OFFICE OF PESTICIDES PROGRAMS
REGISTRATION DIVISION (WH-567)
WASHINGTON, D.C. 20460

EPA REGISTRATION NO.

48708-1

DATE OF ISSUANCE

26 APR 1966

TERM OF ISSUANCE

NOTICE OF PESTICIDE: REGISTRATION
 REREGISTRATION

(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

NAME OF PESTICIDE PRODUCT

Tetracide

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Tetra Resources Inc.
P.O. Box 73089
Houston, TX 77273

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.

2. Add the phrase "EPA Registration No. 48708-1" to your label before you release the product for shipment.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

ACTIVE INGREDIENT:

Potassium dimethyldithiocarbamate 50.0%

INERT INGREDIENTS 50.0%

This product contains 5.2 lb. of active ingredient per gallon and weighs 10.4 lb. per gallon.

KEEP OUT OF REACH OF CHILDREN DANGER

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes eye and skin damage. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Avoid contamination of food. Wear goggles or face shield and rubber gloves when handling. Wash thoroughly after handling.

STATEMENT OF PRACTICAL TREATMENT: In case of skin contact, wash with plenty of soap and water. Remove contaminated clothing and wash before reuse. If product gets in the eyes, flush immediately with copious amounts of clean, cool water for at least 15 minutes. Get medical attention immediately. If product is swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or, if these are not available, drink large quantities of water. Avoid alcohol. Call a physician. Never induce vomiting or give anything by mouth to an unconscious person.

Note to physician: Probable mucosal damage may contraindicate gastric lavage.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not apply in marine and/or estuarine oil fields. Do not discharge effluent containing this active ingredient into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

ACCEPTED with COMMENTS in EPA Letter Dec 85

Manufactured by: Tetrz Resources, Inc.

APR 26 1985

P. O. Box 73089 Houston, Texas 77273

Under Federal Insecticide, Fungicide and Rodenticide Act as amended for the pesticide registered under EPA Reg. No.

EPA REG. NO. 48706

EPA EST. NO.

DIRECTIONS FOR USE

It is a violation of Federal law to use this pesticide in a manner inconsistent with its labeling.

Tetracide is used in industrial cooling tower systems and industrial air-washing systems. Prior to the use of Tetracide in recirculating cooling tower systems, systems should be cleaned to remove microbiological slimes, and other deposits. Then make an addition of 3.0 fl. oz. of Tetracide to 20 to 30 ppm of Tetracide of water in the system. Repeat initial dosage until control is achieved. Add an additional 1.0 to 3.0 fl. oz. of Tetracide per 10 to 30 gal. of water (10 to 30 ppm) every 1 to 5 days or as needed. The frequency of addition depends upon the severity of the microbiological problem and the bleedoff and the severity of the microbiological problem in the sump of recirculating cooling tower systems.

Tetracide is used in industrial water systems to maintain effective mist-eliminating components. Prior to the use of Tetracide, systems should be cleaned to remove bacterial slimes and other deposits. Add 6.0 fl. oz. of Tetracide to the system. Repeat initial dosage until control is evident. Add an additional 3.5 to 6.0 fl. oz. of Tetracide per 1000 gal. of water treated every 1 to 5 days, or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Additional additions may be made to the sump or the water collection tank.

Tetracide is used to control bacteria, including sulfate-reducing organisms, in waterflooding operations. In systems fouled with microorganisms, a slug dose of 8 to 16 ppm (0.83 to 1.66 fl. oz. per 1000 gal. of water treated) should be added. This should be followed by a continuous concentration of 8 ppm, based on total weight of Tetracide, employing a chemical injection system. Additions should be made to the heater-treater pump, gathering lines, or receiving tank upstream to the filter.

Tetracide is also used to control bacteria in water-based drilling muds, completion fluids, and based drilling fluids containing starch, gums, sugars, or other organic materials. Tetracide is added at a rate of 0.014% to 0.071% by weight per 100 barrels of fluid.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. STORAGE: Do not expose to extreme temperatures. Do not stack drums should be placed in overpack drums for disposal. Spills should be cleaned up in a sanitary landfill. Keep container closed when not in use.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Do not mix with other pesticides, food, or feed. If these wastes cannot be disposed of by other means, they must be incinerated at a high temperature. If these wastes cannot be incinerated, they must be disposed of in a sanitary landfill. If these wastes cannot be disposed of by other means, they must be disposed of in a sanitary landfill. If these wastes cannot be disposed of by other means, they must be disposed of in a sanitary landfill. For more information, contact your State Pesticide or Environmental Control Agency or the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: PLASTIC: Triple rinse (or equivalent). Then offer for recycling or reuse, or for incineration, or, if allowed by state and local officials, by other procedures approved by state and local officials. METAL: Triple rinse (or equivalent). Then offer for recycling or reuse, or for incineration, or, if allowed by state and local officials, by other procedures approved by state and local officials.
