DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

To provide fast relief from the rancidity which can occur in metalworking fluids, add 1 tablet for each 25 gallons of solution to the machine reservoir once a week, preferably on Friday afternoon or before the machine will be idle for some time. For extremely fouled systems, add 2 tablets weekly per 25 gallons. Allow fluid to circulate for at least 1 hour after addition.

See our Product Technical Bulletin for additional information.
