

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed. Avoid contact with skin and eyes. Wash thoroughly after use. Sweep up spills on walks or patios. Bury sweepings and hose area. Do not allow children or pets on treated lawns until BETASAN 7-G has been watered into the soil and grass is completely dry. Do not contaminate food, food or drinking water.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not contaminate any body of water by cleaning of equipment or disposal of wastes. Do not apply directly to water.

Apply this product only as specified on this label.

Read all label directions before using.

BETASAN 7G

Pre-Emergence Grass Killer

GRANULES - A Selective Herbicide for Pre-Emergence Control
of Crabgrass and Annual Bluegrass
in Turf, Ornamentals, and Ground Covers

ACTIVE INGREDIENT:

S-(O, O-diisopropyl phosphorodithioate) of N-(2-
mercaptoethyl) benzenesulfonamide..... 7.0%

INERT INGREDIENTS:

7.0%

93.0%

TOTAL

100.0%

Contains 7 Pounds Active Ingredient Per 100 Pounds

U.S. Patent Nos. 3,203,153, 3,298,819

Keep Out Of Reach Of Children

CAUTION

STATEMENT OF PRACTICAL TREATMENT

IF IN EYES—Rinse thoroughly with water for 15 minutes.
Get medical attention if irritation persists.

FOR ADDITIONAL PRECAUTIONARY STATEMENTS

PRODUCT INFORMATION

BETASAN 7-G is recommended for use on home lawns, parks and golf courses, on ornamental plants and on ground covers for control of crabgrass, annual bluegrass and other annual weeds listed.

WEEDS CONTROLLED

Smooth Crabgrass (*Digitaria ischaemum*)
Hairy Crabgrass (*Digitaria sanguinalis*)
Redroot Pigweed (*Amaranthus retroflexus*)
Barnyardgrass (*Watergrass*) (*Echinochloa* spp.)
Lambquarters (*Chenopodium album*)
Goosegrass (*Eleusine indica*)
Annual Bluegrass (*Poa annua*)
Shepherdspurse (*Capsella Bursa pastoris*)
Deadnettle (*Henbit*) (*Lamium* spp.)

[Note: BETASAN 7-G does not control established weeds]
BETASAN 7-G should only be used for recommended uses and at recommended rates.

BETASAN 7-G is recommended for use on mineral soil only. Do not apply post-moss to lawn, ground covers or established ornamentals before treating with BETASAN 7-G.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

STORAGE AND DISPOSAL

PROHIBITIONS: Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Open dumping is prohibited.

STORAGE: Do not store near seeds or fertilizer. Keep container closed when not in use.

PESTICIDE DISPOSAL: Pesticide that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies.

CONTAINER DISPOSAL: Dispose of in an incinerator or landfill approved for pesticide containers or bury in a safe place.

GENERAL: Consult Federal, State or local disposal authorities for approved alternative procedures such as limited open burning.

DIRECTIONS FOR APPLICATION

Application of BETASAN 7G must precede emergence of weeds from the soil. Crabgrass will emerge from the soil from 4 to 6 weeks before it is visible above lawn level. If weeds are visible above the soil, it is too late to apply BETASAN 7G. Remove leaves, dead tall grass, and other debris before applying BETASAN 7G to turf areas. Weeds present around ornamentals must be removed or worked into the soil before applying BETASAN 7G.

TIMING OF APPLICATION

GENERAL COMMENTS:

GRASS LAWNS: BETASAN 7G should be applied only to well established grass lawns. BETASAN 7G can be used on the following established turf grasses:

Bahia	Perennial Ryegrass spp.	Pennsylvanian Bahia	St. Augustine
Bermudagrass spp.	Centipede	Perennial Ryegrass	Red Top
Bermudagrass spp.	Fescue spp.	Poa Trivialis	Zoysa

DICHONDRA LAWNS: BETASAN 7G can be applied to dichondra lawns at the time of seeding or any time thereafter.

ORNAMENTALS AND GROUND COVERS: BETASAN 7G should be applied only to the following well established ornamentals and ground covers:

Alyssum	Anemone	Flax	Hypericum	Tulip
Anemone	Boraginaceae	Primrose	Ice Plant	Pyracantha
Erigeron's Botton	Uphasia	Chickadee	Ivy	Hamamelis
Calendula	Holly	Narcissus	Fuchsia	Star Jasmine
Candy Tuft	Ajuga	Junkie	Stock	Tobacco
Daffodil	Campanula	Monarda	Sweet Fox	Elymus
Dahlia	Claytonia	Monarda	Wall Flower	Portulaca
Freesia	Coral Bell	Myrtle	Zinnia	Sedum
Abies	Daisy	Fruit	Rosemary	Wild Strawberry
Asclepias	Margold			

For control of Crabgrass, apply BETASAN 7G at the recommended rate (see "Rates of Application") any time from fall - September or October - through early spring. For spring and summer control, with a late winter or an early spring application, the application must be made prior to crabgrass emergence (see "Directions for Application").

For control of Annual Bluegrass and other annual weeds, apply BETASAN 7G at the recommended rate (see "Rates of Application") before the weeds emerge from the soil.

Where germination of crabgrass, annual bluegrass and other weeds extends into the late summer and early fall, a second application of BETASAN 7G at the recommended rate should be made four to five months after the initial application.

Contact weed specialists of the State Agricultural Extension Service or the State Agricultural Experiment Station for additional information, on the timing and rate of application needed will vary with local conditions.

BETASAN 7G should be applied with a lawn spreader or any other applicator that will give uniform coverage. A more uniform application can be made by spreading half of the required amount of BETASAN 7G over the area to be treated, then applying the remainder at right angles or crosswise. Avoid misses by overlapping slightly. Sprinkle the area with water for 10 to 15 minutes after application to wash the BETASAN 7G down into the soil where the weed seeds are located.

RATES OF APPLICATION

CRABGRASS: Apply 107 pounds of BETASAN 7G uniformly on one acre (4 pounds per 1,500 sq. ft.) ANNUAL BLUEGRASS, GOOSEGRASS AND OTHER ANNUAL WEEDS: Apply 180 pounds of BETASAN 7G uniformly on one acre (10 pounds per 1,500 sq. ft.)

BETASAN 7G RATE TABLE AND SPREADER SETTINGS

Make of Spreader	Desired Rate Per Acre	Desired Rate Per 1000 sq. ft.	Spreader Settings		Spread Width
			Once Over	Three Over	
Eyrke	107 lbs.	2.4 lbs.	3.3	3.0	6' x ft.
	180 lbs.	4.1 lbs.	3.5	3.5	6' x ft.
Eyrke	107 lbs.	2.4 lbs.	2.6	2.3	20 in.
	180 lbs.	4.1 lbs.	2.8	3.1	20 in.

RESEEDING

Any material that prevents emergence of annual grasses may affect new lawn grass seedlings which germinate after treatment. Proper fertilization and watering will encourage the existing turf grass to fill in the thin or bare spots formerly occupied by crabgrass.

The following procedures are suggested in order to minimize any stunting of turf grasses which may occur when reseeded into BETASAN 7G treated areas:

1. Do not reseed within 4 months after application. Renovate the area to be reseeded by raking thoroughly to aerate the soil surface. When practical, mix peat in with the soil to provide an optimum seed bed.
2. When turf diseases or physiological disorders necessitate reseeding sooner than 4 months after BETASAN 7G application, apply powdered activated charcoal prior to reseeding to deactivate the BETASAN 7G. Apply the activated charcoal at a rate of 7 pounds per 1,000 square feet in 1" gallons of water (300 pounds per acre in 600 gallons of water). Following application, irrigate the turf with sufficient water to wash the charcoal into the soil. Reseed no sooner than 7 days after applying the charcoal.

NON-WARRANTY

Neither warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.
