

U.S. ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (WH 567) WASHINGTON, D.C. 20460	EPA REGISTRATION NO.	DATE OF ISSUANCE
	TERM OF ISSUANCE	30 OCT 1984
	NAME OF	SUBJECT
NOTICE OF PESTICIDE: <input type="checkbox"/> REGISTRATION <input type="checkbox"/> REREГИSTRATION (Under the Federal Insecticide, Fungicide and Rodenticide Act, as amended)		

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

NOTE Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an endorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

1900

ACTIVE INGREDIENT:

Potassium dimethyldithiocarbamate 50.0%

INERT INGREDIENTS 50.0%

This product contains 5.2 lb. of active ingredient per gallon and weighs 10.4 lb. per gallon.

KEEP OUT OF REACH OF CHILDREN WARNING

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING Causes eye damage and skin irritation. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Avoid contamination of food. Wear goggles or face shield and rubber gloves when handling. Wash thoroughly after handling.

STATEMENT OF PRACTICAL TREATMENT In case of skin contact, wash with plenty of soap and water. Remove contaminated clothing and wash before reuse. If product gets in the eyes, flush immediately with copious amounts of clean, cool water for at least 15 minutes. Get medical attention immediately. If product is swallowed, call a physician immediately. If patient is conscious, induce vomiting by stroking or tickling the patient's throat or forcing on patient's tongue. Emetics such as 2 teaspoonful (10 mL) of ipecac syrup or 1 teaspoonful (5 mL) of dry mustard in warm water to form a paste or even soap in warm water can be used. Repeat until vomit fluid is clear. Then have patient drink plenty of milk, gelatin solution, beaten egg whites, flour and water, or other nonoily demulcent. Never induce vomiting or give anything by mouth to an unconscious person. Note to physician: Probable mucosal damage may contraindicate gastric lavage.

ENVIRONMENTAL HAZARDS This pesticide is toxic to fish. Do not discharge treated effluent into lakes, streams, ponds, or public waters unless in accordance with a NPDES permit. For guidance, see Regional Office of the Environmental Protection Agency.

ACCEPTED
with COMMENTS
in EPA Letter Dated:

OCT 30 1984

Under the Federal Insecticide, Fungicide, and Herbicide Act as amended, for this pesticide registered under EPA Reg. No. 48969-3

Manufactured by:
FACETS
10 N. Main St
Chagrin Falls, OH 44022

EPA REG. NO. EPA EST. NO.

NET CONTENTS

DIRECTIONS FOR GENERAL CLASSIFICATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1900 is used in industrial and/or commercial recirculating industrial air-washing systems to control microbiological growth. Industrial and/or commercial recirculating cooling towers should be treated to remove algal growth, microbiological slime, and scale. Add a slug of 2 to 3 fl. oz. of 1900 per 1000 gal. of water based on total weight of water in the system. Repeat slug addition. Make subsequent slug addition of 1 to 3 fl. oz. of 1900 (per 1000 gal. of 1900) every 2 to 5 days or as needed. The frequency of addition depends on amount of bleedoff and the severity of the microbiological problem. Slug additions may be made in the sump of recirculating cooling tower systems.

1900 is used in industrial air-washing systems which clean machinery and other deposits. Prior to its use, systems should be cleaned to remove other deposits. An initial slug dose of 4.7 to 6 fl. oz. of 1900 per 1000 gallons of water should be recommended. Repeat initial dosage until control is evident. A dosage of 3.5 to 6 fl. oz. of 1900 per 1000 gallons of water should be used if necessary. The frequency of addition depends upon the severity of the bacterial problem. Slug additions may be made in collection trays of the airwash system.

For the preservation of cutting fluids, 0.03 to 0.2% of 1900 in the diluted cutting fluid, is recommended. In some cases, higher concentrations of 1900 are obtained when the fluid is diluted. For continued protection against bacterial growth, the diluted cutting fluid should be repeated every four weeks or as necessary if excessive contamination of a particular cutting fluid is observed.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. STORAGE: Do not expose to extreme temperatures. Do not store in drums should be placed in overpack drums for disposal. Spills should be cleaned up in a sanitary landfill. Keep container closed when not in use.

PESTICIDE DISPOSAL Pesticide wastes are toxic. Improper disposal is a violation of Federal Law. If these wastes cannot be disposed of by the State Pesticide or Environmental Control Agency, contact the Regional Office for guidance.

CONTAINER DISPOSAL

PLASTIC Triple rinse, if required. Then recycle or reuse in a sanitary and safe manner, or other procedures approved by state and local authorities.
