

U.S. ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (WH-567) WASHINGTON, D.C. 20480	EPA REGISTRATION NO. 50126-6	DATE OF ISSUE 26 APR 1976
	TERM OF ISSUANCE	
	NAME OF PESTICIDE PRODUCT HSC-308	

NOTICE OF PESTICIDE: REGISTRATION
 REREGISTRATION
 (Under the Federal Insecticide, Fungicide,
 and Rodenticide Act, as amended)

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Rubeck Services Agency, Inc.
 9101 Barton
 Overland Park, KS 66214

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.

2. Add the phrase "EPA Registration No. 50126-6" to your label before you release the product for shipment.

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Causes irreversible eye damage. Causes skin irritation. This product may cause allergic skin reactions. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

STATEMENT OF PRACTICAL TREATMENT: *If in eyes,* flush with plenty of water. Get medical attention. *If on skin,* wash with plenty of soap and water. Get medical attention. *If swallowed,* drink promptly a large quantity of milk, egg whites, gelatin solution or, if these are not available, drink large quantities of water. Avoid alcohol. Get medical attention.

Note to physician: Probable mucosal damage may contraindicate gastric lavage.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not apply in marine and/or estuarine oil fields. Do not discharge effluent containing this active ingredient into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: Do not use or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

COOLING TOWERS: BSC-308
cooling tower wood against soft or surface rot and interior staining or painting a dispersion containing 0.5 to 0.7% BSC-308 in water onto the clean wood surfaces. The amount of BSC-308 per 1000

gal. of water can also be inhibited by periodic shock doses of BSC-308 to the recirculating cooling water at the tower basin or sump. Provide 1.25 lb. of BSC-308

per 1000 gal. of water. Shock treatment should be stopped for 4 to 6 hr. after treatment is repeated every four months.

COOLING WATER: BSC-308
To control bacteria, and fungi in industrial recirculating cooling water, when biological slimes, and other deposits. System should be cleaned thoroughly to remove logical slimes, and other deposits. System should be treated with an initial dose of 0.6 to 3.7 fl. oz. of BSC-308 per 1000 gal. water in the system.

Shock treatment should be made every 1 to 5 days depending on the extent and severity of microbiological fouling.

DRILLING FLUIDS: To inhibit bacterial and fungal degradation of well fluids, BSC-308

at concentrations of 0.05 to 0.25% based on the total wet weight of the fluid. BSC-308
PETROLEUM SECONDARY RECOVERY: BSC-308
To control sulfate-reducing bacteria, slime-forming bacteria, and other microorganisms, water disposal systems, and other oil-field equipment, add 0.6 to 3.7 fl. oz. of BSC-308 per 1000 gal. of water.

Shock treatment should be made continuously or intermittently by means of a metering pump before or after injection pumps and injection well headers. Control is noticeably fouled, add 0.6 to 3.7 fl. oz. of BSC-308 per 1000 gal. of water continuously until desired degree of control is achieved. BSC-308

Intermittent or Slug Method: When control is noticeably fouled, add 0.6 to 3.7 fl. oz. of BSC-308 per 1000 gal. of water to 8 hr per day and 1 to 4 times per week, or as needed to maintain control.

CUTTING FLUIDS: BSC-308
To control bacterial and fungal degradation of water-based and water-soluble or emulsifiable cutting fluids in metalworking operations. It should be added to the cutting fluid at a rate of 0.6 to 3.7 fl. oz. of BSC-308 per gallon of cutting fluid with water.

Shock treatment should be added to the concentrate before dilution at a rate of 125 to 250 times the required concentration in the diluted fluid.

STORAGE & DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. **PESTICIDE STORAGE:** Do not expose to extreme temperatures. High drums should be opened in well ventilated areas. Leak in overpack drums for disposal. Spills should be absorbed and disposed in a sanitary landfill.

PESTICIDE DISPOSAL: Pesticide wastes are acutely toxic. Do not discharge pesticide spray mixture or residue as a violation of Federal law. Dispose of by use according to label instructions; contact your State Pesticide Control Agency or the Hazardous Waste Representative at your EPA Regional Office.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then puncture and dispose of in a sanitary landfill, or by other means as directed by local authorities.
