Prior to treating areas, clean up dog and cat feces and thoroughly rinse areas with garden hose and plenty of water. When soil has absorbed the water, proceed to one of the following procedures:

**METHOD #1 —  
HOSE END SPRAYER**

To apply, spray the entire contents of DOG-B-GONE evenly over approximately 3,000 sq. ft. of lawn, shrub beds, flower beds and garden areas through the hose end sprayer system. Use a swinging motion and a 20" wide spray fan to achieve even coverage. Repeat treatment as necessary. Under normal conditions, it should last several weeks.

**METHOD #2 —  
SPOT TREAT OUTDOORS**

This method is used in the winter when hose water may not be available. Rinse areas of removed droppings with water punch small holes in the lid of DOG-B-GONE bottle and shake undiluted solution over areas to be protected. Use on garbage cans (inside & out), trees, shrub beds, flower beds and lawns in the same method.
