Silver Spring, MD 20904

Subject: Sanuril® 115
EPA Registration Number 48482-5
Application Date: 10/27/06
Receipt Date: 10/30/06

Dear Ms. Griffin:

The following amendment, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, is acceptable.

To update your "first aid" statement in accordance with PR Notice 2001-1 and other minor change

General Comments

A stamped copy of the accepted labeling is enclosed. Submit three (3) copies of your final printed labeling before distributing or selling the product bearing the revised labeling.

Should you have any questions or comments concerning this letter, please contact Delores Williams at (703) 308-6372.

Sincerely,

EM

Emily Mitchell
Acting Product Manager 32
Regulatory Management Branch II
Antimicrobials Division (7510C)

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

SANURIL® 115 is a slow dissolving mixed halogen product in a convenient, ready-to-use tablet form. The SANURIL® 115 tablets provide a source of both available chlorine and bromine. It is recommended for use as a sewage effluent disinfectant where a continuous source of chlorine and bromine is required. For best results and reliable performance, SANURIL® 115 should be used in conjunction with the Exceltec (formerly Eltech) Tablet Feeder.

Sewage and Wastewater Effluent Treatment

The amount of chlorine delivered will depend on the flow rate of the water being treated, the number and placement of feed tubes filled and the outlet weir size selected. For example, to provide an available chlorine dosage of 6 ppm, the recommended dosage will require about 0.8 pounds or 3 tablets of SANURIL® 115 for each 10,000 gallons of water to be treated. Refer to the appropriate Exceltec Tablet Feeder Instruction Manual to determine the required feeder settings and adjustments to satisfy the chlorine demand and to maintain the required level of chlorine residual. In practice the amount of SANURIL® 115 used should be adjusted to satisfy the halogen demand and to maintain proper halogen residual. The typical dissolve rate of the SANURIL® 115 tablets is 10 grams per hour based on a flow rate of 3 gpm.

Allow the SANURIL® 115 System to operate for approximately one (1) to one and one-half (1-1/2) hours before testing results. Measurement of the total available chlorine (including combined and free chlorine residuals) can be determined by using the standard idometric titration technique. A suitable method is described in Standard Methods for the Examination of Water and Wastewater, Nineteenth Edition, 1995, American Public Health Association, section 4, pp 36-53.

Questions regarding the above "Directions for Use" should be directed to EXCELTEC International Corporation, 1110 Industrial Blvd., Sugar Land, Texas 77478 USA.

STORAGE AND DISPOSAL

Keep product dry in a tightly closed container when not in use. Store in a cool, dry and well ventilated area away from heat or open flame. In case of decomposition, isolate container and flood with large amounts of water to dissolve all material before discarding this container. DO NOT reuse empty container, but place in trash collection. DO NOT contaminate food or feed by storage, disposal or cleaning of equipment. Shelf life is one (1) year in an UNOPENED container.

FIRST AID

If in eyes, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. *If on skin or clothing*, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. *If swallowed*, call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. *If inhaled*, move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for treatment advice.

Hot line number: Contact 1-800-621-9169 or your poison control center for 24 hour emergency medical treatment information. Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Note to physician: Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER. Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. DO NOT get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Do not breathe dust or fumes. Wash thoroughly with soap and water after handling. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT! Mix only with water. Use clean, dry utensils. Open container only where adequate ventilation is available. DO NOT add this product to any dispensing device containing remains of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. Keep away from flammable or burning material. In case of contamination or decomposition, DO NOT reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water if necessary.

Warranty Statement: Seller warrants that this material conforms to its chemical description and is reasonably fit for the purposes stated on this label when used in accordance with directions under normal conditions of use and buyer assumes the risk of any use contrary to such directions. Seller makes no other express or implied warranty, including any other express or implied warrant of fitness or of merchantability and no agent of Seller is authorized to do so except in writing with a specific reference to this warranty. In no event shall Seller's liability for any breach of warranty exceed the purchase price of the material as to which a claim is made.
