TABLETS

Chlorinating Concentrate

STABILIZED

SUPER CHLORINATING TABLETS FOR WATER DISINFECTION

24 HR. CHLORINE RESIDUAL FOR ROUND THE CLOCK ACTIVITY
COMPLETELY SOLUBLE, NO MINERAL SCALE BUILD-UP

ACTIVE INGREDIENTS

Trichloro-s Triazinetrione 99%
Inert Ingredient 1%
Approximately 99% available chlorine

EPA REG NO. 48242
EPA EST NO. 3482-24
EPA EST NO. 3482-PA-1

DANGER: KEEP OUT OF REACH OF CHILDREN
See back panel for First Aid and additional precautions
NET WT. 40 LB.

This product is meant to help keep bacteria
and algae under control in swimming pools.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DIRECTIONS FOR USE:

1. Before using TABLETS Chlorinating Concentrate make sure there is sufficient chlorine residual (3.5-5.0 ppm) in the swimming pool by superchlorination. Next day add 1 lb. Chlorine Stabilizer for each 4,000 gallons of water.
2. Place approximately 7 TABLETS for each 2,500 gallons of pool water either into a tablet dispenser and float it in the pool or directly into skimmer basket if one is available. In no case should TABLETS Chlorinating Concentrate be thrown directly into or on a vinyl liner as bleaching will result.
3. A good pool water test kit should be used at least once a day to check both pH and chlorine levels. pH should be between 7.2-7.6 and adjusted as necessary. Chlorine should be between 1-2 ppm. If chlorine level is too low add more TABLETS Chlorinating Concentrate until there is enough to maintain the 1-2 ppm.

This product can be used in any dispenser that uses Chlorine Concentrate tablets or sticks. Should not be mixed with any other kind of chlorine as an explosion could result.
NOTE: During heavy bathing loads, very hot weather, rain, etc. and at least once a week, chlorine residual should be raised to 3.5-5.0 ppm with granular chlorine (super chlorinated). It is preferable to do this after swimming day so that pool will have a chance to come back to the 1-2 ppm before swimmers go back in next day. TABLETS Chlorinating Concentrate will last approximately 5-7 days depending upon temperature and amount of water flow. Since there are approximately 48 TABLETS to the pound, a 2 lb. jar will last a 2,500 gal. pool 7 weeks, a 5,000 gal. pool approximately 3 1/2 weeks and a 10,000 gal. pool a little less than 2 weeks. A 4 lb. jar will last a 2,500 gal. pool 14 weeks; a 5,000 gal. pool 7 weeks; and a 10,000 gal. pool approx. 4 weeks etc.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

PRACTICAL TREATMENT: (FIRST AID): If swallowed feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS STRONG OXIDIZING AGENT: Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseat container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool dry, well ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or bury in a safe place.
