Attention: Mr. Joseph Kirk

Gentlemen:

Subject: SL-655 Swimming Pool Algicide  
EPA Registration No. 48941-3

The label referred to above, submitted in connection with registration under FIFRA is acceptable provided that you:

1. Submit five (5) copies of your final printed labeling before you release the product for shipment.
2. A stamped copy of the labeling is enclosed for your records.
3. At the next printing of the label make the following label changes:
  - a. In the right panel,
    - (1) Delete the paragraph "This product is toxic to fish - or by disposing of waters (wastes)" and replace with the currently recommended paragraphry below:

**Environmental Hazards**

This product is toxic to fish. Do not discharge effluent containing this active ingredient into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

-2-

- (2) Delete the sentence "Rinse empty container thoroughly with water and discard it" which appears just below the "Note to Physician," because it will confuse the Storage and Disposal statements which appear elsewhere on the label.
- (3) The headings "Pesticide Disposal" and "Container Disposal" should identify the appropriate paragraphs/instructions.

Sincerely yours,

John H. Lee  
Product Manager (31)  
Disinfectants Branch  
Registration Division (TS-767C)

ACCEPTED  
with COMMENTS  
in EPA Letter Dated:

JAN 08 1985

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act  
as amended, and the pesticide  
registered under EPA Reg. No.  
48941-3

# SL-655 SWIMMING POOL ALGICIDE

This algicide is formulated to complement swimming pool water being treated with normal chlorine systems. It is especially effective against growth of algae and being non-volatile, aids in maintaining pool water clarity and sparkle. The residual effectiveness of this algicide tends to stabilize the total chemical treatment system.

This algicide is compatible with many chemicals normally used in swimming pool maintenance, however, in its concentrated form this chemical should not come into contact with high concentrations of chlorine. DO NOT MIX THIS ALGICIDE AND CHLORINE TOGETHER when adding to the pool. These chemicals should be handled separately.

This algicide is economical, efficient, stable.

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For an initial application use one gallon of this algicide per 25,000 gallons of water. Use one quart per 50,000 gallons of water every fifth to seventh day depending on weather and use factors.

The initial dose is used when filling pool at beginning of swimming season and in a clean pool free of visible algae. If pool has visible algae growth, treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or reappear, repeat this treatment procedure as necessary. When pool is free of algae, use recommended maintenance dose.

After each rain of consequence, add one quart per 50,000 gallons water. Even though the pool may not be in use for periods of time, algae growth should be controlled since a heavy accumulation of algae growth is difficult to remove. The appropriate amount of this algicide should be added by pouring directly into the pool. More rapid distribution will be achieved by pouring a little of the specified amount into several areas of the pool. Recirculation or swimming activity will assure rapid dispersion.

### TO DETERMINE POOL CAPACITY

**Rectangular Pools:** Length times width times average depth (in feet) times 7.5 equals gallons.

**Round and Oval Pools:** Average diameter times average diameter times average depth (in feet) times 5.9 equals gallons.

ACTIVE INGREDIENTS:  
Alkyl (C14, 58%; C16, 28%; C12, 14%)  
dimethyl benzyl ammonium chloride ..... 10%  
INERT INGREDIENTS: ..... 90%

**DANGER**  
**KEEP OUT OF REACH OF CHILDREN**

PRECAUTIONS  
HAZARDS TO

Corrosive. Causes eye irritation. Causes skin or on clothing. Wear protective clothing when handling. Harmful or fatal if swallowed. **STATEMENT OF PHYSICIAN:** If swallowed, immediately flush eyes with water. For eyes, call a physician immediately.

If swallowed, drink plenty of water or milk, or solution or if these are not available, drink alcohol. Call a physician immediately. **NOTE TO PHYSICIAN:** The use of gastric lavage is contraindicated. Rinse empty container.

This product is toxic to fish and other aquatic life. Do not contaminate water by disposal. **STORAGE:** Plastic and Metal Containers should be stored in a secure area, away from food, or feed by storage. Pesticide wastes are flammable and explosive. Pesticide wastes are acutely toxic. Do not reuse empty containers. Do not reuse empty containers or puncture and dispose of in a secure area inaccessible to the public. Do not reuse empty containers.

Do not reuse empty containers or puncture and dispose of in a secure area inaccessible to the public. Do not reuse empty containers.
