

PROPOXUR 200

It is a violation of Federal Law to use this product in a manner inconsistent with these label directions.

GENERAL: Read label first. Expressed for crack and crevice, spot, and inaccessible void (attics, false ceilings, wall voids) treatment. Propoxur 200 is intended for use with injection tube and/or professional injection equipment. Place extension tube into cracks, crevices, holes, and other openings and dispense for 2 seconds. Keep children and pets away from treated areas until spray has dried.

AREAS OTHER THAN THOSE IN COMMERCIAL FOOD HANDLING ESTABLISHMENTS: To kill insects listed on front panel, spray into cracks and crevices, wall voids, baseboards and other places insects hide. Apply behind and beneath cabinets, sinks, stoves, refrigerators, coffee makers, pipes, damp areas, and in and around waste containers. For spot treatment, directly contact as many insects as possible with small amounts of this product. Use actuator or equipment capable of delivering a pin stream to points between different elements of construction such as door frames, window frames, meter bases, drains, openings leading to voids and hollow spaces in walls, between equipment and floors or bases. Follow trails of ants or other insects and inject spray into areas in walls where they hide. Repeat as necessary.

PEST CONTROL IN MEAT PACKING AND FOOD PROCESSING PLANTS, FOOD STORAGE AREAS, RESTAURANTS, AND OTHER FOOD HANDLING PLACES (OTHER THAN PRIVATE RESIDENCES IN WHICH EXPOSED FOOD IS HELD, PROCESSED, PREPARED OR SERVED): Do not apply directly to food. In commercial food handling facilities, remove any exposed food and cover processing equipment during application. Wash thoroughly all food utensils before their use. Do not apply while food processing is underway.

NON-FOOD AREAS: Includes garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, map closets storage (after canning or bottling), and warehouses where food is not exposed. Apply to baseboard areas, cracks and crevices, around water pipes, surfaces behind and beneath sinks, lockers, window and door screens, tables, papers, and similar areas where insects hide or rest and areas through which they may enter.

FOOD AREAS: LIMITED TO CRACK & CREVICE TREATMENT ONLY: Apply a small amount of material as a pin-thin stream directly into cracks and crevices such as expansion joints between different elements of construction or between equipment bases and the floor, wall voids, or hollow equipment legs where the insects noted above hide. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces.

CARPET BEETLES & DERMESTIDS: Spray along baseboards, edges of carpeting and rugs, under furniture, in closets, on shelving, and in other places of harborage. Repeat as necessary.

TICKS & FLEAS: Spray sleeping quarters of pets, around baseboards, window and door frames, wall cracks and local floor areas. Repeat as necessary. Remove and destroy old bedding. Fresh bedding should be placed in animal quarters after spray has dried. To control the source of your flea infestation, treat your pets with a product registered for application to animals. **DO NOT SPRAY ON ANIMALS WITH THIS PRODUCT.**

TERMITES, CARPENTER ANTS & OTHER WOOD DESTROYING INSECTS: For control of carpenter ants in homes and other structures, spray around doors and windows and other places where carpenter ants enter the premises and where they crawl and hide. Also spray into cracks and crevices or through openings of small, newly drilled holes into wall voids where ants or their nests are present. For control of termites, apply to voids and channels in damaged wood. Treatment of localized areas is intended to kill workers and winged reproductive forms of termites in the treated areas and to prevent infestations for a temporary period. This type of application is not intended to be a substitute of soil treatment or mechanical alteration to control subterranean termites.

APPLICATION OF THIS PRODUCT IN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS OTHER THAN AS A CRACK AND CREVICE TREATMENT IS NOT PERMITTED.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: May be harmful if swallowed. Avoid contact with eyes, skin, or clothing. Avoid breathing spray mist. Avoid contamination of food or feedstuffs. Wash thoroughly after using. Do not use as a space spray. Do not allow children or pets to contact treated surfaces until areas are dry.

IF POISONING OCCURS: Dial 911 or contact a Poison Control Center immediately. Keep this can in your possession, especially if you go to a hospital.

NOTE TO PHYSICIAN: Propoxur is a Cholinesterase inhibitor. Atropine by injection is antidotal only if symptoms of Cholinesterase inhibition are present. 2-PAM is contraindicated.

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and other wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes.

PHYSICAL HAZARDS: Contents under pressure. Do not puncture can or expose to flame. Do not use or store this can near heat, sparks, or open flame. Exposure to temperatures above 120°F may cause bursting. Avoid excessive spraying of vinyl or tile flooring and varnished or painted surfaces as this product can cause staining or marring of finishes. Do not inject directly into electrical equipment such as radios, televisions, etc.

STORAGE & DISPOSAL: Keep locked in a cool and dry storage area away from heat or open flame. When empty, do not incinerate this can. Replace cap and dispose empty cans in trash.
