

U.S. ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION 7576 WASHINGTON, DC 20460	REGISTRATION NO. 48760-22	DATE OF APPROVAL JAN 24 1990
	TERM OF ISSUE AND NAME OF PESTICIDE	

NOTICE OF PESTICIDE:

Under the Federal Insecticide, Fungicide, and Rodenticide Act.

NAME AND ADDRESS OF REGISTRANT (PRINT OR TYPE)

NOTE: Changes in label language, formula, or substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label. For more information on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an endorsement, approval, or recommendation by the Agency of the product or the environment. The Administrator is hereby notified that the registrant is responsible for the safe use of the product in accordance with the Act. The Administrator is hereby notified that the registrant is responsible for the safe use of the product in accordance with the Act.

treated surfaces until areas are dry. Remove clothing and wash if it becomes contacted with spray. Wash skin thoroughly with soap and water after use.

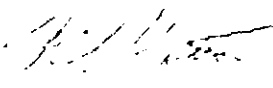

- c. Delete the statement "This product is formulated to form a non-greasy residue on the pyrethrin 3-0-10 formulation."
- d. Change the statement "Do not contaminate water by cleaning of equipment or disposal of wastes" to read "Do not contaminate water when disposing of equipment washwaters."
- e. Delete the claim for use in meat packing plants. You must have the approval of the U.S. Department of Agriculture (USDA) before the product can be used in these areas. Once you have preliminary acceptance from USDA, you can apply to amend this registration by adding these use areas to the label.

3. Submit a 1-year storage stability study. The formulated product must be analyzed for its active ingredient at the time and for 1 year of storage. The product must be stored at various temperatures and humidity conditions and analyzed at the time and for 1 year. The results must be submitted within 15 months of the date of this Registration Notice.

4. Submit 10 (10) copies of a final printed label before you release the product for shipment. Refer to the 1-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA Section 6(c). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with these label directions.

GENERAL: Read label first. Limited to cracks and crevices, wall voids and space spray only in areas where food is prepared, may be used as a space spray in areas where food is not prepared. Do not use in homes, hospitals, hotels, motels, schools, or in the presence of people and pets and animals before spraying. Allow two (2) hours ventilation time before they return.

HOW TO USE AS A SPACE SPRAY: As stated above, remove of people and pets first. Take any sanitary measures to cover or leave refuse or anything else that would attract insects. Close or shut down fans and air processing systems and windows so they are protected during treatment. In wall voids, before use in homes, hospitals, hotels, motels, schools, or in the presence of people and pets and animals before spraying. Allow two (2) hours ventilation time before they return.

FLYING INSECTS: Use as above, directing spray as many insects as possible, repeat as needed.

CRAWLING INSECTS: Use as above, directing spray behind shelves, refrigerators, cabinets, processing equipment, under sinks, cracks and crevices, and anywhere these insects are suspected of harboring. Contact as many exposed insects as possible. Repeat as needed.

OTHER THAN IN COMMERCIAL FOOD HANDLING ESTABLISHMENTS: To be used in cracks and crevices, wall boards, baseboards, and other places insects hide. Apply behind and beneath cabinets, under shelves, refrigerators, coffee makers, pots, pans, and in and around waste containers. For spot treatment, directly contact as many insects as possible with small amounts of the product. Use the nozzle or equipment capable of delivering a jet of stream to penetrate between different elements of construction such as dry joints, screw joints, metal bolts, drains, openings leading to voids and hollow spaces in walls, between equipment and floor, in baseboards, behind panels and other places. Direct spray into a rat's nest when a rat has been found in a building.

RESTAURANTS, MEAT PACKING AND FOOD PROCESSING PLANTS, FOOD STORAGE AREAS, RESTAURANTS, AND OTHER FOOD HANDLING PLACES OTHER THAN PRIVATE RESIDENCES IN WHICH EXPOSED FOOD IS HELD, PROCESSED, OR PACKED: To be used in cracks and crevices, wall boards, baseboards, and other places insects hide. Apply behind and beneath cabinets, under shelves, refrigerators, coffee makers, pots, pans, and in and around waste containers. For spot treatment, directly contact as many insects as possible with small amounts of the product. Use the nozzle or equipment capable of delivering a jet of stream to penetrate between different elements of construction such as dry joints, screw joints, metal bolts, drains, openings leading to voids and hollow spaces in walls, between equipment and floor, in baseboards, behind panels and other places. Direct spray into a rat's nest when a rat has been found in a building.

FOOD AREAS LIMITED TO CRACKS & CREVICES TREATMENT ONLY: Apply a small amount of material as a spot treatment in cracks and crevices, wall boards, baseboards, and other places insects hide. Apply behind and beneath cabinets, under shelves, refrigerators, coffee makers, pots, pans, and in and around waste containers. For spot treatment, directly contact as many insects as possible with small amounts of the product. Use the nozzle or equipment capable of delivering a jet of stream to penetrate between different elements of construction such as dry joints, screw joints, metal bolts, drains, openings leading to voids and hollow spaces in walls, between equipment and floor, in baseboards, behind panels and other places. Direct spray into a rat's nest when a rat has been found in a building.

CRAWLING INSECTS: Use as above, directing spray behind shelves, refrigerators, cabinets, processing equipment, under sinks, cracks and crevices, and anywhere these insects are suspected of harboring. Contact as many exposed insects as possible. Repeat as needed.

DOG TAGS & FLEAS: Remove and destroy dog bedding. Vacuum all carpets and throw away the bag. Clean washed laundry and furniture. Wash dog bedding. Spray no closer than two (2) feet away from the sleeping quarters of pets around bedding, under and behind dog houses, wall cracks and baseboard areas. Repeat as necessary. Fresh bedding should be placed in animal quarters after spray has dried. To control the source of your flea infestation, treat your pet with a spray registered for application to animals. DO NOT spray animals with this product.

TERMITES, CARPENTER ANTS & OTHER WOOD DESTROYING INSECTS: For control of carpenter ants in homes and other structures, use around doors and windows and other places where carpenter ants enter the premises and where they create galleries. Also spray into cracks and crevices in through openings of small holes (about 1/8 inch) and seal with wood putty. For control of termites, apply to voids and channels of damaged wood. Treatment of damaged areas is intended to kill workers and winged reproductive forms of termites in the treated areas and to prevent entrance by a temporary period. The type of application is not intended to be a substitute for soil treatment or methoprene application to control termites.

APPLICATION OF THIS PRODUCT IN THE FOOD AREA OF FOOD HANDLING ESTABLISHMENTS OTHER THAN AS A CRACK AND CREVICE TREATMENT IS NOT PERMITTED.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: May be harmful if swallowed. Avoid contact with eyes, skin or clothes. Avoid breathing spray mist. Avoid contact with foodstuffs. Wash thoroughly after using. Do not use in a kitchen. Do not allow children or pets to contact treated surfaces until areas are dry.

IF POISONING OCCURS: Call 911 or contact a Poison Control Center immediately. Keep this can in your possession, especially if you go to a hospital.

PHYSICAL HAZARDS: Non-flammable liquid and propellant under pressure. Do not puncture can or expose to flame. Do not incinerate. Do not expose to temperatures above 130° F. Do not use in areas where food is prepared. Avoid excessive spraying of mist or the heating and ventilation of painted surfaces. Use this product can cause staining or marking of surfaces. Do not ingest directly into electrical equipment such as radios, televisions, etc.

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and other wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes.

STORAGE & DISPOSAL: Keep locked in a cool and dry storage area away from heat or open flame. Do not reuse empty container. Do not empty container and put in trash.

PYRETHRINS

3-6-10 FORMULATION 60

HIGH POTENCY-ULTRA LOW VOLUME
NON-RESIDUAL, DUAL SYNERGIZED
CONTACT, FLUSH & KILL FOGGING AEROSOL INSECTICIDE

ACTIVE INGREDIENTS:

Permethrin (Technical)	1.0%
Pyrethrin (Technical)	1.0%
**N-Oxy bicycloheptene dicarboximide	2.0%
INERT INGREDIENTS	96.0%
TOTAL	100.0%

*EPA Reg. No. 48760-101 (Permethrin) and EPA Reg. No. 48760-102 (Pyrethrin)
**EPA Reg. No. 48760-103 (N-Oxy bicycloheptene dicarboximide)

This formulation will rapidly flush and kill crawling insects including those that are resistant to certain hydrocarbon, Organophosphate, or Carbamate resistant pests. Particles concentrate to form a non-greasy residue of 8% Pyrethrin in 3-6-10 formulation.

TO KILL: Flying insects such as Flies, Gnats, Hornets, Mosquitoes, etc. and Crawling insects such as Ants (all types), Bedbugs, Beetles, Earwig Beetles, etc. Larvae, Caddisflies, Cockroaches (all strains), Crickets, Earwigs, Flies, Grasshoppers, Lice, Mice, Mites and Larvae, Moths, Silverfish Spiders, Ticks, etc.

FOR USE IN: Bakeries, Candy Kitchens, Canneries, Cheese Factories, Dairies, Egg and Poultry Houses, Flour Mills, Fisheries, Mushroom Houses, Greenhouses, Restaurants, and anywhere food is processed or stored, as well as in homes, hotels, motels, schools, freight compartments, garages, garbage containers, hospitals, homes, schools, homes, offices, restaurants, homes, schools, shipping containers, stables, etc. Tents, trailers, trains, veterinary offices, etc.

KEEP OUT OF REACH OF CHILDREN

CAUTION

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Do not induce vomiting because of aspiration hazard. Get medical attention immediately. Call a Poison Control Center.

IF INHALED: Remove patient to fresh air. Get medical attention if respiratory symptoms occur.
IF ON SKIN: Wash skin with soap and water right away. Get medical attention if respiratory distress occurs.
IF IN EYES: Flush eyes with plenty of water. Get medical attention immediately.
