UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, DC 20460

OFFICE OF
PREVENTION, PESTICIDES
AND TOXIC SUBSTANCES

October 27, 2009

Jennifer Hatler, Regulatory Assistant
Phoenix Products Co.
55 Container Drive
Terryville, CT. 06786

Subject: Giant Tabs
EPA Registration Number 48520-10
Application Date: September 28, 2009

Dear Ms. Hatler:

The Agency has reviewed your amendment submitted in accordance with continuing registration under the Federal Insecticide Fungicide and Rodenticide Act (FIFRA), as amended, and determined the action acceptable. In summary, the corrected ingredient statement and the updated Storage and Disposal instruction have been accepted.

A copy of your label is enclosed. Please submit a finished copy of your label for our files. Should you have any questions concerning this letter, please contact Tom Luminello at (703) 308-8075.

Sincerely,

A handwritten signature in cursive script that reads "Emily H. Mitchell".

Emily H. Mitchell
Product Manager 32
Regulatory Management Branch II
Antimicrobials Division (7510P)

FIRST AID

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

IF SWALLOWED: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

ACTIVE INGREDIENT:

Trichloro-s-triazinetrione.....	99.0%
INERT INGREDIENTS	1.0%
TOTAL	100.0%

Available chlorine.....89.0%

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS:

{If 50lbs or less, use the following statement}

This pesticide is toxic to fish and aquatic organisms.

{If over 50lbs, use the following statement}

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS:

STRONG OXIDIZING AGENT. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion.

SPECIAL PRECAUTIONS (PLEASE READ)

1. This product emits a powerful chlorine gas. Do not open container indoors. Hold away from face when opening to avoid breathing fumes.
2. Prolonged contact between this product in its undissolved state and vinyl liners, painted surfaces or other property in or around the pool will result in permanent bleaching of the color. Introduce this product through the skimmer or in a prescribed feeder to avoid discoloration of liner or paint.

4
6

3. When adding this product to skimmer or feeder make sure that there are no other chemicals present as a violent reaction may occur. It is always dangerous to mix chemicals.
4. Use this product as directed per instructions on label. Do not take advice from others or experiment by yourself.
5. If this product is used to shock or superchlorinate a pool, after treatment it is important to brush walls and floor to expose algae that may be in cracks or wrinkles that might protect algae from high chlorine residual. Such protected algae will begin to reproduce again when high chlorine residual falls.
6. This product, because of its potent formulation, can be dangerous if not used properly. Do not mix with any other chemicals. This could result in a violent chemical reaction. Do not add water to this product in a closed container. Do not add this product to a small amount of water in a pail. When adding this product to skimmer make sure pump is on and water is circulating so that material is drawn into recirculation system. Do not allow build-up of dry material in skimmer as gases generated may cause an explosion.

[These tablets are manufactured with the most concentrated form of dry chlorine available today. They are consistent in size and slow dissolving in nature to allow you to reliably dose your pool once a week. These tablets contain cyanuric acid - a stabilizer that prevents ultra violet light from removing available chlorine from the pool. These tablets allow you to easily maintain proper chlorine residuals and help you to effortlessly produce beautiful, clean sparkling water.]

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

1. Adjust water pH to 7.2-7.6 as determined by a test kit. For pools with copper plumbing best pH factor is 7.6-7.8.
2. If the pool has not been previously stabilized add conditioner and stabilizer (cyanuric acid). Follow the directions for use on the label for that product.
3. Secure chlorinator in the area of the pool that is agitated by return flow from filter. If residual remains too high chlorinator should be moved further from the agitated area which will slow the dissolving action of the tablets.
4. In newly filled pools, follow steps 1 through 3 then add 2 tablets per 5,000 gallons of pool water to establish a chlorine residual of 1.0 to 1.5 p.p.m. as

5
8

determined by a test kit. Repeat dosages as needed to maintain a residual of 1.0 to 1.5 p.p.m. at all times. Thereafter, add 1 tablet per 5,000 gallons per week or as needed to maintain chlorine residual of 1.0 to 1.5 p.p.m. at all times as determined by a test kit. For pools with stabilizer, follow steps 1 and 3 then add 1 tablet per 5,000 gallons per week or as needed to maintain chlorine residual of 1.0 to 1.5 p.p.m. at all times as determined by a test kit.

5. Reentry into treated swimming pools is prohibited above levels of 3 p.p.m. of chlorine. PLEASE NOTE: The pH of stabilized chlorinating tablets is on the acid side and will tend to reduce the pH and alkalinity of pool water. Proper pH should be maintained at 7.2-7.6 as determined by a test kit, by periodic additions of sodium carbonate or sodium bicarbonate. Each tablet weighs 162 grams or 5.7 ounces. Use also in Automatic Divert-A-Trol chlorine feeder.

{Optional pool gallon calculation instructions}

[POOL GALLON CALCULATOR (all dimensions in feet)

Square or Rectangular: Length x Width x Average Depth x 7.5 = Gallons

Round or Oval: Length x Width x Average Depth x 5.9 = Gallons

POOL GALLON CALCULATOR (ft)

Rectangular: L x W x AvD x 7.5

Round: L x W x AvD x 5.9

HOW TO CALCULATE POOL CAPACITY

SHAPE OF POOL: GAL. OF WATER (Dimensions in feet)

Rectangular: Average depth x average length x average width x 7.5

Circular: Diameter x diameter x average depth x 5.9

Oval w/ straight sides: Full width x full length x average depth x 6.7

Irregular: Consult pool builder]

STORAGE AND DISPOSAL:

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store in a dry, cool and well-ventilated area. Avoid moisture getting into container. Keep off wet floors. In case of spillage, wash with large amounts of water. After each use, keep container tightly closed. Oxidizing material. Keep away from flames, sparks and all sources of heat. Avoid contact with organic material.

{for non-residential and bulk shipments}

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal

6
6

law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container (or equivalent) promptly after emptying.
