

US ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (TS-767) WASHINGTON, DC 20460	EPA REGISTRATION NO. 48875-1	DATE OF ISSUANCE JAN 9 1986
	TERM OF ISSUANCE	
	NAME OF PESTICIDE PRODUCT Madera Stain and Wood Preservation	

NOTICE OF PESTICIDE:  REGISTRATION  
 REREGISTRATION  
 (Under the Federal Insecticide, Fungicide,  
 and Rodenticide Act, as amended)

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Registration Consulting Associates  
 12184 Woodland Court (LOP)  
 Auburn, CA 95603

16/ 161990  
18

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Make the labeling changes listed below before you release the product for shipment:
  - a. Add the phrase "EPA Registration No. 48875-1."
  - b. Delete "or wetlands" from the environmental hazards section.
  3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Precautionary Statements  
Hazards to Humans and Domestic Animals

WARNING

(18 pt)

Contains Petroleum distillate. May be fatal if swallowed, inhaled or absorbed through the skin. Causes eye and skin irritation. Do not breathe vapor or spray mist. Do not get in eyes, on skin or clothing. Wear rubber gloves, protective clothing and goggles or face mask when using or handling.

First Aid

If swallowed: Drink one or two glasses of milk, or water if milk is not available. Induce vomiting by touching back of throat with finger. Get medical attention immediately. Do not give anything by mouth or induce vomiting if person is unconscious.

If in eyes: Flush eyes with water for at least 15 minutes. Get medical attention.

If on skin: Wash skin thoroughly with soap and water. Remove contaminated clothing. Wash before reuse. If irritation persists, get medical attention.

Environmental Hazards

This product is toxic to fish and wildlife. Do not add directly to water or wetlands. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply and use this product only as specified on this label.

Note: Wash thoroughly after using and before eating or smoking.

Physical and Chemical Hazards

Keep away from Heat and Open Flame - Combustible!

Use only with adequate ventilation.

Close container tightly after using.

LIMITED WARRANTY

Meets Federal Specification TT-W-572b, Par. 3.7 for Water Repellency. Creative Industries Ltd. will replace this material at no charge, if it is shown to be defective within one year of purchase. Manufacturer's warranty express or implied does not include labor or the cost of labor for the application of any material. Creative Industries Ltd. shall not be liable for any incidental or consequential damages nor for any special damages or any further loss which may arise in connection with its product or claims under this warranty. Some states do not allow the exclusion or limitation of incidental or consequential damages. The above exclusion may not apply to you.

Back Panel #2

CREATIVE

Natural Wood Finish - The Finish That is Second Nature to Wood

Creative Natural Finish penetrates, protects & preserves the natural beauty of wood and enhances the wood texture and grain pattern to keep that original "new wood look". The natural tone formula achieves the proper balance to "lock-in" the natural wood color and "lock-out" the damaging, darkening, ultraviolet rays of the sun. The pure linseed oil vehicle carries the finish deeply into the pores of the wood to repel moisture and prevent unsightly splitting, cracking and warping. Because Creative Natural Finish is IN the wood and not ON the wood, peeling, blistering and flaking are eliminated. Special resin treatment repels water and fights mildew, rot and decay while preserving the natural texture and character of the wood.

As The Color The Raw Wood Will Affect The Final Color Of Creative Natural Finish, We Suggest That A Test Sample Be Made On Your Particular Wood Before Proceeding With The Entire Job.

While each Creative Natural Finish was designed to preserve the original beauty of a specific wood, it offers the same long-lasting qualities on other woods. Each wood has its own natural color and absorbs material at different rates, so the final color will vary from wood to wood. Again, we suggest you make a test sample on your own wood before starting.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Storage and Disposal

(12 pt)

Do not use or store inside the home. Reseal container after use. Do not reuse empty container. Wrap container and place in trash collection. Do not use or store near food or feed. Do not allow food or feed to come in contact with treated material.

Surface Preparation: Surfaces must be dry and clean. Remove dust and dirt by brushing or washing. Oil, wax, grease and similar contaminants should be removed by washing with paint thinner. Previously stained wood usually requires only a light brushing to remove accumulated dust and dirt.

Mixing Instructions: Stir thoroughly, using a wide paddle to completely mix the pigment and liquid. An excellent mixing method is to use two containers and pour the finish back and forth. Stir periodically during use to maintain a uniform mixture. Do not thin.

Application: Can be applied immediately with a good quality synthetic or bristle brush or spray. Thoroughly finish ends and edges of boards. To avoid "lap marks" which are caused by applying fresh material over partially dried material, always maintain a "wet edge" to work up to. Apply at package consistency. Thinning is not recommended.

Back Panel #2 (cont)

Dries to Touch in 6-8 hours. Dries completely in 24-48 hours, depending on weather conditions. May be recoated if desired.

Refinish Work: Creative Natural Finishes may be used to renew the color on old or previously stained wood surfaces. However, as Natural Finishes are semi-transparent and the color of the old surface will show through the new finish, we recommend using a finish color equal to or darker than the old surface. It is important that a test sample be made. Follow the instructions for new work.

Covers from 100-200 square feet (9.2 to 18.5 square meters) per gallon through wood and 300-400 square feet (27.8 to 37.1 square meters) per gallon on smooth wood.

Clean tools with paint thinner, mineral spirits or turpentine.

Extractive Bleeding: Some woods contain natural soluble materials that rise or "bleed" to the surface and cause a dark stain. This stain is not harmful, but it is unattractive. Most "bleeding" stains can be removed by washing with a mild detergent solution and rinsed with clear water.
