

DIRECTIONS FOR USE:

IT IS A VIOLATION OF FEDERAL
LAW TO USE THIS PRODUCT IN
A MANNER INCONSISTENT
WITH ITS LABELING.

Industrial Cooling Water Systems: AQUA-
WARD tablets can provide a source of
chlorine for commercial recirculating
cooling water systems to reduce the
number of living alga, bacteria, and
fungi. The product is to be added to the
system at a point where it will be
uniformly mixed. It is extremely effective
and recommended as part of a general
preventative maintenance program.

The amount of chlorine dosed will
depend upon the flow rate of the water
being treated, the amount of AQUA-
WARD used, and the configuration of the active
tablet bed. For example, to provide an
available chlorine concentration of 6
ppm use about 1.4 pounds or six tablets
of AQUA-WARD for each 20,000 gallons of
water treated. In practice the amount of
AQUA-WARD should be adjusted to
satisfy chlorine demand and provide the
desired residual. Application is to be
made as needed to maintain control.

Potable Water Treatment: AQUA-
WARD tablets can be used in the control of
"Saprophytic" bacteria found in potable
water drawn from a municipally treated
system, lakes, streams, or other sources
of potable quality. Tablets are to be used
in conjunction with an applicable chlori-
nator. For this application storage of
tablets should not exceed one year.

Wastewater Treatment: AQUA-
WARD tablets can provide a source of available
chlorine for the treatment of domestic
sewage. The method of application and

level of chlorine residual upon discharge
is tightly controlled by EPA regulations.
Dosage can be figured by data provided
under "Industrial Cooling Water
Systems" though we strongly recom-
mend contacting the manufacturer and
local EPA office before use.

Storage and Disposal: Keep product dry in
tightly closed container when not in use.
Store in a cool, dry, well ventilated area
away from heat or open flame. In case of
decomposition isolate container, if
possible, and flood with large amounts of
water to dissolve all material before
discarding. Place in trash collection or
dispose in approved landfill area, or bury
in a safe place.

WARRANTY STATEMENT: Seller warrants
that this material conforms to its
chemical description and is reasonably
fit for the purposes stated on the label
when used in accordance with directions
under normal conditions of use and
buyer assumes the risk of any use
contrary to such directions. Seller makes
no other expressed or implied warranty
including any other express or implied
warranty of fitness or of merchantability
and no agent of seller is authorized to do
so except in writing with a specific
reference to this warranty. In no event
shall seller's liability for any breach of
warranty exceed the purchase price of
the material as to which a claim is made.

AQUA-WARD™ Tablets

Active Ingredients:	
Calcium Hypochlorite	70%
Inert Ingredients	30%
Total	100%

**KEEP OUT OF REACH OF CHILDREN
DANGER**

PRACTICAL TREATMENT (First Aid): If swallowed: Feed bread soaked in milk, gelatin solution or egg whites. Follow with milk of magnesia, vegetable oil, or olive oil. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

Precautionary Statements Hazards to Humans and Domestic Animals

HAZARD: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Do not breathe dust and fumes. Wash thoroughly with soap and water after handling. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

Physical and Chemical Hazards

STRONG OXIDIZING AGENT: Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Open container only where adequate ventilation is available. Do not add this product to any dispensing device containing remains of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. Keep away from any flammable or burning material. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water if necessary.
