NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Your product is registered under the Federal Insecticide, Fungicide, and Rodenticide Act, and the registration is valid for a period of five years from the date of registration. The registration is subject to the condition that you must submit to the Agency a petition for reregistration of your product within the next year after the date of this notice, which is the date of the next labeling, whichever occurs first. This is a condition of the registration and must be complied with within the time specified.

DIRECTIONS FOR USE:
IT IS A VIOLATION OF FEDERAL
LAW TO USE THIS PRODUCT IN
A MANNER INCONSISTENT
WITH ITS LABELING.

Industrial Cooling Water Systems: AQUAWARD tablets can provide a source of chlorine for commercial recirculating cooling water systems to reduce the number of living algae, bacteria, and fungi. The product is to be added to the system at a point where it will be uniformly mixed. It is extremely effective and recommended as part of a general preventative maintenance program.

The amount of chlorine dosed will depend upon the flow rate of the water being treated, the amount of AQUAWARD used, and the configuration of the active tablet bed. For example, to provide an available chlorine concentration of 6 ppm use about 1.4 pounds or six tablets of AQUAWARD for each 20,000 gallons of water treated. In practice the amount of AQUAWARD should be adjusted to satisfy chlorine demand and provide the desired residual. Application is to be made as needed to maintain control.

Potable Water Treatment: AQUAWARD tablets can be used in the control of "Saprophytic" bacteria found in potable water drawn from a municipally treated system, lakes, streams, or other sources of potable quality. Tablets are to be used in conjunction with an applicable chlorinator. For this application, storage of tablets should not exceed one year.

Wastewater Treatment: AQUAWARD tablet can provide a source of available chlorine for the treatment of domestic sewage. The method of application and

level or chlorine residual upon discharge is tightly controlled by EPA regulations. Dosage can be figured by data provided under "Industrial Cooling Water Systems" though we strongly recommend contacting the manufacturer and local EPA office before use.

Storage and Disposal: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or bury in a safe place.

WARRANTY STATEMENT: Seller warrants that this material conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use and buyer assumes the risk of any use contrary to such directions. Seller makes no other expressed or implied warranty, including any other express or implied warranty of fitness or of merchantability, and no agent of seller is authorized to do so except in writing with a specific reference to this warranty. In no event shall seller's liability for any breach of warranty exceed the purchase price of the material as to which a claim is made.

**Precautionary Statements
Hazards to Humans and
Domestic Animals**

DANGER Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Do not breathe dust and fumes. Wash thoroughly with soap and water after handling. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

Physical Chemical Hazards

Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Open container only where adequate ventilation is available. Do not add this product to any dispensing device containing remains of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. Keep away from any flammable or burning material. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water if necessary.
