HOW TO USE:

AS A LIQUID SPRAY: For one gallon of spray, mix 3 to 4 tablespoon of WETTABLE DUSTING SULPHUR with an equal amount of water and stir into a thick paste, then add water slowly, stirring constantly until the gallon of water has been thoroughly combined. Apply with an ordinary sprayer. Keep well stirred at all times.

AS A DUST: wettable dusting sulphur is ready to use as it comes in the package. This canister is furnished with punch-out holes on the top for dusting directly from the package or use in a suitable hand duster.

WHEN TO APPLY:

Apply early in the morning or in the cool of the evening when the air is still. Thoroughly cover all stems, leaves, and blossoms on both upper and lower surfaces. As a fungicide, frequent applications should be made early in the season. During the summer and fall, applications should be made at 10 day intervals. As an insecticide, apply carefully when the insects threaten and repeat every few days until the pests are eliminated.

CAUTION: Do not apply to foliage within one week after applying any spray containing an oil emulsion. Do not apply any spray containing an oil emulsion within 30 days to foliage dusted or sprayed with Sulphur. Sulphur may burn foliage if applied when temperature is high (90° to 95° F). Do not make applications at this time.
