

Not Reviewed. Registrant claims to be in accordance with Reregistration of Pesticide Product Labels by Phase 2 Response, Page 2.12, Active to Inert Change in Status.

Bare ground weed control around guardrails, airports, military installations, highway medians, pipelines, railroads, turnpikes, rights-of-way, buildings, storage areas, fences, pumps, machinery, fuel tanks, drainage ditch banks, and other areas, roadways, or similar area.

# SL-694

## VEGETATION KILLER CONCENTRATE

### PRECAUTIONARY STATEMENTS

#### Hazards to Humans and Domestic Animals

**WARNING:** Causes eye irritation. Do not get into eyes. Avoid contact with skin or clothing. Harmful if swallowed. May be absorbed through the skin. Do not contaminate food or feed.

**PRACTICAL TREATMENT:** In case of eye contact, wash with water for at least 15 minutes and seek medical attention. In case of skin contact, wash with plenty of water. Get medical attention if eye or skin irritation persists. If ingested, do not induce vomiting. Drink plenty of water or gelatin if not available, drink plenty of milk if available, remove victim to fresh air.

**NOTE TO PHYSICIAN:** There is no specific antidote. Indicate to the attending physician and take appropriate treatment of stomach contents during gastric lavage. Supportive and symptomatic therapy.

**ENVIRONMENTAL HAZARDS:** This product is toxic to fish. Keep out of any body of water. Do not contaminate water used for irrigation or domestic purposes. Do not discharge into water when disposing of equipment, wash water. Apply this product only as specified on this label.

**PHYSICAL or CHEMICAL HAZARDS:** Do not use in or near heat or open flame.

**IMPORTANT:** Read the entire Directions For Use and the Complete Label, Sale and Warranty before using this product.

### WARRANTY

Some weather and other conditions under which this product will not be satisfactory. The Seller makes no warranty, of any kind or extent, or implied, concerning the use of this product. The Buyer assumes all risk of use or handling not in accordance with directions or suggestions.

EP-100-1-18847-16

NET CONTENTS 1 GALLON

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This vegetation killer can be applied prior to or up to 3 months after weed emergence. Application rates vary from 1 to 4 gals. of this vegetation killer per 1000 sq. ft. depending on climatic conditions, soil type, the weeds present and the stage of growth of the weeds. In the following rate recommendations, the higher rates are intended for use on heavier soils, where weed growth is heavy, and where rainfalls are expected to be relatively high. The higher rates should also be used where longer residual control is desired in regions with a longer growing season.

**For control of annual and susceptible perennial weeds:** Apply 1 to 1 1/2 gals. of this vegetation killer mixed in a minimum of 20 gals. of water per 1000 sq. ft. to give thorough and uniform coverage.

**For control of hard-to-kill perennial weeds and grasses:** Use 3 to 4 gals. of this vegetation killer mixed with a minimum of 20 gals. of water per 1000 sq. ft. to give thorough and uniform coverage.

**For faster top-kill of existing vegetation:** Apply this vegetation killer in diesel oil, fuel oil, or weed oil. Use 1/2 to 1 gal. per 1000 sq. ft. (100-200 gals. per acre). This dense application will generally require 1/2 to 1 gal. of oil (150 gals. per acre or more of oil for thorough coverage).

This vegetation killer is a non-selective herbicide that can be applied in water or oil before or after plant growth begins. Although this vegetation killer has considerable activity through foliar contact, much of its activity is through roots, therefore its effectiveness is dependent on adequate ability to move it into the root zone.

Care must be taken to keep this herbicide away from desirable flower beds, lawns, and shrubs. Do not apply over roots of valuable trees or woody ornamental plants. Only apply this herbicide outside the dripline of trees. Avoid spray drift to desirable plants.

### STORAGE AND DISPOSAL

Pesticide spray mixture or rinsate that cannot be used according to label instructions must be disposed of according to Federal, state, or local procedures.

Drums — Triple rinse or equivalent and offer for recycling or reconditioning, or dispose of in a sanitary landfill, or other approved state and local procedures.
