STICKS

Chlorinating Concentrate

STABILIZED

SUPER CHLORINATING STICKS FOR WATER DISINFECTION

24 HR. CHLORINE RESIDUAL FOR ROUND THE CLOCK ACTIVITY.
COMPLETELY SOLUBLE, NO MINERAL SCALE BUILD-UP.

Active Ingredients

Trichloro-s Triazinetrione
Inert Ingredient

99%
1%

Approximately 90% available chlorine

EPA REG. NO: 3482-86
EPA EST. NO: 3482-PA-1

DANGER: KEEP OUT OF REACH OF CHILDREN.
See back panel for First Aid and additional precautions

NET WT. 25 LBS.

ACCEPTED
with COMMENTS
in EPA Letter Dated:

DEC 7 1982

Under the Federal Insecticide,
Fungicide, and Rodenticide Act
as amended, for the purpose of
registration under FIFRA, 7 U.S.C. 136

48242-3

This product is meant to help keep bacteria
and algae under control in swimming pools.

DIRECTIONS FOR USE:

1. Before using STICKS CHLORINATING CONC. make sure there is sufficient chlorine residual (4.5-5.0 ppm) in the swimming pool by superchlorination. Next day add 1 lb Chlorine Stabilizer for each 4,000 gallons of water.
2. Place approximately 1 STICK for each 7,500 gallons of water per week either into a stick dispenser and float it in the pool or directly into skimmer basket if one is available. In no case should STICKS CHLORINATING CONCENTRATE be thrown directly into a vinyl liner as bleaching will result.
3. A good pool water test kit should be used at least once a day to check both pH and chlorine levels. pH should be between 7.2-7.6 and adjusted as necessary. Chlorine should be between 1-2 ppm. If chlorine level is too low add more STICKS CHLORINATING CONCENTRATE until there is enough to maintain the 1-2 ppm.

This product can be used in any dispenser that uses Chlorine Concentrate tablets sticks. Should not be mixed with any other kind of chlorine as an explosion could result. NOTE: During heavy bathing loads, very hot weather, rain, etc. and at least once a week, chlorine residual should be raised to 3.5-5.0 ppm with granular chlorine (superchlorinated). It is preferable to do this after swimming day so that pool will have a chance to come back to the 1-2 ppm before swimmers go back in next day. STICKS CHLORINATING CONCENTRATE will last approximately 5-7 days depending upon temperature and amount of water flow. Since there are approximately 2 STICKS to the pound, a 1 lb jar will last a 5,000 gal. pool for 7-10 days, a 10,000 gal. pool approximately 10 days, and a 30,000 gal. pool approximately 15 days.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

PRACTICAL TREATMENT: (FIRST AID): If swallowed feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS STRONG OXIDIZING AGENT: Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reuse container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool dry, well ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or bury in a safe place.

ACCEPTED
BY THE FEDERAL GOVERNMENT

DATE 2 1982

Under the Federal Food, Drug, and Cosmetic Act

48242-3

This product is meant to help keep bacteria and algae under control in swimming pools

DIRECTIONS FOR USE:

Before using STICKS CHLORINATING CONC. make sure there is sufficient stabilizer (5.50 ppm) in the swimming pool by superchlorination. Next day add 1 STICK Stabilizer for each 4,000 gallons of water.

Place approximately 1 STICK for each 7,500 gallons of water per week in the pool dispenser and float it in the pool or directly in the skimmer basket. In the case of a pool liner as bleaching will result.

A good pool water test kit should be used at least once a day to check chlorine levels. pH should be between 7.2-7.6 and adjusted as necessary. Chlorine levels should be between 1.2 ppm. If chlorine levels are low add more STICKS CHLORINATING CONCENTRATE until there is enough to maintain the 1.2 ppm.

This product can be used in any dispenser. STICKS Chlorinating Concentrate tabs should be used in the dispenser with any other tabs.

NOTE: During heavy bathing loads, very hot weather, etc., and at least once a week chlorine levels should be raised to 3.5-4.0 ppm with a chlorine dispenser. It is preferable to do this after swimming day so that pool water has time to return to the 1.2 ppm before swimmers get back to pool. STICKS CHLORINATING CONCENTRATE will last approximately 7 days depending on temperature and amount of water flow. Since there are approximately 2 STICKS per 100 gallons of water, last a 100 gal pool for 7 days, a 1000 gal pool for 14 days, and a 10000 gal pool for approximately 14 days.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.
