DANGER. FATAL OR HARMFUL IF SWALLOWED, MAY PRODUCE SEVERE CHEMICAL BURNS. DO NOT ALLOW CONTACT WITH EYES, SKIN, MUCOUS MEMBRANES, OR CLOTHING. STRONG OXIDIZER. CONTACT WITH ORGANIC MATERIAL MAY CAUSE FIRE OR EXPLOSION.

Keep from contact with clothing and other combustible materials. Remove and wash contaminated clothing promptly. While SHOCK by itself is not a combustible material, it must not be mixed or contaminated with any foreign material such as household products, soap products, paint products, solvents, acids, pool chemicals, vinegar, beverages, oils, pine oil, dirty rags, etc. Contamination or mixing with these types of chemicals and products may result in fire and the fire can be of great intensity. Prevent any burning material such as a lighted cigarette from falling into product. Drench fires with water. Flush spilled product with water. Dispose of spilled product by flushing with large amount of water. Keep in a cool dry place in original container. Always flush thoroughly with water and dispose of properly.

AT TIME OF POOL OPENING—Supply demand of raw water. Apply one ounce water. After superchlorination, maintain chlorine level using a suitable chlorine test kit and follow container label. Test pH frequently. Always determine pH by test kit.

PRACTICAL TREATMENT (FIRST AID):

External—Rinse skin or eyes with plenty of water for 15 minutes. If irritation to skin persists, get medical attention.

For eyes—call a physician immediately.

Internal—drink large quantities of water or milk. Follow with milk of magnesia, vegetable oil, or beaten eggs. Call physician immediately.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Apply this product only as specified on this label.

DIRECTIONS FOR USE

SHOCK is designed for rapid control of algae and for superchlorination at time of pool opening.

FOR CONTROL OF ALGAE—These quick dissolving granules will destroy most strains of unsightly algae within 24 hours. Dead algae will come to rest at the pool floor. Remove by vacuuming frequently.

DOSAGE: In pools without stabilizer, greenish color and slimy feeling, SHOCK 1000 gallons of water by broadcasting granules in the pool. Before allowing swimmers to use the pool, test pH frequently. DO NOT use if pH is below 7.2. If algae persists, repeat the treatment.

Continuous application of regular maintenance chlorine container label. Test pH frequently. pH 7.2—7.6.

To prevent any possible bleaching effect, treat pool in a clean plastic bucket of water.

In pools stabilized with cyanuric acid, superchlorination is necessary to control algae. Apply one ounce of SHOCK per 1000 gallons of average pool water. If average pool temperature is above 80°F, repeat treatment when the average pool water temperature is above 80°F.
