

**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS  
AND DOMESTIC ANIMALS**

**DANGER:** Corrosive. Will cause severe skin irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until odors have dissipated.

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish. Keep out of lakes, streams or ponds. Treated effluent may not be discharged into lakes, streams, ponds or public waters without a valid discharge permit. For guidance, contact the regional office of the Environmental Protection Agency.

Chlorine must be allowed to dissipate from treated pool water before discharge. Do not make any chlorine application within 24 hours of discharge.

**PHYSICAL AND CHEMICAL HAZARDS:**  
**STRONG OXIDIZING AGENT:** Mix only with water according to label directions. Mixing this product with gross fertilizers such as urea, etc., or with ammonia or acids, detergents or other chemicals may release hazardous gases irritating to eyes, lungs and mucous membranes.

# SANI-KLOR 125

ACTIVE INGREDIENT  
SODIUM HYPOCHLORITE 12.5%  
INERT INGREDIENTS 87.5%

**DANGER  
KEEP OUT OF REACH OF CHILDREN**

**STATEMENT OF PRACTICAL TREATMENT**

**FIRST AID:** If on skin, wash with plenty of soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention if swallowed. Drink large quantities of milk or gelatin solution or if these are not available, drink large quantities of water. Do NOT give vinegar or other acids. Do NOT induce vomiting. Get prompt medical attention.

See additional precautions on a separate sheet.

**DIRECTIONS FOR USE  
GENERAL CLASSIFICATION**  
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT  
IN A MANNER INCONSISTENT WITH ITS LABELING

**DIRECTIONS FOR SWIMMING POOL CHLORINATION**  
For a new pool or for spring start-up, superchlorinate with one (1) part by weight of this sodium hypochlorite solution for each 2000 gallons of water. This dosage is equivalent to 5 ppm available chlorine by weight.

**For Pool Maintenance:**  
A. Adjust pool water pH to 7.6 - 7.8 range and maintain.  
B. Add manually or by a feeder device this sodium hypochlorite solution at a rate to maintain an available chlorine residual of 0.8 to 1.0 ppm. One fourth part of the total of one gallon of this sodium hypochlorite solution for each 2000 gallons of water will provide 1.0 ppm available chlorine by weight. Frequency of additions to maintain 0.8 to 1.0 ppm available chlorine will depend upon temperature and number of swimmers. Use test kit to make certain the pH and chlorine residual is 4 in the proper range.

**DIRECTIONS FOR DISINFECTING OF POTABLE WATER AT WATER TREATMENT FACILITIES**  
Dose the sodium hypochlorite solution at the rate of one part sodium hypochlorite solution to 11 parts of water. Mix the sodium hypochlorite solution and water thoroughly and begin feeding of solution into a hypochlorinator, operating pump, etc. (Note: 1.0 lbs available chlorine residual of 0.8 to 1.0 ppm and no more than 0.8 ppm chlorine residual is required by a CPO. Chlorine residual must be maintained at a minimum of 0.2 ppm for 30 minutes by the chlorine residual. Primary Drinking Water Regulations.) (Note: water is equivalent with CPO chlorine residual. Contact your local Health Department for further details.)

**DIRECTIONS FOR SWIMMING POOL DISINFECTING ON SHUT DOWN/RESTART**  
Clean equipment in the normal manner. Add before using fresh water to the pool. Use one part sodium hypochlorite solution containing 200 ppm available chlorine. Maintain contact with equipment for a minimum of 30 minutes. Do not use until water odor dissipates and sodium hypochlorite solution. Do not use until high chlorine residual is 12 mg/l of the sodium hypochlorite solution per 10,000 gallons of water. (Note: 1.0 lbs approximately 200 ppm available chlorine by weight.)

**NOTE:** This product degrades with age. Use a chlorine test kit to measure chlorine in the solution to obtain the required level of available chlorine.

**STORAGE AND DISPOSAL:** Store in a cool, dry, well-ventilated area. Store away from direct sunlight. In case of spill, flush area with large quantities of water. Rinse empty container thoroughly with water and return to manufacturer or dealer by mail. Do not reuse. In case of spill, collect in burning or approved metal container. Spills or leaks that cannot be used should be placed in a container of a suitable liner. Do not store in plastic. Do not use if label is lost or damaged. Dispose of equipment.
