RAM pool chemicals

GRANULAR Chlorinating Concentrate STABILIZED

SWIMMING POOL ALGAEICIDE AND GERMICIDE

NO SCALE FORMING MINERALS OR INDISSOLUBLE CONVENIENT COMPLETE POOL CARE

NOTE: INGREDIENTS
Listed on back of container

EPA REG. NO. 482421
EPA EST. NO. 482421X01

DANGER: KEEP OUT OF REACH OF CHILDREN

See back of container for first aid instructions

NET WT. 25 LB.

This product is meant to help keep bacteria and algae under control in swimming pools.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

CONTAINS: Sodium Dichloro S-triazinetrione

Active ingredient 99%

Other ingredients 1%

New Concept in Pool Sanitation: Completely soluble granules that leaves no residue, contains no scale forming minerals, not burned off by the sun, does not upset the pH.

DIRECTIONS:

For pool water that has never been treated, when refilling pool, add CHLORINE STABILIZER (BOOSTER) following package directions. An alternative method for start up would be to add 11 ozs. of GRANULAR CHLORINATING CONCENTRATE per 10,000 gallons of water as a shock dose to satisfy the chlorine demand of water. This dose should be repeated until a chlorine residual of 1.2 ppm is obtained. Then a dosage of 1.2 ozs. per 10,000 gallons of water (1 teaspoonful per 1,000 gallons) could be added. This dosage is needed to maintain a 1.2 ppm chlorine residual. Use a good test kit at least once a day and add sufficient GRANULAR CHLORINATING CONCENTRATE to maintain a residual of 1.2 ppm. pH must be maintained at 7.2-7.8. Frequency of application will depend upon number of people swimming, water temperature and other conditions.

SUPERCHLORINATION: At least once a week and at times of great use, an extra quantity of the amount of 11 ozs. per 10,000 gallons of GRANULAR CHLORINATING CONCENTRATE should be added to help keep water sparkling clear.

TO CALCULATE GALLONAGE:

Rectangular Pools: Multiply length of pool x width x average depth (in feet) x 7.5
Round Pools: 0.785 x diameter of pool x average depth (in feet) x 5.9

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin or eye damage. May be fatal if swallowed. Do not get in eyes. Wash thoroughly with goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

PRACTICAL TREATMENT (FIRST AID): If swallowed, do not induce vomiting. If on skin, flush with water for at least 15 minutes. If irritation persists, get medical attention. If in eyes, flush with water for at least 15 minutes. Get medical attention.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, public water supplies, or discharge with an NPDES permit. For guidance contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS (STRONG OXIDIZING AGENT): Strong Oxidizing Agent. Mix only with water to clean dishes. Do not add this product to any cleaning solution containing any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a violent reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. In case of contamination or decomposition do not touch or inhale. If possible isolate container in open air well-ventilated area. Flood with large amount of water if necessary.

STORAGE AND DISPOSAL: Keep product in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat, sparks, flames. In case of decomposition, isolate container, flood with large amounts of water to dissolve all material, before discharging. Place in collection or disposal appropriate for area. Store in a safe place.
