**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS**

DANGER: Corrosive. May cause severe skin irritation, chemical burns to broken skin. Causes eye damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until odors have dissipated.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams or ponds. Treated effluent may not be discharged into lakes, streams, ponds or public waters without a valid discharge permit. For guidance, contact the regional office of the Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS:
STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with gross filth such as feces, urine, etc. or with ammonia, acids, detergents or other chemicals may release hazardous gases irritating to eyes, lungs and mucous membranes.

AND SANITIZING."**

ACTIVE INGREDIENT
SODIUM HYPOCHLORITE 9.2%
INERT INGREDIENTS 90.8%

**KEEP OUT OF REACH OF CHILDREN
DANGER**

FIRST AID: If on skin, wash with plenty of soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of milk or gelatin solution or, if these are not available, drink large quantities of water. Do NOT give vinegar or other acids. Do NOT induce vomiting. Get prompt medical attention.

See additional precautions on side panel.

**DIRECTIONS FOR USE
GENERAL CLASSIFICATION**

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

DIRECTIONS FOR SWIMMING POOL CHLORINATION
For a new pool or for spring start-up, superchlorinate with one (1) pint (16 oz) of this sodium hypochlorite solution for each 2500 gallons of water. This dosage results in 5 ppm available chlorine by weight.

For Pool Maintenance:
A) Adjust pool water pH to 7.6 - 7.8 range and maintain.
B) Add manually or by a feeder device this sodium hypochlorite solution at a rate to maintain an available chlorine residual of 0.6 to 1.0 ppm. One-half pint (8 fl. oz.) of this sodium hypochlorite solution for each 6000 gallons of water will produce 1.0 ppm available chlorine by weight. Frequency of additions to maintain 0.6 to 1.0 ppm available chlorine will depend upon temperature and number of swimmers. Use test kits to make certain the pH and chlorine residuals are in the proper range.

**DIRECTIONS FOR DISINFECTION OF POTABLE WATER
FOR HOME WELL WATER SYSTEMS**

Dilute this sodium hypochlorite solution in the ratio of one part sodium hypochlorite solution to 9 parts of water. Mix a sodium hypochlorite solution and water thoroughly and begin feeding of solution with the hypochlorinator (metering pump). Maintain a free available chlorine residual of at least 0.2 ppm and no more than 0.6 ppm throughout the distribution system as determined by a DPD chlorine test kit. Further chlorine sampling must be conducted at a frequency not less than that prescribed by the National Sanitation Primary Drinking Water Regulations. Check water frequently with a DPD chlorine test kit.
Contact your local Health Department for further details.

DIRECTIONS FOR SANITIZING FOOD PROCESSING OR DAIRY EQUIPMENT
Clean equipment in the normal manner. Just before using, rinse all surfaces thoroughly with this sodium hypochlorite solution containing 200 ppm available chlorine. Maintain contact with disinfectant for a minimum of two minutes. Do not rinse with water after treatment with sodium hypochlorite solution. Do not store overnight. Each pint (16 oz.) of this sodium hypochlorite solution per 4 gallons of water will provide approximately 200 ppm available chlorine by weight.

NOTE: To avoid eye irritation, use eye protection when testing and increase strength as necessary. Contact your local Health Department for further details.

STORAGE AND DISPOSAL: Store in cool, dry, well-ventilated area away from direct sunlight. In case of spill, flood area with large quantities of water. Place empty container thoroughly with water and either return to manufacturer or discard by placing in fresh collection or burying in an approved landfill. Product residue which cannot be used should be diluted with water and disposed of in a sanitary sewer. Do not curdle, eat, or feed by storage, disposal or cleaning of equipment.

A) Your company name and address (street, city, state Zip Code) (To fill insert name "Jones Chemicals, Inc.")
B) EPA Registration Number
C) If you already have an EPA Establishment Number, insert it here. Otherwise, contact your nearest EPA Enforcement Office to have an EPA Establishment Number assigned to your company. Final printed label should be submitted to Jones Chemicals, Inc. (Attn. Ruthann Hoeb) for official approval even though you are in the process of applying for an EPA Establishment Number. DO NOT SEND LABELS DIRECTLY TO EPA.
D) Net volume, in terms of largest unit present. Such as 1 gallon (or 1 pint 2 ounces for 18 ounces, etc.).
E) Print your product name here along with label artwork.
