	Crabgrass	Fall Panicum
Green Foxtail	Goosegrass	**Jungle Ricegrass

**Panama Paspalum

Ripgut Bromegrass

Wild Oats

*Use 150 to 200 pounds (3.0 to 4.0 pounds of active ingredient) per acre for less susceptible weeds.

**Use 200 pounds (4.0 pounds of active ingredient) per acre for less susceptible weeds.

CROP TOLERANCE

Regal Ronstar Plus is recommended for use on a wide variety of ornamental species and ground covers in container, field grown and landscape planting situations. Regal Ronstar Plus may be used at the recommended rates on the following species.

ESTABLISHED ORNAMENTALS AND GROUND COVERS

Abutilon	Acacia	Agapanthus
Allamanda, Common	Andromeda	Aralia
