

U.S. ENVIRONMENTAL PROTECTION AGENCY
OFFICE OF PESTICIDES PROGRAMS
REGISTRATION DIVISION (7H-567)
WASHINGTON, D.C. 20460

EPA REGISTRATION NO.

50356-2

DATE OF ISSUANCE

18 SEP 1984

TERM OF ISSUANCE

NAME OF PESTICIDE PRODUCT

Aquarol WT-224

NOTICE OF PESTICIDE: REGISTRATION
 REREGISTRATION

(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Worldwide Technology & Service Corp.
2000 N. 34th St.
Mesa, AZ 85205

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an endorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(d)(7)(A) provided that you:

1. Submit to the Agency all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Add the phrase "EPA Registration No. 50356-2" to your label before you release the product for shipment.
3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Inclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 5(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

ACTIVE INGREDIENT:

SEP 18 1984

2-(Thiocyanomethylthio)benzothiazole Under the Federal Insecticide, Fungicide, and Rodenticide Act 30%

INERT INGREDIENTS 70%
As Amended, for the pesticide registered under EPA Reg. No. 50356-2

KEEP OUT OF REACH OF CHILDREN
DANGER

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Causes irreversible eye damage. Causes skin irritation. This product may cause allergic skin reactions. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

STATEMENT OF PRACTICAL TREATMENT: *If in eyes,* flush with plenty of water. Get medical attention. *If on skin,* wash with plenty of soap and water. Get medical attention. *If swallowed,* drink promptly a large quantity of milk, egg whites, gelatin solution or, if these are not available, drink large quantities of water. Avoid alcohol. Get medical attention.

Note to physician: Probable mucosal damage may contraindicate gastric lavage.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not use in offshore or estuarine drilling operations. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with a NPDES Permit. For guidance, contact the regional office of the Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS: Do not use or store near heat or open flame.

NET CONTENTS

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with the labeling.

COOLING TOWERS: Aquari WT-223
Apply Aquari WT-223 to cooling tower wood against soft or surface rot and internal rot by spraying or painting a dispersion containing 0.5 to 0.7% Aquari WT-223 in water onto the clean wood surfaces. The amount applied should be 1.25 lb. of Aquari WT-223 per 1000 ft.² of wood. Rot can also be inhibited by periodic shock doses of Aquari WT-223 to the recirculating cooling water at the tower basin or condenser. Provide 1.25 lb. of Aquari WT-223 per 1000 gal. of water. Shock bleedoff should be stopped for 4 to 6 hr. after treatment. Repeat treatment every four months.

COOLING WATER: Aquari WT-223
Control bacteria, and fungi in industrial recirculating cooling water systems. The system should be cleaned thoroughly to remove mineral scale, slimes, and other deposits. System should then be treated with an initial dose of 0.6 to 3.7 fl. oz. of Aquari WT-223 per 1000 gal. water in the system. Subsequent treatments of 0.6 to 3.7 fl. oz. per 1000 gal. should be made every 1 to 5 days, depending on severity of microbiological fouling.

DRILLING FLUIDS: To inhibit bacterial and fungal degradation of drilling fluids, add 0.6 to 3.7 fl. oz. of Aquari WT-223 per 1000 gal. of fluid. Concentrations of 0.05 to 0.25% based on the total wet weight of the fluid are recommended.

PETROLEUM SECONDARY RECOVERY: Aquari WT-223
Control sulfate-reducing bacteria, slime-forming bacteria and microorganisms in micellar floods, water disposal systems, and other oil-field water systems. Add 0.6 to 3.7 fl. oz. of Aquari WT-223 per 1000 gal. of water.

Control bacterial and fungal degradation of water-based and water-soluble or emulsifiable concentrates in metalworking operations. It should be added to the cutting fluid at a rate of 0.6 to 3.7 fl. oz. per 1000 gal. of water. Add to the concentrate before dilution at a rate of 125 to 1250 times the required concentration in the diluted fluid.

CUTTING FLUIDS: Aquari WT-223
Control bacterial and fungal degradation of water-based and water-soluble or emulsifiable concentrates in metalworking operations. It should be added to the cutting fluid at a rate of 0.6 to 3.7 fl. oz. per 1000 gal. of water. Add to the concentrate before dilution at a rate of 125 to 1250 times the required concentration in the diluted fluid.

STORAGE & DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. **PESTICIDE STORAGE:** Do not expose to extreme temperatures. High. Drums should be opened in well-ventilated areas. Leaking drums should be placed in overpack drums for disposal. Spills should be absorbed in a sanitary landfill.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. If you cannot dispose of pesticide, spray mixture, or rinseate in a sanitary landfill, contact your State Pesticide Control Agency or the Hazardous Waste representative at your EPA Regional Office.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then off-gas, puncture and dispose of in a sanitary landfill, or by other procedures approved by local authorities.
