

## **SAFETY**

PROXEL PL can cause chemical burns to eyes and skin. Eye and skin contact should be avoided by the use of a face shield or splash proof safety goggles and rubber gloves. Techniques which eliminate direct handling, such as metering devices, are recommended.

PROXEL PL has little or no systemic effect by absorption of the skin. The dermal LD50 in rats is greater than 2 g per kg body weight. The oral LD50 for rats is in the range of 0.625 to 1.25 g per kg body weight.

If PROXEL PL is ingested, the patient should be given copious quantities of fluids, e.g., milk to drink. If water is given, two tablespoonsful of vinegar or orange juice or lemon juice should be added if available. Vomiting should not be induced. Consult physician immediately.

PROXEL PL on the skin should be removed by rinsing with copious quantities of water or by washing with soap and water. Consult a physician.

For splashes in the eye, immediately flush eyes with plenty of water and after emergency flushing, obtain medical treatment.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. The TLM for rainbow trout and blue gill sunfish are 0.85 ppm for the trout and 5.50 ppm for the blue gill sunfish.

Do not reuse empty containers. Puncture, crush, and bury in sanitary landfill in accordance with state and local pollution regulations.

Attention: Allen P. Bollmeier

Gentlemen:

Subject: BioBan® CS-1135 Antimicrobial Agent  
EPA Registration No. 48301-8  
Your Submission Dated July 30, 1990  
EPA Received Date August 3, 1990

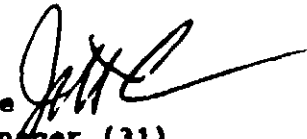

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable.

The removal of 3,4,4-trimethyloxazolidine from the active ingredient listing, because of more advanced analytical techniques for analysis which indicate that it is found as an impurity by reacting formaldehyde with 2-monomethylamino-2-methyl-1-propanol, is acceptable.

The revised Confidential Statement of Formula reflects 3,4,4-trimethyloxazolidine to be an impurity and it agrees with the revised label and is acceptable.

If you have any questions concerning this letter, please contact Karen M. Leavy at (703) 557-3966.

Sincerely yours,

John H. Lee   
Product Manager (31)  
Antimicrobial Program Branch
