Super-IQ Insecticide Coating APT
EPA Reg. No. 49244-1
Super-IQ Insecticide Coating IC
EPA Reg. No. 49244-2

(Further revised in response to EPA letter of May 27, 1988)

TREATMENT OF MANHOLES (For control of cockroaches): Apply product on underside of manhole lids and manhole walls. Product may be applied via coarse spray using conventional airless spray equipment or by painting with suitable brush. Persons applying product in manhole must wear chemical resistant gloves, a respirator approved by NIOSH for organic chemical vapors, goggles and long-sleeved clothing. Apply no more than 48 ounces of product in each manhole. Do not discharge spray or unused material directly into the sewer system. Do not apply product within 36 hours of predicted heavy rainfall. Consult manufacturer on best method of application. *48 ounces is equal to 3 pints.*
