SPA PURE

CONCENTRATED CHLORINE SOLUTION FOR SPAS AND HOT TUBS

ALGAESTAT - BACTERICIDE - FUNGISTAT

ACTIVE INGREDIENTS:

Calcium Hypochlorite .....12.5%

INERT INGREDIENTS: .....87.5%

TOTAL .....100.0%

Minimum Available Chlorine .....12.5%

This Product contains 2.0 lbs. of Calcium Hypochlorite 65% per gallon.

KEEP OUT OF REACH OF CHILDREN (10 pt. Bold)

DANGER (14. pt. Bold)

See left panel for statement of practical  
treatment and additional precautions.

Manufactured by: Phoenix Chemicals, Inc.  
Danbury, CT 06810

EPA Est. No..... EPA Reg. No.....

**DIRECTIONS FOR USE (10 pt. Bold)**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

*White*  
GENERAL CLASSIFICATION

**START-UP:** When starting up a freshly filled spa or hot tub, make sure the filtration system is clean and operating properly. Then adjust and maintain the pH in the range of 7.2-7.8 using pH Up or pH Down as indicated by a reliable test kit. Adjust and maintain Total Alkalinity at 80-150 ppm based on the test kit results and the label directions on the Alkalinity Control product. Superchlorinate by adding 1 oz. of SPA PURE per 250 gallons. Repeat this step if necessary to establish an initial free chlorine residual of 1.5-3.0 ppm.

**MAINTENANCE:**

**Mechanical Feeding Device:** Add 1 gallon of SPA PURE to 29 gallons of water to make a 30 gallon solution in your feeder tank. Adjust the chlorine dispensing rate of the in-line feeder to inject 2 gallons of SPA PURE solution per day per 250 gallons of water in order to maintain 1.5-3.0 ppm of free chlorine residual as determined by a reliable test kit. This dosage may vary due to unusual conditions such as heavy bather load and higher than normal temperatures; therefore, frequent use of the test kit is recommended. Using the test kit as a guide, maintain the pH at 7.2-7.8 and the Total Alkalinity at 80-150 ppm.

**Hand Fed:** Add 1/2 oz. of SPA PURE per 250 gallons as often as necessary to maintain a free chlorine residual of 1.5-3.0 ppm, as determined by a reliable test kit. This dosage may vary due to unusual conditions such as heavy bather loads and higher than normal temperatures; therefore, frequent use of the test kit is recommended. Repeat 1/2 oz. dosage as necessary to maintain 1.5-3.0 ppm free chlorine residual after bathers have left spa or hot tub. Using the test kit as a guide, maintain the pH at 7.2-7.8 and the Total Alkalinity at 80-150 ppm.

**PERIODIC SUPERCHLORINATION:** Add 1 oz. of SPA PURE per 250 gallons on a weekly basis or if algae appears, eye burn or chlorine odors are noted, heavy bather loads or high temperatures occur, or if a reliable test kit indicates the presence of combined chlorine in excess of 0.2 ppm. Repeat this step if necessary to establish a free chlorine residual of 4.0-5.0 ppm. Do not use the spa or hot tub until the chlorine residual has dropped below 3.0 ppm.

**NOTE:** This product degrades with age. Use of a chlorine test kit and increase dosage, as necessary, to obtain the required level of available chlorine.

**STORAGE AND DISPOSAL: (10 pt. Bold)**

Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in trash collection or burying in an approved landfill. Product or rinsate that cannot be used, should be diluted with water and disposed of in a sanitary sewer. Do not contaminate food or feed by storage, disposal or cleaning of equipment.

PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

- (14 pt. Bold) **DANGER: Corrosive.** May cause severe skin irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly vented areas as soon as possible. Do not return until odors have dissipated.
- (10 pt. Bold) **ENVIRONMENTAL HAZARDS:** This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public water unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.
- (10 pt. Bold) **PHYSICAL AND CHEMICALS HAZARDS**
- (10 pt. Bold) **STRONG OXIDIZING AGENT:** Mix only with water according to label directions. Mixing this product with gross filth such as feces, urine, etc. or with ammonia, acids, detergents or other chemicals may release hazardous gases irritating to eyes, lungs and mucous membranes.

**PRACTICAL TREATMENT (FIRST AID):**

If on skin, wash with plenty of soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of milk, or gelatin solution or, if these are not available, drink large quantities of water. Do NOT give vinegar or other acids. Do NOT induce vomiting. Get prompt medical attention.
